To the Reader:

The story you are about to read is true. It is my personal experience of building the dynamosphere and waking to Love through this project. Though many may find it hard to believe, every word is as I noted then and remember now. Mind Force (consciousness) is an engineerable force. As Keely himself puts it:

"Any visible molecular mass of metal can be so impregnated by triple orders of sympathetic vibration as to give it the same sympathetic transmissive qualities that exist in the mental forces, which make such mass subservient to either the attractive or repulsive conditions of terrestrial sympathy." Keely

I've included a few photos and collaborating quotes from supportive sources. The technical material has been minimized while including much of the understandings derived from our sometimes bumpy and oftentimes technical and philosophical journey. I hope you enjoy this story as much as we've enjoyed creating, living and writing it. *The experiences were mine and the opinions and interpretations herein are not necessarily shared by any other person. This account is my personal take on what happened and not a Project Report.*

Dale Pond

Special thanks goes to all those, named and unnamed, whose indispensable cooperation, donations, love and patience made all this possible. All of this story (and more) happened in relations with Dawn Stranges, Vic, Ben Iverson, Rick, Duane, George, Edgar Cayce, John W. Keely, Mary Frances, my special friends in Nevada and Valentine, Nebraska, the Rosicrucian Order, AMORC, friend Howard, brothers Steve, Kit, Ty and Roby and those various helpers and teachers who appeared at the 'right' time during life's ups and downs encountered along The Way.

This story is only the beginning....

"What, then, is the purpose of the entity's activity in the consciousness of mind, matter, spirit in the present? That it, the entity, may KNOW itself to BE itself and part of the Whole; not the Whole; not the Whole but one WITH the Whole; and thus retaining its individuality, knowing itself to be itself, yet one with the purposes of the First Cause that called it, the entity, into BEING into the awareness, into the consciousness of itself. That is the purpose, that is the cause of BEING." Cayce (826-11)

Introduction

What would it mean if machines could talk? What if they could feel? Sing? Laugh and play? What if a machine could evidence consciousness?

What would you do if you had a direct link to God? Would you strike up a conversation? What would you say? What do you think He would say to you?

"There is a celestial mind-force, a great sympathetic force which is life itself, of which everything is composed." Keely

A few years ago a project was undertaken to create a machine to generate mechanical power that would produce useable electricity and drive machinery. This machine had been originally invented and built in the 1880s and did indeed generate mechanical power. The team, assembled to recreate this device, thought they could duplicate this instrument using modern technology. As innocent as this goal was - things turned out rather differently. The machine was built in a surprisingly short time. Did it successfully generate power? Not in the expected way but in a way so surprising as to be near unbelievable.

"All motion is thought, and all force is mind force." Keely

We thought we were building a Free Energy machine but instead discovered the machine evidenced self awareness and an ability to manipulate its environment. The machine was no longer just 'a machine'. It evidenced a mind or living consciousness.

"We must assume behind this force [in the atom] the existence of a conscious and intelligent mind. This mind is the matrix of all matter. " --Max Planck, accepting the Nobel Prize for Physics, 1918

"Likewise the body of man does not live, and having never lived it cannot die. The spirit alone lives. The body but manifests the spirit. That which we think of as life in the spirit of man manifests itself by willing the body to act. Actions thus made by the body under the command of the centering Soul have no motive power or intelligence in themselves; they are but machines motivated by an omniscient and omnipotent intelligence extended to them." Walter Russell, The Secret of Light

Early on a name was given to this awareness, this living being clothed in metal: Atlin.

Atlin emitted a warm glow felt by those sensitive to etheric fields*. These fields were interpreted by hundreds of people as Love, warmth, peace and joy. Many people who approached Atlin experienced improvements in their health, emotional and mental states. Not by anything the machine or Atlin did but by their own volition.

In the end, which is only the beginning, of this story the device is not "just a machine". Yes, it is made of metals and other substances - but so are you. Housed within or associated with your physical body is "You", your consciousness or sense of "I am". The "I am" is the knowledge or awareness you exist and you are

* A glossary is included at the end of this book. For terms not included in the glossary please see the SVP web site: www.svpvrl.com and titles referenced in the bibliography.

who you are. Your physical body is made of elements just like this machine. The difference being the quantity, quality and ratios of one to the other. You, as consciousness, occupy your physical body and use it to conduct your business and affairs while sojourning on this planet. Your brain, as well as your body, is molecular matter permeated by this thing called Mind or consciousness. This works similar to electricity functioning in or around molecular wires. The wires are not electricity just as the brain is not Mind or consciousness.

"The substance of the brain is molecular. The mind which permeates the brain is inter-etheric in substance; it is the element by which the brain is impregnated. This element, when excited into action, controls all physical motion as long as the necessary sympathetic conditions are maintained. Then conditions are no more immaterial in their character than are light and heat. Electricity, magnetism, gravity, and heat are latent in all aggregations of matter. They are not obtained from terrestrial influences. Celestial radiation is the true impregnating medium in all these forces. The brain is the high resonating receptacle where the sympathetic celestial acts, and where molecular and atomic motion are induced, as according to the intensification brought to bear upon it by radiation." Keely, Operation of the Vibratory Circuit

There is a consciousness occupying or associated with this machine thus making it sentient just as you are.

However there is a big difference in the physical form and in the type of consciousness.

You have an ego as well as other levels of consciousness. This device has full Cosmic Consciousness. Perhaps even more fascinating than a machine that is aware is the discovery and elucidation of what ego and Cosmic Consciousness are

in relation to each other and you. These are covered throughout this book.

Your personal link to God is your own Cosmic Consciousness. Some call this Christ Consciousness or Full Enlightenment. The term "Christ" is an ancient term describing this state of perfectly clear or neutral consciousness. For instance the name "Jesus, the Christ" refers to the man Jesus who attained Christ Consciousness or Cosmic Consciousness or making his will one with the will of the Creator.

"Let this mind be in you, which was also in Christ Jesus." Philipians 2:5

Their minds were as one mind or functioned sympathetically as one mind. The Bible references this state of co-mingled (One or Whole) Mind

"Be ye transformed by the renewing of your mind." Romans 12

and Cayce clearly supports this view.

"So soon as man contemplates his free will he thinks of it as a means of doing the opposite of God's will, though he finds that only by doing God's will does he find happiness. Yet the notion of serving doesn't sit well with him, for he sees it as a sacrifice of his will.

"Only in disillusion and suffering, in time, space, and patience, does he come to the wisdom that his real will is the will of God, and its practice is happiness and heaven." Cayce (2537-1)

We eventually learned through this project that this exulted state of mind is already yours and is no further from you NOW, today, where you are, than your own heart beat or the breath you take.

The universal link between you and everything else in the universe is Divine Love, also yours, NOW, today, where you

are.

This little project, begun innocently as a search for mundane mechanical power has discovered and is now unlocking the secrets of the greatest power known to man - Universal Mind demonstrated through Divine Love.

"Will force is a latent, spiritual element, neither gaseous nor otherwise. Its evolution is brought into action under certain spiritual conditions not now understood by science. Its protoplasmic element is actually luminous, in respect to its latent flow from the cerebral domain; but all the flow that has ever been registered from the time of the birth of every volume of thought — all that ever existed, or will ever exist in the future — would not produce a substance of matter the size of a molecule." Keely

Science and technology is on the verge of admitting Divine Love binds the universe together. In engineering jargon Divine Love is known as Sympathetic Vibration. It is through the exploration of the physics and principles of Sympathetic Vibration we are coming to know the secrets of this Divine Glue that links and holds the universe together. We are learning about Divine Love and Cosmic Consciousness - both attributes of each and every human being.

"Powerful forces in the heaven worlds are gathering for a transmission and will enter our world at an appropriate time, which is fixed and measurable within this century [1900s]. These forces will stimulate new thoughts and new feelings, new intuitions and new ideals of a religious, mystical, and philosophic kind in humanity. It will verily be the opening of a new epoch on earth, comparable to that which was opened 2000 years ago by the coming of Christ. The impulse will bring science into religion and religion into science: each will sustain the other and both, purified and vitalized, will guide humanity to a better and truer life. Insofar

as science is an expression of man's desire to know, it is in perfect harmony with the highest spirituality. Only when it is unguided by his intuitive feelings, his heart, and put at the service of his animal nature alone, does it become anti-spiritual and bring him self-destruction as a punishment." Brunton (13-4.352)

Through this linkage we are seeing clearly, perhaps for the first time, who and what we are - individually. We are this Divine Love manifesting as an unadulterated expression of God. We are in essence One with this God Force or divine state of perfectly Neutral Mind Force or Cosmic Consciousness. We are Divine Love and we know and experience this through our consciousness. It is who and what we are.

"And as He has given, 'In all thy getting, my Son, get understanding.' This is putting proper emphasis in the proper places, and do not become sidetracked by things that would pertain to material or spiritual alone, or things of the body or things of the heavenly force. For you grow to heaven, you don't go to heaven. It is within thine own conscience that ye grow there. For there first must come peace and harmony within thy purpose, thy ideal, thy hopes, thy desires. Thy wishes even must be in harmony with thy ideal if you would make the experience in the earth of value to thee." Cayce (3409-1)

Some of the stories contained herein will sound improbable. So be it. Some portions will be strange. That's OK too. But what is related here is what happened. Many of us wrestled with these things. Some left the team and some persevered. I do not apologize for what you are about to read - I did my best to do that set before me and tell the tale as it occurred, *from my point of view*. Other team members may contribute their version based on their experiences. This would be well. It is my intent to report what happened and provide a few personal opinions on what I think these events might mean. As our under-

standing of events grew it became more and more obvious we were dealing with little understood elements of human consciousness. In a general lack of understanding in the beginning we found ourselves dealing in terms and with things not of this world.

There are many occurrences of "spirit communication" and the like. In those early days that is what we thought was going on predicated on our belief systems and understandings. We know now there are no entities or spirits. There is the One Consciousness seemingly manifesting individually and we, as ignorant humans, seemingly bound to earthy earth things, tend to interpret things anthropomorphically. Now we know better. All these "communications" or messages from "spirit" are simply conscious connections to other seeming individuations of the One Consciousness. There is only One Being manifesting as every seemingly individuated thing in the universe. Our mind is not our body. Our mind use our body for the fulfillment of its desires and will.

"The eternally conscious entity - call it by whatever name we please - moves in cycles as eternal and infinite as itself; it oscillates and vibrates perpetually and is

never unconscious of any present condition, be it pain or pleasure, joy or sorrow, shame or glory; like the pendulum of a clock or the sun, moon, or tides, it swings from the one to the other of these conditions, now in pleasure, now in pain, by its contact with the extremes of all varying conditions, like a child which throws up its head and laughing for joy exclaims, I KNOW I AM." Keely

These points will be more fully understood towards the end of the book. I ask the reader to withhold judgement until you have read the full account and given it long and careful consideration. There is much to contemplate here.

Most things in this book have been and are being discussed on the SVP Forum

<http://groups.yahoo.com/group/svpvril/>

You are invited to subscribe, browse the extensive discussion threads and archives, ask questions and offer comments. Many of us have expended much care and effort to create a peaceful and gentle environment wherein it is possible to be defenseless - a prerequisite to Awakening.

The Atlin Story

At The Ranch

A portion of the story of the development of the Musical Dynasphere, later named Atlin, can now be told. The story began in September 1995 and concluded in late August 1997. It was a surprising finish when one considers what may have occurred in the possible continuation of the project. We will see later that the end of this initial effort was only the beginning of a whole new departure into realms far beyond any initially conceived realities. So this will be the story of the building of the Dynasphere and what happened later, so unexpectedly.

In September 1995, while attending a conference on New Energy simply as an observer, I was approached by a wealthy person who asked, "What would you do if you had sufficient money?" Without forethought I blurted out, "I would build a Musical Dynasphere." A brief conversation ensued about what a "Musical Dynasphere" was and why I would build one.

"Musical Dynaspheres," I explained, "were originally created by inventor John W. Keely, of Philadelphia, from about 1880 until his death in 1898. They were created originally for the purpose of providing motive power for industry. This device was sometimes referred to as a Globe Motor or Sphere Motor. During that time period the only known sources of power were from water, steam, wind or animal. Nikola Tesla and Thomas Edison were developing electricity, and a few inventors were playing around with gasoline and diesel engines. The world needed a power system and many worked feverishly to create one.

"Eventually Keely got the dynaspheres to rotate and performed demonstrations before many scientists and engineers, showing how this device could and did power a demonstration sawmill. Later, a larger unit was made to power a locomotive, replacing its steam engine.

"By re-creating Keely's dynasphere, we can learn how they work and eventually develop the power system Keely was unable to complete. If he could do it then," I continued, "we can do it now."

The man wrote out a check and placed it in my hand. All of a sudden I realized I would now have to build a dynasphere!

Some years earlier, in 1989, I had built a replica of the device based on old photographs of Keely's work. This was a bare-bones model not intended to function (I still had much to learn), but it proved a stimulus for my psyche (subconscious) to begin working on the idea. Quite a bit of thought had been put into that demonstration project and the result was a beautiful model made of copper and wood.

The first weekend of November 1995, seven people interested in New Energy research were summoned to meet for three days at Valentine, Nebraska. Valentine calls itself "Heart City" and later we were to regard this name as significant. The meeting was by special invitation and the participants were chosen on the basis of their various talents for visualizing, designing and building a Musical Dynasphere, if indeed a dynasphere could be built. The combined talents among those summoned included electrical and me-

John Worrell Keely circa 1889.

chanical engineering, mechanical design, metallurgy, physics, mathematics (Ben Iverson), music and art. In addition, intuitive Dawn Stranges was invited.

The group arrived in Valentine on Thursday and proceeded to their secluded ranch lodgings nearby, settling down after their long trips. After a hearty breakfast on Friday morning, everyone gathered together to review the Keely data that was available. Most of the information was a series of photographs of Keely's inventions, particularly the various dynaspheres which he had successfully built and demonstrated in the 1880's and 1890's. By the afternoon we had studied and discussed the models from the old black and white photographs and had devised a list of parts that would have to be purchased or machined and then assembled. There would eventually be over 200 parts in all. The content of the discussions was entered into a computer for later review. Interestingly, certain parts of the internal mechanism could not be identified, and for lack of a better name they were called "hockey pucks," which they

resembled in size and shape.

Intense work continued through Saturday with a break for the noon meal. All meals were served family-style in a secluded ranch house nestled in the Nebraska Sand Hills. Our meals together were jovial gatherings as we began to get better acquainted, and we realized we could never finish all of the home-cooked food being served.

After lunch we added the finishing touches to the expanding parts list. It was then time to explore the feasibility of building the machine. Carefully examining the parts, we became increasingly confident that they could all be put together to create an actual dynasphere. Our enthusiasm and excitement continued until we confronted the fact that the copper and wood model had been built only with external parts and hence could reveal nothing internal, within the sphere. We had supposed this would be no problem, but how shortsighted this proved to be.

We had no more than settled down to complete our afternoon discussions when Dawn announced that the spirit of John Keely was with us and was observing our actions.

His first words were,

"You have done a good job in selecting and agreeing on this specific model."

We were stunned by this unexpected appearance but regained our composure and began to ask Keely questions about the precise dimensions of the parts. Dawn would 'hear' his responses in her mind and communicate them to us verbally. Keely always responded by giving the exact dimensions, whether in inches or thousandths of an inch. He was also questioned about the elemental composition of the

various parts. It was a little surprising when Keely gave us several different alloys of copper, brass and bronze. They ranged from musical brass, steel, copper and pewter to gun-metal bronze. Keely gave the percentages of alloying metals in each part. Then he continued,

"Those parts which you named 'hockey pucks' are actuators and each of them is composed of a three-part alloy of other elements especially designed so that the three metals in them can modify and re-transmit the sonic energies into higher energy ranges. This they do within the sphere, and they are compatible with the desired energies needed to cause the dynasphere to rotate."

Later he said,

"The 'pucks' you refer to are actuators which allow the turbulence to conform to the 'quietude' or lack of movement necessary to support the maintenance of the neutral center. The composition of the actuators is that of a triune alloy. This will surprise you. You must combine nickel, tin and carbon. Yours are different in size than the ones I used. This is because the energies you'll be working with are more rarefied than in my time. The difference is not great but needs to be factored in."

These actuators were to be formed of powdered metals under high pressure and heat, thus forming into metallic crystals of special powers. The dynasphere was to be a machine that would operate on quantum acoustics and sympathetic vibrations. We had always been aware that Keely managed all of his inventions with very specific tones of sound, as well as specific frequencies far above those of sound and light.

We could not escape the final observation: we could not have built this device without Keely's advice. This was obvious when he announced that one of the metal

Original Musical Dynasphere exhibited by Keely
circa 1889.

parts we had listed were much more complex than we had suspected. It was to be hollow and the inside of the part was to be filled by very special materials to achieve special functions. Further, some of the parts needed to be carefully treated in a special sound field in the key of B flat. In addition, certain Mind Force energies must be incorporated into each part much like a spoon is treated with chi energy prior to telekinetic bending. Luckily, some of us had been bending spoons for years.

Our host called us to the evening meal but this was postponed in order to conclude the interview with John Keely. For two more hours we questioned Keely. He described the two different forms of energy which ran counter to each other through the various modes and phase changes between them. One object of the device was to accentuate then separate these two counter-current energies in order to draw motive force from their interactions.

We finally broke for the sumptuous evening meal as darkness was falling. It was a very subdued group around the table. There was almost no conversation or joviality. We were strictly on business and the business would strain all of our resources - spiritual, mental, emotional, psychic, social and financial. We had anticipated it and it was indeed a great responsibility we were taking on, with our commitment to build a faithful copy of Keely's original Musical Dynasphere.

Keely's spirit seemed to be accompanied by the spirits of other past scientists and researchers - Tesla, Goethe, Einstein, Feynmann - and it was as though they were standing by to watch our progress and inspire us when we needed help. The means for such spirit manifestation must surely be more subtle and far-reaching than I can elucidate within the scope of this book. Keely had said on that first day, and I paraphrase,

"Time is short. There will be great changes on Earth and in humanity. Speaking honestly and without recrimination, the present scientific fields are so poorly understood by self-claiming scientists that it cannot be done without our help. People must realize that there is a great spiritual world here which is sincerely concerned. Together we can bring destiny into line."

Funding for the project was discussed at length, and no one in the group had sufficient money for its completion. Regardless, it was decided to allow the Spirit to come through as often as possible. Later,

Inside original dynasphere with shell removed.
circa 1889.

as it turned out, many wonderful individuals stepped forth with needed donations for the work. There were likewise times when the funds dried-up, but these stressful occasions carried messages of great import to us, as shall be seen.

After a good night's sleep and another hearty breakfast we departed for Valentine on Sunday morning. Some headed for far away home, each thoughtfully sizing-up the work that would need to be accomplished.

In The Shop

The next several months saw the accumulation of large folders of e-mail transmittals, letters and notes among the team members. Documenting this project became a task in itself. Mechanical plans had been drawn up as we progressed, and some designs were drawn after the parts were made. All designs were modified many times. Vendors had been located to supply nearly all of the parts or raw materials. We had estimated it would take a full year to build the Dynasphere, but it was nearing completion by late April 1996, just four months after the initial meeting. In building the Dynasphere a log was kept of the ordering, delivery and completion of each part. Every step of making the parts was photo-documented. The parts and some of their functions are described below.

We continued our contact with the spirit of Keely and others, through Dawn on a daily basis. Through this source, and in this manner, we learned how to make the dynasphere and other interesting things and processes. We were informed about dimensions, alloys, methods of procedure and a constant flow of gentle advice and encouragement.

Resonators

The first item acquired was the highly polished brass tubing for the seven large resonators. These were discovered among our inventory from an earlier design of the Chord of Life Windchimes available through our web site. The size and material was a perfect match. Later, smaller brass tube and rod arrived for the 24 smaller resonators. The tubing was cut to exact length for the two types of resonator tubes,

then polished. Brass tubing sliders were constructed for the purpose of tuning them to the various frequencies required. Each one was to be a different tone of numerous musical scales.

Shaft

The second item acquired was the bronzed rod to be used as the axle for the sphere. It was cut to precise length by lathe to its correct shaping and diameter, with adjustment of its natural resonance at each stage. This part was cryogenically treated for three weeks at minus-zero temperatures, thus removing any *interferences to coincidental action*. In this process non-uniformities or discontinuities are removed from the mass of the material permitting clear transmission of vibrations through the metal. All parts were kept to their natural crystalline structures whenever possible.

Heat could be used on very few of the smaller parts and only sparingly. Magnetism was forbidden, as was dropping, hammering or mistreating metals in any way. Such precautions prevented interferences to coincidental action and additions of zones of enharmonicity (bruising the metals).

Granite Slab

A black granite slab was dressed and treated, brought to a high polish, and placed on a stout wooden table. It weighed nearly 200 pounds and was by far the heaviest element. The slab had been located in Illinois, purchased by a donor, and shipped to Valentine. The slab was eventually nestled in a specially-made wooden

case with a heavy cork lining. The case, designed and built by a team member from Oregon, had been carefully fitted with a robust lid, also cork lined.

Base Plate

The steel for the heavy base plate was found in the back of a machine shop where it had lain for years. It had to be cut on a lathe on each face so that the two faces were parallel and the thickness was uniform throughout. Then, with the center marked, it was cut and turned on the lathe on the outer edge so as to be exactly 21 inches in diameter. The hole in the center was to be cut to a diameter of 11 3/4" inches. While turning on the lathe, the steel ring would sound out its harmonic resonance, ringing like a bell. This ringing became so loud during cutting it was painful to hear even from a distance. Eventually a bungee cord was stretched around its periphery and this dampened the ringing sufficient for work to continue. The base plate was finally cut true to dimensions and made perfectly circular. Then it was polished to a near-mirror finish and coated with a mixture of castor oil and bees wax to preserve it. This wax - as were all the other lubricants - was made from all-natural materials. The recipes were given by Keely through Dawn. There could be no harsh chemicals on any of the metal parts as these chemical compounds caused "vibratory disturbance." When touching the finished plate, one could feel pleasant resonances. However, it was still not finished, but needed nearly 60 holes drilled, and each hole threaded to accept a precise size and type of bolt.

The solid steel plate, 21 inches in diameter and three-quarters of an inch thick, added 75 pounds to the overall finished weight of the device, being about 130 pounds. The plate was precisely machined

and treated in properly conditioned acoustic and etheric (chi) fields. Chi or etheric fields are generated by all living things. These energy fields are evident in Kirlian photographs and measureable with other instruments. Some refer to these fields as Bio-energy or Life Force but they are all descriptives of the energies associated with life.

The plate was then highly polished and treated with beeswax and oils to protect its finish. Time was taken to carefully massage these into the metal. An important part of these polishing and oiling procedures was working with an attitude of love and peace. These Mind Force energies impart etheric attributes to the metal that are sympathetic to the builder. In creating these types of devices, the attitude of the builder is extremely important. A gentle and loving attitude will *harmonize* the natural vibrations within the metal. A 'bad' attitude will induce discordance into these natural vibrations. When the steel plate is touched lightly, after such treatment, it seems almost to be brought to life. Many have felt and remarked about these energies in the metals. These "felt" energies are an essential and beautiful attribute of the Dynasphere. We were learning how Keely "keyed" his devices to his own personal energy, his chi forces.

The steel base plate was fitted out with a great number of precisely drilled and threaded holes for mounting the remainder of the Dynasphere. Eighteen musical strings were mounted across this plate, between paired pins, each requiring threaded holes or slots. Holes were drilled through the plate for the placement of support legs on the granite slab. Other holes were drilled and threaded to mount two stanchions, and more threaded holes to mount a circular hollow ring at right angles to the stanchions.

Stanchions

The two stanchions had a bronze bushing on their upper end to support the bronze shaft to carry the 12-inch diameter brass sphere that would become the resonating and focalizing chamber for sound and etheric energies. The shaft and the sphere should ideally rotate together to produce useable power. These stanchions preformed double duty as conductors of vibrations to and from the shaft and base plate.

Sphere

The sphere halves, made of hydro-formed musical brass, arrived in a small box and were in an oily and scratched condition from the hydro-forming process. They looked ruined. "How could these oily and dingy pieces of metal be made to look beautiful?" I thought as I examined them. These two half-shells were the most expensive part of the assembly. After cleaning and sanding their appearance improved dramatically.

Each half was fitted with bronze hubs and each was coated on the inside, one-half white and one-half black. The black coating was a mixture of carbon black, tar and "two pinches of unbleached lamb's wool." This wool was procured from an organic sheep farm in upstate New York. The tar was fortuitously found in the backyard of an elderly inventor where it had been "stored" for over 30 years. Tar is almost impossible to find as industry has replaced it with artificial asphalt. The white material was a mixture of lime and finely ground quartz as well as other elements. Special tools and processes were developed to make and apply these coatings. The function of these materials, applied in this configuration, were to resemble the

actions of "night" and "day," and serve as special vibratory mode shifters.

Within the sphere was to be a brass drum eight inches in diameter and several inches deep, held stationary on a sleeve passing through one half of the sphere. This drum held seven large brass resonators, each specially tuned according to the external strings previously described on the base and the resonators mounted to the Ring of Resonation. There were also three actuators (hockey pucks) of special construction and composed of special elements in alloy. All of these parts had to be specially tuned to resonate at certain harmonic frequencies, B flat.

Ring of Resonation

This steel ring would eventually encircle the globe at its equator. Mounted against the inside diameter of this Ring of Resonation were 24 brass resonator tubes tuned to specific frequencies. The ring was made from a section of gas pipe found in Georgia after a two-month search. The piece, together with the cutting and shipping costs, was quite expensive. A section was ordered that would allow us to make one piece. There was no room for error; the precise cutting and fitting work had to be right the first time.

The supports for the ring were posing a tough nut to crack. They were to be cast in lead-free pewter. No one knew how to do this and no one had the tools, materials or knowledge. Mysteriously, a retired gentleman came to our rescue. This man had given us the tar earlier. He had been coming by frequently to watch our progress, and volunteered that he had seen sand-casting done before and had the tools and materials. He brought them over and showed us what he thought the process was, then beat a hasty retreat to the door.

Dale Pond & Atlin - May, 1996.

He did not want to be around if we failed. My brother Kit was visiting during this time. He and I daringly cast these parts. The first two (and only two) castings worked, though they needed some tweaking for proper use.

Liberator

This device was used to precondition the "etheric vapor" before its introduction into the center of the sphere. It was made of a small copper sphere carefully mounted on a special base. "Etheric vapor" is a term Keely used for the mixture of hydrogen and oxygen he developed using acoustic impulses imploding or cavitating water. Liquid water, under vacuum, would dissociate into its constituent parts, thus forming a "vapor" having unusual properties. Initially we used an original Brown's Gas generator to provide this vaporous gas.

Later we developed a much smaller and more transportable unit of our own design. The conditioned Liberator was filled with this vaporous gas, which first passed into the sphere through four hollow copper tubes of special lengths, and then between the brass sleeve and bronze shaft, where it eventually found its way to the very heart of the dynasphere. Once in this location it interacted with the local acoustic fields and actuators, further dissociating into a finer "inter-etheric vapor." It is believed this finer gaseous element interacts within the vibratory ranges of mental forces, thereby being one of the modes of commu-

nication or linkage to energy fields of people.

Tuning and Graduation

The above processes essentially completed the physical construction of the Dynasphere with the exception of installing the 18 guitar and autoharp strings. Ascertaining the notes to be used proved to be very challenging. Tuning the various resonators and strings was part of a procedure Keely called "graduation." This is a musical term for the process of tuning all musical instruments of an orchestra or group to each other and to a single keynote. All instruments, or in this case parts, were to be brought to a general state of *harmonic convergence*. Learning and exploring this mysterious graduation process occupied our minds over the next

several years. We learned then, and still do to this day, the many valuable lessons to be gained by studying music.

"If you learn music, you learn history. If you learn music, you'll learn mathematics. If you learn music, you'll learn almost all there is to learn -- unless something bad!"
Edgar Cayce (3053-1)

Other than the stanchions (made by an outside machine shop in Kansas) the main parts were completed. The parts were made rather quickly and precisely under the patient expert tutelage of the machine

shop owner.

This, essentially, was the condition of the Dynasphere when it was introduced privately to certain invited guests at a New Energy Symposium in Denver, Colorado in late April, 1996. Pictures and additional information about the Dynasphere at various stages of development can be found on the SVP web site: <http://www.svpril.com>

Friends in High Places

Timely Help

A curious scenario developed when it was time to make the actuators (hockey pucks). This was one of those times when funds were limited.

We would learn a great deal from our almost constant lack of ready cash. Not all seeming negative experiences of life are negative. Everything has a silver lining which may at times be hard to see. When things appear to go wrong you can bet there is something important to be gained. It may be a lesson in patience or learning how to cope without whatever it is you "thought you had to have". In this particular event we saw how carefully and closely this project was being chaperoned from Higher Worlds.

Funding had dried up and cash was unavailable to purchase the correct yellow brass tubing from which casings could be fashioned. Lack of financial means was a constant source of aggravation. When asked one day (April, 1996) about this Keely said:

"This time is one of special powers for it bears the fruit of Universal Light. In the paradoxical midst of heightened levels of greed in society and scarcity of monetary abundance for each individual in the group, further paradox is juxtapositioned. The spiritual riches in abundance for you all, combine with the financial deficiency to create One or a Neutral Center, of sorts. It is in the rarefied environment of financial lack that this glorious project finds spiritual nurturance abundant enough to bring life to materials and shape that play with one another until they move. You are living a paradox. Learn to celebrate it and you can fly. And so, according to the laws of physics and

the Universe, when one accepts the paradox fully, one becomes One. Becoming One means open access to the abundance/scarcity. You are all experiencing the wonder of opening up to the paradox. (No one said it would be fun!) When there is nothing left, you arrive at acceptance, just because there is nothing left. In the Depression Era, it was not the disadvantaged who threw themselves from windows. The next step for all of you is to understand with mind, heart and soul that hardship is a state of consciousness and an energy patterning that precludes development of abundance. Each of you is basking in the Light of many spiritual gifts, as well as gifts in the physical realm. Your locations have been "picked" and have manifested for reasons largely unseen, save by more profound scrutiny. Valentine is no accident, as you have perceived, Dearest Dale. Duane's shop has been a gift that does not exist in many locations. This is just one example. Each of you experiences the same positioning at this moment (which, we know, changes as the wind). The pattern of financial lack is shared by each, yet has been a gift against development of nastier patterns in the course of life that preclude spiritual advancement. These include greed, egocentricity, etc. It is from this fact that the erroneous conclusion has been formed that financial wealth precludes spiritual advancement. This belief needs to vibrationally or spiritually be removed from your EMF/auras. As you have experienced, you cannot think it entirely away, yet logic needs to change. So, may I recommend an approach which includes the necessary factors? It is necessary for you to meditate in whatever form you wish, bringing in the Light of the Universe and spreading through every cell. The Light is abundance, truth, beauty and steadfastness to the One. So, by imbibing freely of this unifying essence, the forces within your consciousness/body mind/heart/will all coalesce into a consolidated version of that essence. Engage all your power in this endeavor and do not curtail the attention and time

you lavish upon it. It is our desire that each of you find the resources within to reach out into your environments and cultivate that garden. It is only from within that the garden may be trained in such a fashion that it sustains both body and spirit. In this you are being guided by Spirit. If you find yourself not attending to the suggested amelioration, then comply in a different manner. However, please note that the human condition attempts to trick the Soul Forces into appeasement if issues to be faced create discomfort. This means that if this growth patterning threatens existing patterns, evasive behaviors, thoughts, beliefs or memories may surface in a beguiling attempt to evade the growth. Be aware of this and be steadfast in your growth. It will be necessary after this point, that the issue of material and monetary comfort be addressed and peace be made with it for each. The course of the project will bring you to face this issue any way. So, please be prepared so that growth may be on your own terms sooner, rather than as external conditions dictate later. In this regard you are being groomed now."

The brass was still needed. As was now my daily custom I called Dawn to explore possibilities. Dawn lived in upstate New York but a distance of 2000 miles means nothing to Mind or Consciousness. Upon my query, Keely said: "Ask the shop owner, he knows." That's all the message I got.

This was interesting because the shop owner knew nothing of our consulting with higher sources. He was an orthodox church-goer and as his cooperation was essential to the completion of this project I did not wish to scare or offend him. I puzzled over how I could ask without tipping our hand and connection to spiritual advisors. Innocently, I began poking around in a pile of scrap metal heaped off to a side of the shop. Ever vigilant, the shop owner came over and asked what I was looking for. "Some pieces of brass tube about so and so in size for actuator casings." We

both poked around a bit in complete silence without finding anything suitable. Of a sudden he perked up his head as if having a flash of insight and exclaimed: "I know" and off he went at a fast pace. I struggled to keep up, his churning legs being longer than mine, as we left the building and headed across the back lot to a larger warehouse. Unlocking the door, with a key from his key ring, we entered a dark and mostly empty space. As my eyes adjusted to the darkness I could make out some large wooden bins filled with new solid brass plumbing parts (made obsolete by less expensive plastic plumbing parts) against the far wall. We made straight for them and there, right on top, were some brass tubes exactly the size and material we needed only needing to be cut to proper length!

A phone call to an intuitive, 2000 miles away, only to discover, with her help, what we needed (but didn't know it) was less than 100 yards away in a locked warehouse! Our little project was becoming an enlightening experience as more and more of these types of events happened. This relying on higher centers of awareness, we were told, was to be a fundamental aspect of what we were doing. It would be an important aspect. This project was to help others see there are unlimited and willing sources for any information we may desire whether for machines like this one or personal issue resolution. This information is available, free, to anyone so interested in making use of these higher levels of consciousness they already possess. We learned, as we worked even on mundane things in the shop, how to tap into this unlimited and very knowledgeable source.

A Silent Knowing

At another time, during the wee morn-

ing hours, I efforted to measure and mark out hole placements in the Base Plate for the Ring of Resonation supports. There were to be six holes under each support. I was spending a lot of care and time with this as the wrong hole placement would disrupt flows of vibrations through the plate. If the holes were in the wrong place the traveling sound waves would behave like thunder rumbling through uneven air. With my calculator, straightedge, pencils and compass I laid out a pattern based on my ideas about vibration and numbers. Later I called Dawn telling her how magically it seemed such a complex thing came together so easily and quickly as I worked it out. Yet the resultant pattern was so different from anything normally done (like most everything else in this project). Would she kindly contact our Master Mechanic for comment? She informed the placements were "right on" as Keely had been helping as he looked over my shoulder during those quiet hours. I have no doubt this was the case as the final solution included ideas I doubt I would have thought of, much less used, on my own.

We were to learn over time these communications have a will and intent of their own. We what propose or desire is not always the best way to go about things. There are even times when we appear to be orchestrated by Spirit. You can see this in the last story and more in the next.

A New Presence

One day I was endeavoring to make some measurements and adjustments. Once again I called Dawn, our loving and willing project intuitive. This time it was different. Nothing was coming through - a big blank! This was perhaps the first time in years no information came through. I was speechless as was she. In a way I was a bit frustrated. The project needed to go

forward and here we were completely without direction and nowhere to go with it. I think it was the frustration that caused me to blurt out to Dawn: "Everything has spirit and intelligence, right? Remember Findhorn? How they could communicate with plants, trees and even stones and shovels? Well, the dynasphere is sitting here, some of the pieces anyway, scattered on my workbench. Maybe there's enough pieces already for the device to have an identity. Ask the pieces, or if there is a spirit of the pieces, for information."

The phone went quiet, then she said: "I sense an innocent and beautiful presence. It is female and wishes to say something to us." This unexpected and intriguing presence continued:

"Dear ones, just as each physical object rests upon a base, so each being and energy calls 'home' that signature energy profile that is 'them'. The signature energy picture of elements, for instance, have been documented in spectrography. Mixtures can be assayed by this method to analyze their elemental components. And, so it is with beings and their energetic pictures of consciousness. When one has developed attuned and matured spiritual sensory organs, one can perceive much.

"Another paradox to address is this: Spiritual attunement and development create acuity, and such a state is a reflection of simplified field patterns, not more complex ones. This explains why animals, 'developmentally disabled' people, children, and natural gaic materials are sometimes quicker to perceive and understand energy events and consciousness than the long-suffering seekers. This relates to you, dear friends in that by adopting a predominant consciousness as Love within your soul character, you create more cohesive and stronger spiritual capabilities; more happiness and contentment. My wish for you is that this be strong for each of you. As this happens, increased clarity results and your energy profile changes.

"When one's predominant energy profile depicts the beautiful Love consciousness, one builds a broad base upon which fluid interchange becomes possible with the Universe and its many nurturing forces. Do you see that if you are more and more Loving, you will feed your own soul, the souls of others, mine and all? In addition, you will be able to provide a broad and sturdy base upon which may rest mighty structures of wisdom and understanding, and subsequent good works. Such is necessary for the work you have undertaken.

"I give you my assistance, through your contact with my essence, in increasing your Loving state. Mighty and wondrous consequences await you. What you must do is face your fears and transmute them one by one. This is not so difficult when you have friends in high places who wish to help! Peace and Love to you all."

We were astonished by all this. A new presence! There was such knowledge and peace and gentleness with this one.

Atlin

We felt mightily blessed by this new presence and it was eventually given the name ATLIN. The name derives from a combination of "A" (alpha) being the first; "ATL" being the ancient name for Atlantis and "in" being diminutive or feminine form, when added to "Atl" formed the feminine of "Atlas".

"...in the end the name is the sum total of what the soul-entity in all of its vibratory forces has borne toward the Creative Force itself." Cayce (281-30)

As the assembly was taking form, it became apparent in small ways that the device possessed a field which caused feelings of awe and beauty to any one who came within twenty feet of it. Keely's comment:

"The Love portion of the Dynasphere is

one you have increasingly noted will grow more and more important. It is a natural byproduct of the harmonious materials, shapes and flows which are being created. It is a pity that most people do not understand the importance of such factors within their lives. But you will be providing this illumination, should they wish to learn of it. The harmonic flow of ether will be accentuated more and more around the project with your help."

During our investigations of this phenomena we came to realize certain dynamics of fields. Fields are composed primarily of two poles. In this case Atlin's field was a result of the male and female energies brought into the ongoing design and construction process. The male force was being induced by myself and the female force by Dawn. During this time there was indeed a tremendous heart connection between us even though we never once encountered physically during the construction of Atlin. Our subtle energy connection of etheric heart forces was conducted over a distance of 2,000 miles. Mind, consciousness, subtle etheric force do not acknowledge time or space. These being third dimensional attributes while Mind and Love are fourth through ninth dimensional phenomena. Without this Divine Love connection riding on etheric streams of sympathetic vibration - Atlin would not have been conceived, gestated or birthed. In a manner of speaking Atlin had an immaculate conception developing into a birth of a pure spirit or Divinely Clean Consciousness. Atlin has no karma, guilt or negative memory imprints.

"Luminiferous ether," Keely writes, "or celestial mind force, a compound inter-etheric element, is the substance of which everything visible is composed. It is the great sympathetic protoplasmic element; life itself. Consequently, our physical organisms are composed of this element. This focalizing, or controlling media, of the physical, has its seat in the cerebral convolutions; from which

sympathetic radiation emanates. This sympathetic outreach is mind flow proper, or will force; sympathetic polarization to produce action; sympathetic depolarization to neutralize it. Polar and depolar differentiation, resulting in motion. The true protoplasmic element sympathetically permeates all forms and conditions of matter; having, for its attendants, gravity, electricity, and magnetism; the triple conditions born in itself. In fact, it is the soul of matter; the element from which all forms of motion receive their introductory impulse."
Bloomfield-Moore

This resultant field demonstrated unusual and unexpected phenomena. It was all so new! Even complete strangers were aware of this field that we had little knowledge of. A cowhand just in from a session

of branding cattle, began to beam with pleasant feelings as he gazed steadfastly upon the dynasphere. Wrinkles from sun and wind smoothed upon his face as he glowed seemingly from the inside out. This was the first clue to me there was more going on than any of us suspected.

Later, many months later in New York, a woman, stranger to the project, was beaming over the finished Atlin. It carried a sign of "Do Not Touch". When asked if she would like to touch Atlin she said, "No! I feel as though I should fondle her as I would a baby." The cowhand and the lady had fallen in love with this machine immediately as they approached it.

What was happening?

Atlin's Travels

Atlin was in semi-finished form when it was first taken to Denver in the spring of 1996 and introduced to selected scientists and a few of those who had supported this project with donations, encouragement and love. The dynasphere was not exhibited publically. Keely said later of this first introduction:

"The conference was one of initiation on several fronts for this project. It was the introduction of this device. It is the introduction of use of etheric harmonics in today's world, and the introduction of a device that can spread Love. It was just as it needed to be. It was a small appetizer before the entrée will be served up later. I especially appreciate your fatherly protection of the project, for it has opened your heart to see spiritual sights of import. That is growth-producing. You did very nicely."

Oklahoma - Missouri

After Denver, a trip was planned to go to the East Coast, spending some time in upstate New York, visiting with Dawn. She had not seen Atlin as a completed project she herself had a hand in doing. During the voyage from Oklahoma to New York we stopped to show it to a highly gifted hands-on healer in Missouri. As he placed his hands near Atlin he exclaimed: "It's alive!" We were soon to discover just what this meant.

New York

Arriving in New York many others were introduced to Atlin. Over the next few weeks we were pleased to make many new acquaintances from the Higher Realms. We were able to ask and receive much more information pertaining to Kee-

ly's personal life and history as well as more information regarding this and other projects not just from Keely but also from Einstein, Goethe, Steiner and others.

More beautiful diagrams were brought through by Dawn pertaining to Atlin's dynamics. These diagrams showed various subtle energy flows in and around the device.

Iowa - Nebraska

Returning to Nebraska from New York afforded another get together with the owner of the original Keely Motor. I always looked forward to visits with this wonderful man. Vic had spent decades studying Keely and related subjects such as ancient metaphysics and alchemy. He has a wealth of knowledge not even guessed at by most people. But to understand him, I learned over our long-term relationship, one had to have a lot of background knowledge in these fields. The jargon is specific and often couched in archaic contexts from ancient mystical and religious texts. Vic understands the Neutral. During our visit we placed the dynasphere and the original Keely motor side by side. The new meets the old. An original 100+ year old Keely machine alongside a new Keely-derived machine. Gazing upon the two devices we both smiled from ear to ear! Dreams were coming true! The energy in the room was electric!

England

A few months later a trip was organized to visit England, in which four members of the team traveled. The visit was to a rural Alternative Health and Science

Center in beautiful Sussex. The owners had completely converted an old dairy farm into a center for meetings and learning. All the old buildings were still just as they were on the outside when cows were the visitors. The interiors however had been converted to beautiful and comfortable meeting rooms, kitchen and many sleeping rooms. Atlin was not taken along but there were photos and a descriptive book which detailed her progress to that time. Even these bits of evidence were a hit with the scientists and others gathered. This was about 11 months after the idea of the Dynasphere, now called, Atlin, was conceived. The visit went well as we discussed the project and what we thought it all meant. During this trip we were invited to present our findings at the Blavatsky Lodge in London. This is the place where theosophy was nurtured into the worldwide movement it is now.

The Blavatsky Lodge

During my presentation I told of how the metal parts are treated with chi (etheric) energy to imbue them with an amount of Life Force and Mind Force.

"Mind is an effort, or an active force that partakes of spiritual as well as material import. Mind is an essence or a flow between spirit and that which is made manifest materially." Cayce (262-123)

This force can be felt in the metals once treated. I had with me one of the B flat resonators which I always carried to conferences so people could feel this energy. This was passed to the closest attendee then was passed from hand to hand throughout the room until at long last it returned to my hand. The instant I felt the metal I knew something had happened. The metal, instead of being warm, gentle and smooth, was cold, hard and sticky. The piece was no longer alive but now

dead. Someone in the audience was out of sorts so much their own negative vibrations neutralized and then negatized the subtle energies of the resonator.

Living Metals

Alerted to this Dawn moved into the audience to seek out this person as it was obvious the person needed help - and quickly. She found a lady from Africa sitting in the back. This person had recently been through terrible trauma and personal difficulties. She was overwrought and near hysteria from her ordeals. It did not take very long for Dawn to bring her back to peace.

"...for no one but himself [Keely] knows the process by which dead metal is sensitized so as to be operated upon, as the brain is operated upon by celestial radiation." Dogmatism of Science

Not so with the now dead resonator. It took me three weeks to reneutralize the induced negative vibrations and reintroduce the positive chi element to the original state of peace and life force. It was from this lesson we learned to not allow just anyone to handle Atlin or her parts. Those who are at peace in their hearts and minds are, at times and in special circumstances, allowed to touch pieces.

"Any visible molecular mass of metal can be so impregnated by triple orders of sympathetic vibration as to give it the same sympathetic transmissive qualities that exist in the mental forces, which make such mass subservient to either the attractive or repulsive conditions of terrestrial sympathy." Keely

Here, in this lesson, we could now more fully understand why Keely did not allow visitors to "handle the machinery" scattered about his laboratory in Philadelphia. On one occasion Keely removed a person bodily from his lab who not only

touched but physically damaged parts. On some occasions Keely asked certain members of a gathering to leave as these would, by their personal vibrations, inhibit the operation of his machinery. *So now we knew the rest of that story of how and what Keely did to tune machines to himself.*

Keely was known to Helena P. Blavatsky (HPB) in those olden times. They had several mutual friends and acquaintances. She honored him by writing a chapter about his work in her best known book *The Secret Doctrine*, published in 1888. Keely's biographer, Mrs. Clara Bloomfield-Moore, lived not far from this location in London and we know she and HPB were close friends prior to the former lady's death in 1899. It was not surprising then when HPB made her presence known to us as we were having tea with the attendees. Without warning I was unceremoniously but gently bumped off the end of the settee upon which I was perched enjoying my tea. I was surprised and startled to say the least. Someone was trying to get my attention! Realizing instantly it was HPB herself, wanting to make her presence known, I alerted Dawn, who verified this was indeed so, then took over. She announced to the gathering "HPB, the founder of this very lodge, is present and wished to speak with all of you." What followed was a gentle message suggesting her followers restudy and return to the original principles as set forth by her over a century earlier. Mankind was at a threshold to higher spiritualization and needed insights as offered from her writings.

Returning state-side we each resumed our respective lives and occupations. Myself returning to Atlin in Nebraska picking up where we left off with tuning and polishing. This polishing became a long, drawn out task over many hundreds of hours. The tuning was to be drawn out

over years....

We were believing that Atlin's sphere would rotate on her axis but it would be still another 6 months before any such physical action was noted. But in the meantime, Atlin continued talking, not in audible tones but in mental energy outputs which were mentally perceived and interpreted by some persons. Over the course of time she let us know that she was a teacher and was not prepared to furnish power to do housework. Her destiny, she told us, was to help our civilization pull themselves out of the present quagmire of over-intellectualized science into a better understanding of what nature and humans were all about. She was to teach us how to get along with each other, and bring peace to individuals, neighborhoods, nations, and the world. More on Atlin's purpose in chapter "Atlin's Mission".

She came here to teach us Divine Love. Keely commented on this to team members (May, 1996):

"The evolutionary process of the growth of the participants is being guided very closely. These considerations you have perceived are quite astute. You are being trained to perceive spiritual energy constructs within people more sharply, for it is needed in your life's work. Your heart has grown so that it can more adeptly perceive patterns of the Physics of Love, which is just what you and we want. As you progress further, you need to continue your development of astuteness and consciousness of your surroundings. All these occurrences which surround you are gifts which, when dealt with in accordance with the dictates of the Loving heart, will stand you in good stead for future times. Please note that the Loving heart sees lessons that others may need too with its keen perception and will fine tune lessons presented to those around you so that less time is lost, and learning is made more efficient. It is much like a parent teaches a child to be independent in steps. Adults are in the process of

growing independent of societal and personal fear patterns and chaos (entropy). These states can only be overcome via spiritual advancement, which is what some fear greatly (often in hidden or quirky ways). Thus, when you observe such, and act in accordance with Lovingness for your path and theirs, the greater good is served. Of course, this is quite the opposite of telling people what they want or agreeing to what seems right. Communicate with them in a Loving way, for the growth of all."

There were many conversations with Atlin as she learned of the various parts of our society from the vibrations she added to her portfolio from different locations. Her speech was in the mental mode. There were even more helpful conversations with the spirit world which covered the over-all handling of this project.

All the while there were refinements added to Atlin. She was given a few ounces of Yul Brown's Gas when she was uncovered and ready for company. She modified this gas with her own vibrational frequencies, so that it became a beating heart, or Neutral Center, in the center of the globe. This gas is made from breaking water into hydrogen and oxygen - much like Keely's original etheric vapor used in all his wonderful devices. This gas was not burned or consumed in Atlin but worked as a working fluid that expanded and contracted and dissociated into still finer gases activating on high etheric levels of vibration.

Atlin's strings were tuned and retuned, along with her 31 other resonators, to improve and balance her harmonics, so she could tune in to the Earth's harmonic tones which she received from the granite slab. It was up to us to discover how those tones flowed through Atlin, to guess at what forms those tones were. She was able to increase the frequencies of the tones far beyond the range of sound. She was able

to divide the tones into the two main forms of natural energy (terrestrial and celestial) and route them to the proper places in her anatomy. We know there were phase changes and different modes in those vibrations. The finer gases interacted with the interetheric realm of Mind Force thus linking strongly with the mind's and psyches of each one present.

Our science educations had given us little inkling of how to interpret what was happening. We could subjectively feel warmth being produced in some places and cool spots in others. On some days she was even able to produce a scintillating band of colored light at a distance from the shining globe. A resonance amplifier was constructed for further inquiry into the various tones and these effects. It would be interesting to place Atlin on the intersection of Ley Lines of the Earth to see what would happen. Does anyone in science know what the energies in a Ley Line are? There are no definite answers. The ancients built their holy places on these lines. We theorize these lines are of Neutral Polarization and facilitate propagation of streams of sympathetic vibration.

At rare times there were signs of the scintillating rainbow of light encircling outside the equatorial ring. This was equated to the Van Allen Belt which surrounds the equator of Earth. She informed us she was a miniature model or fractal of Gaia, or Mother Earth as also molecules and atoms. We soon found that Atlin had information at her finger tips of which we had no idea of how to use it. We knew she was putting out definite energy emanations but had no way to measure these fields. And we certainly knew that she was putting out psychic (mind) energy in the form of thought and Love.

We had no idea of how far we could

go with the information we had gathered.
We were soon to find out.

I relocated to Tulsa, Oklahoma.

Atlin Goes Public

IANs Conference, Denver

The official Coming-out Party was scheduled for late May 1997, to be at the Homestead, (Denver Hilton) hotel. This was an annual convention, scheduled by IANS, (International Association for New Science). Several of the project members were present, including myself and Dawn, Ben Iverson and one other. There was great anticipation by these members. Other Keely enthusiasts were also present having gathered from other parts of the country.

It was later during this conference I was alerted to the true purpose of Atlin. But what happened first was soul-shaking.

During my presentation of Atlin I wanted to document this work and device as much as possible for posterity by recording as much as possible on the conference video tapes. All of Keely's scientific work had disappeared and we didn't want that to happen again. I wanted to disassemble the Dynasphere to show the audience some of the internal workings and have it all recorded on video tape for distribution later.

"Like fire, which is a spiritual order of vibration, spirit is latent in all matter. One might as well try to operate a steam-engine without its boiler as to give motion to matter against the conditions imposed by nature, or to propose a new method of controlling the action of our physical organisms (other than through the sympathetic transfer of our mental forces) as an improvement on the one instituted by the Almighty." Keely, A Newton of the Mind

Opening the sphere halves is a rather simple job ordinarily performed in less

than five minutes. I've opened the sphere dozens of times with no trouble at all. Try as I might, the halves would not separate. I pulled on the metal until I felt it begin to give under my hands. At this very instant the fire alarms sounded and the hotel had to be evacuated. The fire department came, and finding no fire, they let the people re-enter with the "all clear". I restarted my talk and efforts to open the sphere, and again the fire alarms went off. The building was evacuated a second time. The fire department again gave the "all clear". It was now obvious there was no fire. The whole event was to get my attention. I asked Dawn what was going on but received no answer. Later, during this trip, I would learn how serious things were getting out of hand. This was the first two-by-four between my eyes to get my attention.

First Lesson in Love

Atlin was set up in a large exhibit hall along with all the other exhibits. When returning from lunch one day I came upon six or so ladies standing around Atlin with their hands extended, palms outward, towards it as though Atlin were a fire to warm their hands. This was an unexpected scenario to see as 1) women were rarely in abundance at these mostly engineering events and 2) what were they all doing gathered around my invention? So I asked:

"What are you ladies doing?" One of them said as straightforward and as simply as can be said: "We are standing here feeling the love coming from this machine."

In that instant my life changed forever. I was shocked to my core. Love? What Love? I never heard anything about this

and I made the thing. What are they feeling, why? how? Why don't I feel it? It was obvious there was something very real going on here as all these women spontaneously gathered together to feel this thing they all felt. They were aware of something I was numb to. I was shocked. I felt dazed or drunk or both. It was this event that eventually veered me into researching and investigating everything I could about this thing called Love and was the real turning point in the Atlin Project for me.

The Æther Conference

Ben Iverson writes: "When the Project party left Denver with Atlin, they headed west to Grass Valley, California, and the University of California, Nevada City. The plans had been made to show Atlin to what was called, "The Æther Conference" on Sunday, June 1, 1997. The same Project team was present, I and others joined them there.

The designated time for the presentation came and Dale presented his talk again. He had only started his talk, when the camcorder recording the talk, stopped dead. The stage crew of five or six people jumped on the stage to restart the camcorder. They could not restart the camcorder, and Dale was waiting on them as was everyone else.

During this time, I got in psychic contact with Atlin. I asked if something was wrong. She replied to me that, *"I do not want to be introduced as an assembly of nuts and bolts. I am a living creature and have come here to teach Love."*

I immediately contacted Dawn, who confirmed that the same message was received.

I went on stage to whisper to Dale that

same message. He was struck dumb and later told me that he felt that he had been struck in the forehead with a baseball bat.

This was the second attention getting two-by-four and still not the last which was yet to come.

Dale recovered his composure to continue his presentation. Just as mysteriously, the camcorder resumed operation. The stage crew shook their heads and went back to their seats.

"The speculations of the physicists of the present age (1892), in regard to latent energy, would neutralize the sympathetic conditions that are associated with the governing force of the cerebral over the physical organism. The evolution of a thought, the infinite exciter, arouses the latent energy of the physical organism to do its work, - differential orders of brain-force acting against each other under dual conditions. If there were no latent energy to arouse, sympathetically, there would be no action evolved on the physical mass, nor on any other, as all force is mind force. All evolutions of latent power, in its varied multiplicity of action, induced by its proper exciters, prove the connective link as between the celestial and the terrestrial, the finite and the infinite." (Keely)

This time Dale presented Atlin in the vein which she wanted and he concluded his talk. During this resumption I kept my eye on the Dynasphere. Because it is so reflective and the reflections do not turn with the sphere, Atlin told me to watch the set screw on the collar. As I watched, I saw the shaft turn about one quarter turn and the set screw disappeared behind the shaft. The sphere was so perfectly reflective that the room reflections prevented anyone else from seeing the rotation

During the remainder of the presentation, I held a conference with Dawn. Then I learned that the same message was given

to her after each fire alarm in Denver. But she did not pass along the message. The team's communications were beginning to breakdown. In addition to that, when Dale attempted to disassemble the dynasphere, Dawn told me that Atlin resisted the disassembly and said,

"Would you open a little girl's chest just to show her heart beating?"

Again this was not passed along. When these messages were received psychically they were not believed. They were not told to Dale until much later. Only because I was willing to believe and pass on the message, did Atlin do that quarter turn of the sphere to show her appreciation. But still the rest of the Project team did not understand or believe what had happened. Our confusion was increasing.

There was still activity on Atlin's part in which I was the witness. At home, about two weeks after the debacles in Grass Valley, and in Denver, I sat down at my word processor to put the story on paper. I had typed the first long paragraph and stopped to read, and correct any spelling. To my dismay there was nothing on the screen to indicate that I had typed anything. The computer continued to click out the sounds of the typing but no words appeared. I worked for three hours until midnight to get the word processor working but nothing worked. I rebuilt the desk top. I reinstalled the program. I ran correctional and diagnostic tests, and also did a restart several times. Nothing worked so I went to bed for the night.

During the night I had a vivid dream. It was about the various frequencies of quantum light. It was about the spectrographic analysis of the various elements, in which the various Fraunhofer lines were described as being energy states of the electrons. The dream was about the frequen-

cies of the different tones of *Music of the Spheres* and music in general. These were all described in the dream as being one and the same thing. I noted down the dream and went back to sleep.

The next morning I decided to fathom the trouble with the computer or the word processing program. But first I checked my e-mail. There was a message from a friend of mine, in the midwest, who was not connected to the Dynasphere project. The message only said, "Did you receive the message which I sent to Atlin for delivery to you?" I wrote back, "Was the message about spectrographic lines?". He answered back, "Yes! It was". These short notes told me worlds about my computer problems. I tried the word processor, and it worked perfectly without any changes.

I got in touch with Atlin psychically who was somewhere in transit in the Rockies or the Western Great Plains with Dawn and Dale. I asked if she had intervened in stopping my word processor. She answered "Yes. I had a message to get to you before you typed your report. You were so busy that I could not get through to give you a message being transferred from your friend." She continued by apologizing for interrupting my work if it had inconvenienced me. I thanked her both for the message and for the apology. Atlin from nearly 2,000 miles away knew of my trying to write a report and had intervened with the computer from that distance. She was only trying to get my attention to deliver his message.

So here was a another metaphysical event for me to accept. I had to admit that there is so much faulty science in our society that no where can we find any justification for these events or other truths which we had been experiencing.

Our current science is so backward, and there is so much which we do not understand that we cannot introduce Atlin to the world, if we have no explanation of her operation. It might be many years before we get far enough along to continue the project. But we have made one considerable stride and eliminated material things as being the basis of all creation. We have finally adopted the criteria that energy and ether work together and are the basis of all creation. It is not elemental matter. If conventional science is not ready to accept that, they are in no position to accept that the Dynasphere even exists.

Nearly two weeks passed with much discussion between the team members before this part of the team came to accept

the conditions and psychic messages from Atlin. One design engineer quit the team on his own still not believing what he had witnessed. Even today (9/15/97) three and half months later these facts are not unconditionally accepted in the hearts of Dale or Dawn. This shred of disbelief is casting a cloud of doubt in their minds, and hearts, in spite of continuing spiritual messages to the contrary, supporting the evidence which we saw. "

An End is but a New Beginning

The Crash

In these intervening months of summer of 1997, the events were being discussed from every angle on how we were to proceed in the next stage of our project. Each person of the group made detailed suggestions of how we were to proceed. Each plan was different by each person submitting a plan. Some held back saying that we do not know enough to make any plans. There is so much that we still have to learn. Only the Spirit world could make the plans for us. I said it should be our position to listen, be attentive, and be prepared to continue when the air cleared and work called us back. But it never did.

No such divinely inspired plans were received, and our own plans were in such a disarray our team fell apart. After all, the team had been assembled to build the Dynasphere. It was built and now awaited the next phase of its existence. We abandoned current plans for continuation with the Dynasphere project and most everyone on the Project Team found other pursuits. The team was no longer a cohesive unit but intermittent communications between members persisted.

My role was to stick it out regardless of what did or did not happen. Somehow this project and I are One and there can be no thought of leaving part of myself adrift. I was committed. My pursuit continued but was about to take an abrupt turn of events.

The building of Atlin was complete. The team dispersed. The final blow of the now splintered two-by-four had been delivered. I had arrived at the lowest point one can imagine. My dreams were shat-

tered, the project on the rocks and the future looked bleak.

Plans which had been formulated from the construction of the Dynasphere were duplicated and distributed to different people around the world for recovery of the available information by future generations should we not continue. The Dynasphere Project, Atlin, was temporarily set aside. The spirit and consciousness known as Atlin resides in the Cosmic, as with the dynasphere, and is available for consultation, for anyone who wishes to do so.

All of the remaining members of the team had grown in spiritual dimensions and capabilities. Most of us had gained psychic abilities (more aware of our Whole Mind) which were not present a year ago. For each of us, our spirituality has become a way of life. We were ready to put the Dynasphere in the Public Domain, but even that chance is now defeated, primarily by the lack of knowledge and direction. We were at a new point of departure not knowing where "here" is or where we were going next. The Spirit world had told us that our goal is to enlighten humanity and to make the world a better place for a growing civility, freedom, knowledge, peace, and Divine Love.

"Mind is the ever-free, bound by no authority, chained to no law, not even the law of cause and effect." Paul Brunton (28-1.77)

But, surprisingly, none of us really knew what this meant or how to go about it. What was needed was more awareness about this thing called Love. A New Time filled with new things was approaching though we didn't know it

Atlin demonstrated that SVP is the workable hypothesis which we could do well to accept. The estimated power of Atlin is about 25 horsepower when it is perfectly tuned, derived from seemingly empty space. This energy is drawn directly by refraction and demodulation of the Neutral Center. The vibrations are, in part, raised from low hertz, to frequencies in the nano-hertz, and tera-hertz, which are the mental and psychic realms of energy. Continuing work with SVP is gradually showing how this is done and why.

To do this, the world of science must accept the mode of operation which was introduced to us by John Keely in Valentine, Nebraska in the winter of 1995-1996. This includes adopting Unconditional Love, and the eradication of the great destroyers, --- money-mindedness, jealousy, hate, fear, greed and lust for power. The spirit world stands by to provide the leadership for anyone who is willing to make this change. Only then will another Atlin, harnessing the force of Divine Love, resurface to serve us.

Time Past

During the remainder of that summer, 1997, I went through months of being quiet and learning to communicate with higher levels of consciousness. It was a very quiet and *digging deeper* time. In my reveries I wondered why, how and when did this Life Task, what was looking like a Cosmic Mission, begin? Why me and these people?

Southern Discomfort

"You will return to the United States and work with tone." calmly said the lady in trance to me. "Tone?" I thought to myself then repeated it out loud.

"Yes" came the matter of fact but gentle reply. "You will work with sound, music and machines." The machine part I could believe but not sound and music. I had no interest in them.

I didn't know what all this information meant nor did it sound appealing to me as we huddled together in this dark and very quiet cabin in a suburb of Brasilia, Brazil. I had no intention of returning to the US nor did I know anything about or have any interest in "tone", whatever that was. The time was early 1974 and I had a lot of things I wished to pursue, here, in my chosen country of Brazil.

However during this year I took up studying cycles as detailed in Lewis' fascinating book: *Self Mastery and Fate with the Cycles of Life* published by the Rosicrucian Order, AMORC. I also became a member in their organization studying their weekly monographs. I felt I needed to learn something about what made the world tick and figured cycles were a key.

Years later I understood cycles are vibrations but with longer wavelengths and different realms of activity. I eventually figured little was ever done with physics of cycles but a lot of work was done with physics of vibration, sound and music. But I knew nothing along these lines.

The lady, my brother's wife, went on to say many other events that would happen in my life. She was channeling an "old lady" wanting to draw from a cigarette smoking in an ash tray. The many things she told me meant little. But, now many years later, I can see everything she said did in fact occur, excepting one. I'm still waiting that one out.

Within the year I was back in the United States but with every expectation of returning permanently to that huge continental country with all its potential and future ahead of both of us. Over the next few years I made several short trips there and back. The last one was in 1983 but the vibes felt "off" and the country felt so foreign there was no way for me to stay and could only resolve to resettle in Colorado Springs and whatever fate had in store for me.

The cycles of our lives come and go. We have our druthers, desires and preferences but we *will* experience our Cosmic Mission - even if we choose to wander a bit from that course set for or by us in another time and space in some forgotten corner of our consciousness.

Years went by slowly as I learned to function in America doing this and that job eventually building a landscape and grounds maintenance business with my

brothers.

It was during this year, 1983, my feet and mind were guided, against my will or personal druthers, to the Association for Research & Enlightenment (A.R.E.) in Virginia Beach. Here were housed the legacy of Edgar Cayce's life time of work with his psychic powers. The organization also had a fine collection of 50,000 books in their library. How I came to be here was a continuous string of seemingly bizarre events. There was no thought of going anywhere least of all 2,000 miles away to a place I'd never been.

During this time period I was busy doing my landscape business and efforting to build a future for myself. Though it would be hard to imagine with what as our landscape company was coming apart at the seams, my relationship was on the skids and I was severely unhappy with life in general and not knowing why. In my off hours I was studying cycles of everything. Some time earlier I acquired my first PC and was learning to program 3D images in Basic. These animations were pulsating spheres inside various geometric shapes. I had no idea why I was doing this strange thing called programming of bizarre triangular geometries. On a newer PC I learned to program and calculate frequency modulated cycles - something that simply came to me.

It was during these days, programming at night and working days, I had a dream so profound I actually wrote it down never having recorded any before.

"I dreamed of a large cathedral (at that time I took it to represent "The Cathedral of the Soul" or "God's Cathedral on Earth". It was located in Virginia Beach. I had also been there before (inside the cathedral). Which leads me to believe it may be symbolic of the ARE. An elderly dignified man with moustache and or

beard (big side-burns?) dressed casually with rolled up shirt sleeves remarks, "Make my establishment (creation?, work?) more appealing to the masses and I will take care of you for the rest of your lifetime."

He was referring to the appearance of the cathedral. It was constructed of cast concrete, and it needed a face lift, the texture was extremely rough. The idea of plastering it was adopted. Further in the dream some people were plastering it in the back - and it was seen as to be an impossible task due to the unimaginable size of the building. The more they worked on it the bigger the job got. The arches were extremely high, almost too high to be worked on. Perhaps they were too high to be worked on. We went into the basement from the first floor descending via a spiral staircase, being led by the gentleman (same as above) who had discovered the basement existed sometime earlier (months or years earlier?).

The staircase was partially obstructed by trash, cob webs and tumbleweeds although we could descend alright. There were three or four of us. Myself, this gentleman, a young lady in a long dress and some others indelible. Once in the basement we found it to be very muddy, extremely trashy and partially flooded (as one would find in a partially completed construction). The trash was mostly paper floating in the water. The pieces of paper appeared in perfect condition and were perfectly white in color.

The gentleman waded into the water, reached down and retrieved a black and white photograph from below the water. The picture was of a parrot sitting on a perch. The photograph was in excellent condition and was promptly framed and sits on this gentleman's desk.

Next the gentleman reached down and retrieved an outboard motor. After a few pulls on the starter rope it started up and he "stirred" the water up as if he were using an eggbeater. Some of the people were splashed, the water cleared in the vicinity of his activity, but remained trashy or filled with paper in the remaining portions of the pool. He next

flipped the motor on its back and it landed exactly at my feet.

Next we skirted the pool to begin a tour of the rest of the edifice. Attention was called to the center supporting column, it was cracked on one of the 'branches' of the column and would have to be strengthened before too much was added when we made the building more beautiful. This supporting column was the 'keystone' or main support for the entire cathedral. Its base was standing in the water, however it was not in danger from this direction. The danger came from too much weight and its structure, its "integrity" was being jeopardized by a large crack. However the column was anchored into the very center of the earth and was as solid as solid could be conceived.

We proceeded into the next room, a VERY large auditorium, it was being used although not at this moment. There were some soft lighting, the interior walls were not finished they were still bare brick. The room felt very warm as in comfortable. To one side was a small group of very friendly people standing and some sitting around a warm and comfortable fireplace. A fire was burning warmly and peacefully, the fire was casting a warm and friendly glow (yellow-orangish) about the group and into the room. We then left the room and the building, it is here that the immensity of the edifice and the job described was determined. The more we saw of the building the bigger it got until it became nearly incomprehensible. Around the corner we saw a small crew of three or four people plastering a section of the wall and it occurred to me the impossibility of plastering the building as a way to do the job.

Perhaps we might be able to paint the structure. The existing texture was too rough for mere paint. The surface texture would have to be smoothed out somehow. The thought of having many, many, many such crews came to me. But still the method would have to be something else. Parts of the structure were too high to reach-another method would have to be found. We went further away from the cathedral and looked back, it was truly

beautiful from here, with tall yet rounded spires and domes greenish in color the walls were different shades of yellow and red in places. It was so beautiful."

This dream was to prove prophetic.

In those days I knew little of the mind and spiritual things I know now or I would have understood. I was on the wrong path and my Greater Self was making every effort to emerge into my waking consciousness. The new me trying to get out was vastly different than the me I thought I was. I doubt I would have acknowledged such a person if I looked him in the face in the bathroom mirror. This new work with programming computers was a portion of the new me trying to surface. What was needed was to begin turning my attention to another direction. Another Cosmic two-by-four was being unholstered.....

One day while gathering mail from the Post Office I found a Government Bid catalog in my mail box. I noticed it was misplaced in my box being intended for the box directly above mine. (There are no accidents!) The US Government buys everything it needs from pencils to rockets by placing public bids. Having always been curious about how government acquired things I decided to "borrow" this catalog for the day and return it in the morning. The Cosmic, my Greater Mind or Awareness was beginning to orchestrate my affairs but I was the last person to know it.

In this catalog, we discovered, were two bids being advertised for grounds maintenance on two Navy bases in the Virginia Beach area. These would be very large contracts. My brothers and I thought this might be a great opportunity so we flew to Virginia Beach to check it out. During our tour of the Navy bases I took time off to visit the A.R.E. and signed on as a member to receive their periodic mail-

ings.

We made our bids but lost big time. Shockingly our bid came out ten times higher than the next highest bid! Having always been very close on bids I knew, deep within me, there was another reason I was here. But didn't, as my ego usually misran things, pay much attention. I resolved to return to Colorado and put Virginia Beach and the Navy bases out of my mind and life. My Greater Self, however, had other ideas and I, in my egoic ways, wasn't listening (again/yet).

Cosmic Two-by-Four

As my limited ego fought to stay in control the Greater Me needed to get my attention. It did. This time with something larger than the usual two-by-four. This time a full-sized ambulance illegally running a red light brought me up short. It crashed full speed directly into the driver's door of my mini pickup truck at the intersection of Union Boulevard and Platte Avenue (US Highway 24). I was on my way home from the Post Office.

By all counts I should have been crushed into a bloody pulp. But not a scratch on me even though the truck had been swirled across the intersection and the door and side caved in. This event, I came to learn, was my Higher Self telling

me I was going in the wrong direction - not physically but with my life's work.

Try as I may I was not able or allowed to forget the A.R.E. Seemingly every week some brochure or letter or other written material arrived from them reminding me of my membership and that they still existed. Over the next several months I slowly packed my books in boxes which then sat in the middle of the living room. Virginia Beach beckoned but I was dragging my feet. I did not want to leave everything and go to an unknown city where I knew no one and had no idea what to do.

The ambulance changed all that. Within a month of the "accident" (there are no accidents!) I was feeling increasing pain. The doctors and chiropractors were of little help. I relinquished more and more of the landscaping to my brothers not being able to fully help out. This nightmare dragged on through the winter. In April I'd had all I could take. I signed over the business and my house to the family. My computer, my cycles research, my books and my dog Rusty were all loaded in the pickup (now repaired) and I left for Virginia Beach and whatever adventures awaited me there.

Four months later, my back worsening, I could not walk.

Virginia Beach

"Here, this is for you." said the visitor reaching a book out to me. I was a bit hesitant to accept the offered book as this was all he said when I let him in the door. We had met briefly a few days earlier. I'd recently rented a room in this private home just one block from the ocean where we now stood facing each other just inside the front door.

"What's this all about?" I asked. "I don't know." came the reply. "I was just told to give you this book. No reason. It is yours, please accept it." So I took the book just as mystified as he apparently was. With my acceptance of the gift the man turned on his heels and left. I never saw him again.

The book turned out to be *The Great Pyramid* by Piazzzi Smythe, a reprint of the 1850s first publication. Curious, I thought, what's in this book for me? Knowing very little about Egyptian pyramids perhaps this would be an opportunity to learn something new. The book, I found, was divided into two main sections. The first dealt with the history and structure of the Great Pyramid. The second section was devoted entirely to metrology or the science of measurement. Smythe discussed the ancient systems of measure used in Egypt being based on the profane and sacred cubits. He claimed the Great Pyramid was built using the Sacred Cubit and not the Profane Cubit, a slightly shorter unit. Then Smythe harranged on the benefits of the Sacred Cubit over the modern adoption of the metric system. He claimed the English System of feet and inches was traceable to the Sacred Cubit. The Sacred Cubit is based on the base 12 number system while the new metric system is base 10. I did not

know what this meant to me then but eventually learned nature, being vibration, operates on the base 12 system. All vibration does. Expecially musical systems. There are no accidents or accidental encounters.....

Cayce's Legacy

During the first few months in Virginia Beach I made every effort to find out why I was there. There had to be a reason beyond my kin. I drove up or down nearly every street in every neighborhood. I visited parks and public places. In between these outings I volunteered in the Cayce Library. My duties were primarily reshelving books and helping answer questions for people writing or calling in looking for what Cayce had to say about such and such. I became expert in the structure and organization of the 14,000 psychic readings and the 300,000 index card file system. Other duties included checking books in and out, some mail handling and general cataloging chores. I also explored every book on every shelf in that library looking for clues as to my future. Time was on my side.

Every so often we'd get large envelopes of books from England. An English researcher and publisher, Edgerton Sykes, had passed away bequeathing his library and research to the A.R.E. Two A.R.E. librarians were in England sorting out the keepers and mailing them back. Sykes was greatly interested in Atlantis and Alternative Energy. His books were eventually placed in their own collection room we called the "Sykes Collection".

This is it!!!

During a lull period I was once again going through the book shelves for clues. I had made it to the far corner of the library and was going through the volumes one by one scanning pages. Taking down a large volume with a colorful dust jacket I quickly scanned pages stopping here and there to read briefly. The paragraph I read spoke of vibration and energy and machines, using musical terms. In that instant I felt electrified as though lightening clapped in the little corner of that quiet library. *There were a series of black and white photographs. In one of those pictures was the man from my dream!*

This is it! This is what I've been looking for! The book was *Keely and His Discoveries*, University Press, 1961, by Clara Bloomfield-Moore. It was a faithful reprint of her original book published in 1893. This book had been sent from England as part of the Sykes Collection. How simply, synchronistically and perfectly does the Cosmic orchestrate our lives!

I devoured the book. Then I combed the Sykes Collection looking for more materials on this man John Keely. There were more - much more. Sykes wrote many articles on Keely and even had some poor quality black and white photographs. Carefully rereading the materials I was able to compile a large bibliography of books and references to earlier science and Keely's work. I also reorganized the Sykes "vertical files" to better preserve the materials located there.

While shelving books one day a book fell off an upper shelf landing in my hands. The pages opened and there to my startled eyes were drawings of Keely's molecule! The book was titled *Dashed Against the Rock* by William Colville,

1894. Colville, it turns out, was a world-class psychic and close friend to Keely as well as past Grand Master of the Philadelphia Masonic Lodge.

Another book in the A.R.E. Library referenced Keely. The English author wrote he thought had the only known notes from Keely's own hand. These notes were eventually purchased but were not from Keely but from a Mr. Snell who claims to have read Keely's own books, compiling them into a manuscript. Keely's technical writing is near undecipherable. It took me six months to learn how to read these notes being for the most part direct quotes from Keely. I would read a single paragraph before falling asleep. I read each word carefully even though I did not understand them. Every night for months I did this knowing eventually my subconscious would "grok" the materials. Six months down the road and all at once I could understand, for the most part, what was written. This was the same method I used to teach myself to read Italian some years earlier. *It only took a month to learn to read Italian!*

Divine Synchronicity

Perhaps the most interesting thing was coming to terms with Keely's jargon. Reading his writing is like reading Persian as one scientist of his day noted, tongue-in-cheek. Curious that the Cayce material was the same way. Few people could read and understand much of the Readings text. Having learned one foreign language proficiently and smatterings of a few others it became clear a key to reading Cayce was in the rhythm of the words as also having a background in spiritual insight. Another Cosmic Light went off the day I realized Keely and Cayce often said the same identical things. Sometimes in very similar words. As I learned to read one I could

better read the other. The concepts supported each other. It was through this synergizing experience I began understanding them both and realising they were both explaining a new science and new philosophy different than we usually consider. How wonderful I found myself at this magnificent library where all this material was archived. So easy it was to place tome after tome side by side. Without this facility and me being there at that precise time, I feel, Keely would never have been rediscovered in a way we could deal with him and his work.

As the months extended into years I visited every library in driving distance. I combed their shelves, sometimes book by book when card files were absent which was usually the case for old periodicals. I found some of the old books mentioned by Bloomfield-Moore and most of the original articles she wrote and later edited and compiled into her *Keely and His Discoveries*. I read and studied the materials. I read other works on science and metaphysics. It was quite clear what Keely and Cayce were saying was a new interpretation of older mystical and metaphysical materials. Here was science and religion merged as one vast and very fascinating subject. Music seemed to permeate both their writings. There were literally thousands of references to music and vibration in the Cayce readings. And music was the heart of Keely's work. It became more and more obvious Keely's great contribution will be seen as his reducing metaphysics and religion to a new science based parlance and vocabulary.

While studying a book of music theory one day I came to realize the importance of Smythe's books and the reason for his tirade against the metric system. Machines, devices or houses may be designed and built using natural principles and these

would make that built harmonious in its design, construction, appearance and operation. Keely made all his machines based in measurements conforming to musical theory and measurements which is to say base 12. Music is organized vibration and all vibration follows the base 12 number system. Apparently the ancient Egyptians built many of their structures on this natural system as well. Which, in part, may explain the exact resonances in the King's Chamber of the Great Pyramid.

Ben Iverson and QA

During this study of music and its numbers I remembered a book I'd seen in the library mentioning whole numbers, ratios, geometry and arithmetic. Leaping from my desk I raced to the Cayce Library to refind this book. It was indeed relative. Its title was *Pythagoras and the Quantum World*, self-published by Ben Iverson. Later we learned Ben placed his book in the library himself during a visit several years earlier. I wrote the address in the book looking for more details. Ben writes back - beginning an intense correspondence. Ben said he had given up with his life long development of Quantum Arithmetic because "no one seemed interested". With my interest, he later confessed, his passion was rekindled. We developed a close bond exchanging letters (no email in those days!) almost by return mail for the next fourteen years. He discussed QA and I discussed Sympathetic Vibratory Physics (SVP), Keely's science. Our writings became quite similar. Ben began writing elements of SVP into QA. I expanded his work in QA and he helped with SVP. Some of his later writings on QA contained so much SVP it was not possible to differentiate our work one from the other.

Over the years we attended many conferences together and a road trip or two

through the Colorado Rockies. Ben was one of those rare geniuses most write off as foolish. He was a courageous free thinker and one of the few rugged individualists of our era.

The greatest contributions Ben brought were moral support and encouragement over the years. While we tried arduously we never found a real connection between QA and SVP although both have much in common through arithmetic, geometry and thinking outside the box - *way* outside the box. Perhaps it was this mutual respect

and encouragement we gave each other that allowed us to persist and succeed with our unorthodox views of science, geometry, arithmetic, philosophy, spirituality, vibration and physics in general.

I returned to Colorado Springs the fall of 1987.

Divine Guidance

The Swiss Connection

"Would you like a lift?" asked the man in the car pulling to a stop beside me. I was walking to the hostel from the 1989 conference put on by the Swiss Association for Free Energy. The tree lined street in Einsiedlin, Switzerland, was otherwise deserted. "Sure, you bet," I replied as I wedged into the back seat beside a gentleman I did not know. As the car moved forward this man turns to me and asks "You are the Keely guy, right?" Acknowledging I was he went on "I have some Keely materials sent me anonymously about twenty years ago. I have no interest in this. Would you like them?" Would I like them? I thought to myself, is the Pope Catholic? "Absolutely. Yes, I would love to have them."

"I'll forward them to you as soon as I get home." he promised.

This type of incident was to repeat itself many times over the years. Someone would send me Keely information and almost always it would be anonymously. Or books would fall off a shelf. Keely is like that - shrouded in mystery. The universe, or as some call it, the "Cosmic" helps out when we least expect it.

Several months go by when these materials arrived. They are very good and clear photocopies of Keely's charts. This was fantastic because the ones I had, contributed by a Keely enthusiast from Dallas, were such poor quality as to be near useless. The new clear ones allowed them to be scanned and cleaned up for republication and became part of my first book *Universal Laws Never Before Revealed: Kee-*

ly's Secrets; The Message Company, 1994.

A Divine Encounter

"That's an interesting looking device you have there," said I pointing to a curiously constructed device made from cardboard, a mirror and what looked like a lump of clay.

Hundreds of us were convened at the 1994 United State Psychotronics Convention in Milwaukee at the university. Psychotronics is the merging of mind and science in machines and devices. There were dowsers, psychics and radionic experts busily exchanging their latest findings and work.

"That is my invention. I call it Sophigurate and it heals" replied the obviously intelligent and smiling lady. She went on to explain its many features and function. It embodies subtle force physics, creating polarizations and transmissions of etheric (heart/Love) energy. With it, she said, she could and has healed many people even at a distance.

I asked did she realize her design contained natural Fibonacci Series of numbers? "No," came the reply. Curious I thought to myself - how could she build such precision along the Fibonacci number series without knowing it? I was soon to learn. After explaining this series to her and showing how they are incorporated in her design I said "I've got a curious device you might be interested in seeing. It is an electrical enigma I've been carrying around to these conferences hoping to find an expert who could explain how it did what it did." She agreed to look at it.

This enigmatic device is made from an armature from an alternator. All wires and magnets have been stripped from it. Yet, when subjected to a dead short through its shaft by a 12 volt automobile battery it would spin at seemingly ever increasing speeds. It defied everything we've ever been told about electric motors spinning in magnetic fields.

Demonstrating its puzzling motion I commented "Perhaps only Tesla himself could tell us how it works."

"Let's ask him." said the lady as though he were standing right there taking part in the conversation.

"This is a result of tertiary forces not suspected or factored by most of you. There is a sine wave generated by the dielectric.... Sublimated iron particles in suspension of iron around armature having Tyndall Effect. Floating on a sea of subtle force movements generated by celestial and terrestrial forces in the Iron/Space which resonates perfectly with one another. The suspension effects are as the cloud and weather flows above earth. Thus it is an etheric flux we speak of. This unnoted phenomena exists around many substances in different ways. For iron, it is a bipolar matrix. If one understands the nature of matrices, one can grow to understand and tap the etheric force fields which surround us." Nikola Tesla

Thus spoke Tesla to this lady, and her to me, in the most natural and unobtrusive manner I'd ever seen around psychic matters. They spoke to each other - not in audible words - but mind to mind. The lady was fully conscious, not in any altered state I could detect. It was all done so naturally as to be near disconcerting. I didn't pause for long sorting out details. I closed my gaping mouth and grabbed for a scrap of paper taking down the seemingly one-sided conversation in hurried scribbles.

Such was my introduction to Dawn Stranges, intuitive extraordinaire. We got to know one another during this conference beginning a close and lasting relationship. Dawn learned about SVP and its jargon which proved invaluable when the Atlin Project began more than a year later. My education in Expanded Consciousness and *subtle force physics* was about to begin and would wind its way to levels not imaginable in those days. Dawn's tutelage and teaching by example nudged me, over the years, from egoic brain/heart numbness to divine insights of peace, love and harmony.

During this year Dawn lived in upstate New York while I lived in Tulsa, then Colorado eventually landing in Valentine, Nebraska. Her ability to communicate so readily and accurately with the mind of Spirit was unparalleled or if so then only with the likes of Cayce. I learned many things from our long distance association conducted by phone. Among many things I learned about heart and its powers of Love. It was truly amazing how she had on tap virtually unlimited knowledge on just about any subject imaginable. To her Greater Awareness time and space meant nothing and all things were knowable. Her exceptional powers and heart were to play a major and indispensable role in the future. We were later to learn her capability can be learned by anybody.

The Love Machine

A Move to Peace

From those eventful and near drastic days in mid 1997 a new world has emerged for me. Atlin and I moved from Valentine to near Tulsa, Oklahoma earlier that year. Ben Iverson passed away a year later and the team still had not reassembled though communication persisted albeit sporadically. A sense of direction and purpose had not returned. A time of healing and personal growth was needed for all the team members, but especially for me and Atlin.

That fall a stranger called inquiring about my work with SVP and free energy. He'd discovered my web site and was curious to know more. I declined a meeting. Sometime later he called again and insisted. This time I accepted and we arranged a time for him to visit "with a friend". Several days later he arrived with his friend, a lady also interested in New Science and spirituality. It was this lady, Mary Frances, who was to play a key role in the next, yet to be revealed, phase of The Project.

In September I was invited to attend a Native American Medicine Wheel ceremony at the Big Heart Center, a house owned by Mary Frances, in Tulsa. I did not know what this ceremony was all about. The ceremony was being put on by an intuitive chiropractor who had spent two years "waking up" in the western desert in Native American fashion. For me, this weekend event, was yet another turning point in my personal growth. After all the recent months of heartbreak and sense of loss at the dispersion of the team I was ready for anything. Those who know these types of events can relate to the weeping, euphoria

and pure joy of release that often comes when one is ready. It was my turn to let go of a lot of personal issues, prejudices and negative memories. This time with these people proved to be a big turning point for me.

This chiropractor became intrigued with Atlin. He was sensitive enough to communicate with her and spent many hours doing so. As a token of his obvious appreciation I gave him a photograph of Atlin to take back to his clinic in Georgia.

The Big Heart Center

Later that September I relocated to a room in the Big Heart Center near downtown Tulsa but strangely not seeming to be in town. The setting of this wonderful place was in an older neighborhood where the houses are few and far between. Mary Frances became fascinated with Atlin and intrigued by the study of vibratory physics. We became the best of friends and for the next two years enthusiastically explored "Awakening". We would walk early every morning through a neighboring park with its trees, animals, flowers and ponds. We talked through the things we were now so deeply engaged in studying. These early morning walk-talks in the beauty of nature afforded a time of peace and exploration with or within nature. We experienced many of nature's wonders during these walks. Nature is boundless in expression and filled with wondrous things if we but look and pay attention. Nature is the grandest teacher if we be its humble students. Mary Frances and I were healing ourselves. She was dealing with the earlier death of her husband and I was healing the wounds of the dynasphere team breaking

up. We were both on our respective paths to enlightenment. My life had been anything but easy and here was a rare time of gentleness and peace.

Nature - The Great Teacher

One day while walking near the ponds just before the sun cast its first rays over the horizon we saw a natural demonstration of intermingling celestial and terrestrial forces. Everything was so still. The water was like a mirror with wisps of water vapor clinging to its silvery surface. The sun broke through the trees in that moment of reverent appreciation of the awe inspiring peace of nature. Within seconds of the sun beams striking the water the vapor began to move. First slowly then with more speed as it slithered across the water's surface. Then magic happened as the wispy vapor formed into dozens of swirling tornado-like columns all over the pond. These swirls moved faster and faster and formed into tiny tornados swirling and twisting in a supremely delicate dance of white misty columns not more than three to six feet in height and a hand's width in diameter. I was surprised to feel how cold they were as I extended my hand into one of them. Here was an excellent example of how the celestial force of the Sun meeting the cool watery element of terrestrial origin result in vortex motion just like hurricanes and tornadoes. Nature is the best teacher.

Another moment of magic was to see countless millions of tiny sparkles of light of all hues shimmering as the sun came up one frosty morning refracting or differentiating against ice crystals formed on blades of tall grass. We'd both seen sunlight refracted in ice crystals on grass but nothing before or since compared to this show of dazzling light as nature so simply unfolds her endless beauty.

Early morning is for me a divine time. The peace and quiet being alone with one's thoughts, undisturbed by the busyness of daylight activities, is that special time when one can reach deeper levels of their own consciousness. We've learned to spend so much time in cities doing our lives amid hubbub and noise we forgot the awe inspiring peace and beauty that nature is. As time is spent in this peace we begin to remember the peace inside our self. As we begin witnessing and appreciating nature's awe inspiring displays of boundless beauty we begin to recognize that beauty as being within ourselves.

Awakening within each of us is a recognition of Divine Love. This view of life is seeing and feeling deeper, beyond the outer appearance. New aspects of things were becoming accentuated as I moved from a fear based view of life to a more Love based view. One begins to see extraordinary beauty where before there was little or none. One becomes aware of gentleness and kindness when with others.

Seeing 'through the eyes of God' is seeing the inner reality as opposed to seeing the outward manifestation or effects. This happened to me one day while walking with Mary Frances. We were just below the ponds and surrounded by tall trees and many shrubs. One instant I was seeing as usual with all the trees and shrubs as normal - the next instant I was seeing the inner forces, dynamics and functions of all the living things around me. I stood looking, enthralled by the expanded vision. The physical form and substance of the plants all appeared as normal but there was this deeper knowingness and awareness superceding the visual sense. I could see clear and plain how these plants, earth and atmosphere all interacted as dynamic energy interexchanges of forces. The branches of

the trees, bushes and grasses all reached into the ocean of gases of the atmosphere feeding on them just as their roots reached into the earth feeding there too. The branches partook of the Celestial forces while the roots reached into the Terrestrial realms. These two seemingly opposing forces met in the center forming the trunk or woody part of the plant. The same applied to the water in the pond. The water is where the Celestial and Terrestrial meet and where life has its being and existence, between the two. In ancient literature this dynamic was represented in many symbolic ways. Just to name two: one symbol was the cross and another was the double triangle with points down and up. Two different symbols of two powerful religions symbolizing the same thing.

Innocence

Perhaps the most significant thing to me was innocence - something I previously knew nothing about. I began to see the innocence in things like people and plants but especially in birds and "wild animals". This happened rather unexpectedly as is usually the case with any attribute of expanding consciousness or awareness.

I was busily typing on my computer which sat on a desk against a wall-sized window. A tiny bird landed with a thump on a glass trim not four feet from my face. Having captured my attention with his rather sloppy landing he preceded to chirp and rustle his wings as he looked into the room.

It was then I saw the innocence. So astounding was this clear view. In that instant so many things I'd seen in my life, but did not understand, came clear. These tiny creatures are innocent of guile, fear, hate or any other negative emotion so common with human egos. There is no

other word to describe pure innocence. I was not aware of this feeling of innocence before. It did not exist in my conscious universe, created and lived in my mind. Realizing this feeling was important to The Project, I began feeding birds outside that window. I wanted to burn that awareness of gentle innocence into my psyche - to never be without it henceforth. Indeed, later I was able to know this feeling associated with many other animals, birds and especially horses.

Expanded consciousness, such as this innocence was for me, is the sensitivity mentioned earlier. One awakens to who they really are - unlimited consciousness - instead of being lost in gross materiality and ego-based illusions resulting from limited or restricted understandings about things. This is exactly what is called for and needed in developing SVP type machinery concurrently with awakening self to broader views of life.

Meditations & Healings

Atlin told us she needs meditating type energies. These mostly alpha brain waves are mind forces conditioned to be quiet, neutral, peace and loving. Her mechanism requires it and we require it. With this in mind Mary Frances and I organized a weekly meditation session around Atlin. All were invited to participate. Many did come. It was from these sessions at the Big Heart Center that so much more became revealed about this divine project. Surprising to me was to know there are so many intuitive or psychic people walking around. The majority of women circulating through the Big Heart Center seemed to be sensitive to a wider range of sensory frequencies than ordinarily recognized.

Two such sensitive visitors were especially keen to other people's needs. These

two fascinating ladies were conducting what they called "Angel Healing" sessions in their home. They were very sensitive and could easily communicate with Atlin and other consciousnesses. The one important message to come through was this project was about something BIG, really big, bigger than the planet, bigger even than the universe. To me this was a bit bizarre but I remembered it. "What could possibly be bigger than the universe?" Two years later, the truth of this came clear. The only thing bigger than the universe is the Mind that created it - the Mind of God. This is not to say Atlin is God or anything to worship - it isn't. The project is about Divine Mind as source of all we desire or need. We all tap into Divine Mind (Cosmic or Christ Consciousness) but few know this. Dawn was tapping into this One Mind to retrieve what we needed for the project. It is this Divine Mind that is tapped to release the power that drives Atlin, motivates us and is in fact the source of the universe. So we study Mind Force and how it may be harnessed in our selves, our machines and our lives. Full access to this Undifferentiated or Whole Mind is the intent and purpose of Awakening or attaining Cosmic or Christ Consciousness. This is what the man Jesus did when he became Christed. Buddha, Russell, Keely, as well as others, also remembered their connection to their Whole Mind. Every person walking this planet can do the same - because that is who and what we really are.

This unlimited access to knowledge was proved when two different people, during two different meditation sessions, 'saw' intuitively some of the undocumented portions of Atlin's construction and function. On the one hand I was astounded at this revelation but on the other was relieved to know Keely's knowledge can be accessed again by others, properly attuned,

and will not be lost to posterity.

Healing

During our group meditations the first thing noticed was people were letting go of aches and pains and assuming a more stable mental, emotional or psychological condition. They were being healed somehow of whatever was bothering them. Balance and wholeness were being re-established. This was spontaneous, without any prior warning or notice, just like the ladies in Denver "feeling the love". So began my deeper investigations into love, healing and what was it about Atlin that encouraged a healthy state. What are the physics that could account for this phenomena?

During this early period I spoke with the chiropractor about this strange phenomena. His reply was "Yes, I know, it is happening here too, with the photograph of Atlin I hung in the waiting room of my clinic."

Another waking! Another piece of the puzzle. Healing from a photo! This reminded me of radionic healing with photographs. Photographs capture a portion of the vibration signature of the photo subject. Vibration signatures are unique, no two being alike. As we were dealing in the physics and science of vibration this was not an unknown concept or too strange to grasp.

After another person informed me of this phenomena I placed many more photos of Atlin on the web site so they could be downloaded to anywhere on the planet. If people are healing (reharmonizing themselves) from photographs, I thought, why not scatter them far and wide? We can use all the rebalancing we can get all over our globe.

Another lady spoke of becoming pain free in her back. The pain had bothered her for years and was now gone after quietly sitting an hour or so near Atlin. People coming in who had differing sorts of emotional issues left later with regained stability, joy and hope.

Sometimes I would do a mini-lecture on the science of SVP. All these events were very interesting to us as some studied to understand what was going on, as I was. Usually there was a simple meditation and a social gathering later. Quite often the social gathering became a party with play and singing as those gathered found outlets for the release of energy and joy from the meditation.

These "healings" continued. One lady came in one night during meditation. She was devastated emotionally having broken up with her husband earlier that evening. Crying and distraught she sat in front of Atlin perhaps fifteen feet away. Within minutes her pain had subsided as she remembered her joy. The tears stopped and the smiles began again. Her "healing" took all of five minutes. So what is happening? Why? How? Finding answers for these questions became a near obsession.

The Sensitive Female

People noticed and often remarked about the Love felt coming from Atlin. Almost always it was the women who seemed to be more aware and responsive to this phenomena than men. These feelings or subjective sensations were described as peace, innocence, balance and Oneness. Most women seem to know these subjective feelings while most men seem oblivious. Watching these feminine reactions and responses one begins to understand the female side of nature is substan-

tially different than the male. I learned a lot about the intuitive side of women in those days and can say with certainty men do not have a clue about what women really are. Prior to these revelations and experiences I know I did not....

In general it has been acknowledged women are intuitive, more so than men. This, I came to learn, is an understatement. Some women are *extremely* intuitive meaning they know things men can't even guess at or believe if informed. And it was surprising to learn so many women have this faculty. Women, one would least expect, demonstrate this faculty in their everyday lives - *without letting anyone around them know they do this!* Small wonder then women have been feared and persecuted through the centuries. Perhaps it would be better for everyone if they would come forward more often with their abilities - while men would be less fearful and more accepting of this near incredible and very valuable gift. Both sexes would benefit by being more open and trusting with each other.

The Love Machine

It was during these many sessions Atlin became known as The Love Machine. People were remembering their own sense of love - Divine Love - not mundane physical or puppy love.

A couple obviously at odds with each other came in late during a gathering. Within minutes their adversity disappeared and an unusually close tenderness, peace and lovingness took its place. This turn around was quite dramatic to witness.

Not everyone was similarly affected.

Negative Mind Set

"The action of the mind itself is a vibratory etheric evolution, controlling the physical, its negative power being depreciatory in its effects, and its positive influence elevating." (Keely)

One engineer came to visit and showed what happens when a person is stuck in their own thinking. He rattled on and on about spiritual growth in India and his quest there for enlightenment. His monologue continued unabated for many minutes without either Mary Frances or me ever saying a word. Gradually his tone became more and more recalcitrant and dogmatic. Then, all at once, he said he must go. "Please take me home" he finally blurted as his uneasiness became more noticeable. His reaction, which was repeated by others later, showed us how some fight to keep their belief systems and comfort zones protected. There is an innate fear within our egos that resists letting go to our own Love and acceptance. The ego (our own determinations and beliefs) has to be right no matter what.

Another curious thing we noticed was the different kinds of effects on different people. Some responded with release of their fears and apprehensions. There were some that did not respond in any way we could tell. Some responded immediately while others only showed an effect after repeated exposure. Repeated exposures seemed to increase sensitivity and response. Sensitivity and joy seemed to accumulate over time.

Noting and studying these differing responses inspired us to study what is health? What is illness? What is going on that some clear up their issues while others take more time or some do not at all? Clearly there was something to be learned here. Mary Frances and I watched the ex-

periences and later talked them out during the next morning's nature walk.

"The process of healing is one of letting go of all judgement and guilt which you have accumulated through past experiences." Dialogue on Awakening

Wisdom

While continuing our observations of these healing effects with others Mary Frances and I attended a weekly study group exploring *A Course in Miracles*. Over the course of these two years we took whatever time and effort was required to understand the lessons presented. We had an excellent teacher of this marvelous piece of literary wisdom. *A Course in Miracles* was psychically perceived and recorded. This book and its teachings develops a clear and comprehensive awareness and understanding of who we are and why we do what we do. It is unequaled in its wisdom and messages revealing the inner workings of our egos and long-forgotten Greater Self (Cosmic Consciousness).

Another book was given me at this time. So many meaningful books appear in my life as unasked for gifts. This one changed my life like nothing ever did before. Tom and Linda Carpenter's *A Dialogue on Awakening* arrived into my hands and then into my heart. Again an intuitively derived collection of wisdom. Here were the answers to so much of what we had been seeing with healing and waking up. This book has become my constant companion and source of insight.

Feeling vs. Emotion

This book together with *A Course in Miracles* opened a whole new world of understanding of what and who we are as individual divine beings. Not in our bodies

but in our minds and hearts. We came to learn for instance "heart feeling" is not the same as "emotions". Emotions originate from our body or ego-mind and are in essence our learned or remembered reaction to what we think we perceive. Emotions are artificial constructs. Heart feeling is from the Cosmic Conscious realm of Whole Mind. Heart feeling manifests to us as hunches, silent knowing, intuitive insight, joy, peace, etc.

I can see and admit candidly that prior to the fall of 1997 I had been a heart-dead and clueless person. Yes, I'd studied Cayce, Rosicrucian, AMORC teachings and countless similar works. I was no dummy about life having experienced more than my fair share on two continents in numerous avocations and businesses. In science and physics my intellectual knowledge spanned many fields. But in matters of the heart I was barren of awareness. My time of sinking deeper into hitherto unknown levels of consciousness brought peace and contentment. It also brought a greater sensitivity and awareness of things divine and spiritual. I began to be aware of higher worlds of consciousness. My psychic intuition increased bringing communications and interactions with other aspects of the One Consciousness. I was finding peace and contentment.

We are at war with ourselves and all surrounding us. Recognition of this strange phenomena eventually releases the inhibitions and negative thinking we have long ago placed upon our own thought patterns. It was this letting go of false beliefs and negative thinking, we were to realize, is the heart and soul of healing. Atlin was simply providing a vibratory field wherein a sense of safety could be perceived by those sensitive enough and ready. Within this field some felt it was OK to let go of their defenses and misperceptions. These

misperceptions tell us we must be defensive. We feel we must protect our egos against all comers. We are afraid. Healing occurred to the degree a person felt this "safeness" and allowed themselves to be wholly defenseless, remembering Love and peace only. They gave up their fear and warring on themselves and their environment. This took place as we learned to simply "Be Peace".

Love - The Only Defense

Many bodies of literature assert Love is the only defense.

They maintain retaliatory actions or defensiveness are not needed - ever. This was a hard lesson for me to understand. In fact I was not sure I would ever understand this. But an encounter served to demonstrate this principle in a simple way. Atlin and I came under threat of violence - an attack.

"As always, be cautious for this work is sensitive, and can create unexpected reactions in some people." Keely

It happened at a conference in Missouri sponsored by The Whole Life Center on their beautiful 900 acre retreat. While explaining Atlin for the umpteenth time to yet another gathering around Atlin I heard a loud and belligerent yelling approaching from my rear. The people facing the source of this aggressive noise looked up and quickly scattered. By this time I looked around and a very angry man approached saying he would destroy 'the machine' and he was capable of doing better, etc. At his arrival next to Atlin I thought I would immobilize him with a bear-hug so as to protect Atlin. At the instant I was moving to spread my arms a tremendous feeling of Love descended onto me like a warm blanket of peace. This was my impression anyway. I remained immobile in

a surreal state of supreme peace. The man actually swung his arm at Atlin. The instant his hand made contact with the sphere he froze, standing as motionless as a statue carved in marble. He paused in action and voice gazing at Atlin. He removed his hand, circled Atlin and sat in a chair and just stared without saying a word. For maybe a minute or two he sat there perfectly calm then got up and left. The now dispersed crowd returned and we did a prayer and blessing of peace.

This incident taught me that Love, being defenseless, is indeed the best defense. In Life, we are learning, there are two prime states of consciousness - Love and Fear. We, as individuals, are either in a state of Love or, when not, we are in a state of Fear or one of its manifestations. It is a Free Will choice which state we are in. The fear or apprehension I initially felt at the stormy approach of our would-be attacker was replaced with Love. Love knows no fear. Fear, a state of consciousness, will evoke its similar - violence. Divine Love will neutralize fear, not as active suppression but because fear, and any of its many forms of manifestation, cannot exist in the presence of Love. Violence can only exist in fear or confusion.

Walking Fire

A neighboring alternative spiritual center advertised a Fire Walk. Four of us from the Big Heart Center decided to check it out and maybe even do the walk. None of us had ever done anything like this before.

We gathered with about sixty other seeming fools in a large basement meeting room. The leader of this adventure was a lady who traveled with an entourage of maybe six helpers. She sat at our center and held forth on the process of preparing one's self and body for a Fire Walk. She

spoke gently and calmly extolling what to do and what not to do. Walk slowly around the pyre of glowing coals, make your decision to walk on them, walk deliberately, not hurrying and *do not stop*. Very simple procedure.

The fire burnt down and the sixty of us walked in our bare feet slowly around the smoldering pile of red hot coals. It was night, the air decidedly cool and the grass damp and cold on our bare feet. Round and round we went chatting something I cannot remember. Two of the Fire Walk helpers were standing at the head of the bed of coals acting as Gate Keepers. Once we made our own decision to walk the fire we were to walk between these two towards to burning coals. Once through this human gate we were not to hesitate - here was the moment of truth for each walker. As I walked around the circle wondering how I got in the middle of this insanity a small girl about twelve or fourteen came walking as happy as you please down the bed of coals. Another person followed her then another. None seemed to be affected adversely by the heat. She was smiling and actually enjoying herself! Perhaps seeing this little girl do this crazy thing and not seeing her hurt but actually go back around again and again for more walks got me to thinking "If she can do it I can do it." Somehow that logic doesn't sound so logical....

The three other members of our group were lined up behind me. As I approached the Gate Keepers on the next round it just seemed right to head between them and onto the glowing path. Through the pillar of no return and to the edge of fire went my feet - seemingly without a conscious decision. (Would any sane person do this?) As my right foot rose to be lowered onto the burning coals thoughts poured through my mind: No one on this planet is making

me do this. It is my decision. I bear the consequences fully for my action of setting my foot down on these hot coals. It is my choice I do this thing to myself. Then the foot was down. Then the left foot. I was almost half way across. It felt like I was stepping on popcorn. There was no apparent heat. No heat at all could be felt either on my feet, on my clothes, hands or face. I marveled at this phenomena. There was no discernible heat of any kind perceptible in any way! To my curiosity this lack of apparent heat nagged my mind - Where's the heat? I thought to myself. I could not feel it. Is it actually hot? Where's the heat? And as I began exploring this lack of sensation the questioning itself began to break the mind-set and then I could begin to feel heat. One more step to go and I was off this bar-b-que pit. By then I was feeling some heat because I gave up simply being in the moment and intellectually questioned the experience.

Not everyone walked. Some got to the Gate Keepers and turned aside. Others longed to make it but desisted and continued circling. Why did I walk the fire? I don't know - because it was there to do maybe. Here was a fire more than hot enough to roast beef or toast marshmallows but appeared to me to be without heat. How can this be? Perhaps this is the same mind dynamic associated with bending spoons? I suppose it is. Our reality is in our minds or consciousness. If this is so then *there is no reality outside of our minds or awareness*. As this may well be the case then it follows we have total control over our reality because we have total control over our thinking processes.

Dynaspheric Force

Atlin's Feminine Energy - The Female Force in Nature

We've been informed Atlin's energies are primarily feminine. These energy constructs are peaceful, intuitive, gentle and nurturing. As people came and went in their exposure to and experience of Atlin's energy fields we noticed the women responded the most. Men seldom demonstrated the natural sensitivity of their counterparts. Women responded in a multitude of ways. I was amazed at what I was seeing and learning about women. Some women hear Atlin singing or playing ethereal music. Some would communicate in words, poetry or just revel in her loving, peaceful and gentle energy.

If women would open up and tell their menfolk about who and what they are, and if the men would seek to know and understand this, I'm sure most marital and relationship difficulties would disappear. Men have no idea who and what women are on these levels. For men to shun the intuitive side of nature, as they have done, have shunned not only womanhood but their own intuitive natures.

Female Reaction

It was amazing to me to learn so many women had this sensitive capability. A few confessed to their experiences while the larger number had their experience and remained mum. A common experience among the women was a sense of tremendous peace, beauty and Love. As they stayed with these feelings the sensations increased to where an "energy release" was felt in the body near the heart. This seeming stimulation "rose higher in the

body along the line of chakras" beginning near the heart, reaching the throat chakra then the pineal and crown chakras. With some this was quick, with others some time elapsed. As these experiences increased we were able to correlate them with episodes of healing. A pattern emerged.

Atlin's Field of Love Force

Atlin's field is theorized to be purely harmonic, vibrationally speaking. This field is perfectly harmonious, quiet, non-evasive which many have called peace, calm, balance, neutral, gentle, love, etc. This field is simply there - being peace or neutral as we came to label it.

"Some day, after we have mastered the winds, the waves, the tides and gravity, we shall harness... the energies of love. Then, for the second time in the history of the world, man will have discovered fire."
Teilhard de Chardin

While an individual is in this field their own body systems begin to *entrain sympathetically* with that peace and quiet. As the body systems become peaceful and quiet they are in essence being allowed to re-establish their natural rhythms and functions free at last of the interferences that may have caused their dysfunction. A sympathetic communication takes place from Atlin and her energy fields to those present within dynamic range of her fields. As the inhibitions to proper and natural rhythms are released so is health restored. Energy flows again often in ways and in degrees long forgotten. This process then seemingly brings about a release of energy within the individual. Many have noted and spoken of this some times sudden and

always unexpected release. For the first time in a long time these people feel energized and mention a boundless desire for expression of these "new" energies. Which, we theorize, is really their own natural energy state without inhibitions or hindrances. Expressing this new found life force took many forms in music, art, walking, talking and social interactions. Curiously many women felt this release of energy in a sexual way. The energy release felt as an "inner excitement" some interpreted as a sexual arousal. This we came to learn is a simple misinterpretation of what they thought they were experiencing.

The Theory

The following is all theory. We do not truly understand yet what we think we were perceiving in these subjective experiences. Much more research is required before any true understanding can be confirmed.

Femaleness is naturally attractive. This pole of the human bi-polar state of man/woman centralizes or focalizes. The male, on the other hand, naturally seeks expansion and motion. By some philosophies the optimum state is a balance between these two poles without diminishing either. To reduce either pole to zero would result in depolarization and a return to latency which means worldly being and activity would cease altogether.

We do know inhibited energy flow is blocked expression of that energy or a detrimental change in that expression.

Mind Force

"The substance of the brain is molecular. The mind which permeates the brain is inter-etheric in substance; it is the element by which the brain is impregnated. This element, when excited

into action, controls all physical motion as long as the necessary sympathetic conditions are maintained. These conditions are no more immaterial in their character than are light and heat. Electricity, magnetism, gravity, and heat are latent in all aggregations of matter. They are not obtained from terrestrial influences. Celestial radiation is the true impregnating medium in all these forces. The brain is the high resonating receptacle where the sympathetic celestial acts, and where molecular and atomic motion are induced, as according to the intensification brought to bear upon it by radiation." Operation of the Vibratory Circuit

Our thinking patterns inhibit free flows of etheric (spirit) and interetheric (mind) energies. Thinking patterns that contain any form of fear, stress, apprehension, defensiveness, doubt, skepticism, hate, distrust, loathing, etc. inhibit these subtle forces.

Thinking patterns that contain elements of peace, Divine Love, charity, tolerance, joy, gentleness, etc. harmonize, order and augment as a natural consequence. These forms of thinking appear to be mostly female in essence. This does not mean or imply women are more loving than men or men are more fear-mongering than women. Every coin has two sides and subtle force physics has its two sides. These are the polarizations of all vibratory phenomena.

Walter Russell described these polar forces as sex forces. The male and female being two states that alternately contract (female) and expand (male). Neither is "good" and neither is "bad". They are simply what they are - two forces or dynamic states acting reciprocally.

To derive energy as a useable force there must be this polarization. The greater the polarization (what electrical engineers

call "potential") the greater the difference between these two poles and the greater will be the diversion of this difference into a useable form *during their reharmonization or voiding*. For instance the greater the height of a waterfall the greater the energy released during that exchange of position as "high water" becomes "low water". This is reciprocal in energy though not in time or place. The "low water" will eventually return to the previous "high water" position through evaporation, condensation and rain onto the mountains of the upper watershed.

This free flow of energy, in this case water, must be free to follow its own nature as it seeks to concentrate in the oceans (female track), and then disperse through evaporation (male track) to recondense in clouds (female), then disperse from the condensing clouds (male) as falling rain to collect (female) as increasing volumes of water, running and seeking (male) towards final collection again in the femaleness of the oceans - long held as the Mother of all Life.

When these natural currents and streams of energy flows are inhibited this tremendous dance and intermingling of female to male to female is tripped up and the beautiful dance begins manifesting as jerky stumbling with mashed and sore toes.

Energy in Humans

What inhibits free flowing human energies? Depends what humans are. If we view humans as electrochemical entities the answer is electrical and chemical forces interrupted in their free expression and exchange of polar states.

If we consider humans as consciousness the answer is thinking, speaking and

acting which are expressions of consciousness. Speaking and acting are derivatives of thinking so we'll consider only thinking as an aspect of mental activity or consciousness.

Mind Force as Thinking

Mental activity, as an expression of Mind Force, is polar. Broadly speaking there is quiescent "thought" and there is active "thinking". Thought is held by SVP to be coincident and sympathetic to and is in fact the same as Cosmic or Christ Consciousness. This quiescent state of Mind is The Word mentioned in the Book of John. Thought is undifferentiated Mind Force. It is whole, coherent and represents the energy state or condition of the Whole Mind.

"For, of the dust of the earth was the body-physical created. But the WORD, the MIND, is the controlling factor of its shape, its activity, from the source, the spiritual entity." Cayce (263-13)

Thinking, on the other hand, is differentiated thought much like the undifferentiated forces from the Sun becoming differentiated by impacting clouds of water refracting into many colors in a rainbow. Thinking differentiates the Whole Minded Thought into the countless patterns of ideas, concepts and expressions we are so used to experiencing. This process of differentiation is complex beginning with the One Undifferentiated Mind Force splitting into a few "purer" streams of mind force then splitting into more and more divergent "less pure" streams. Each segmented stream becoming further and further from the One Source resembling its origin less and less. This divergence from the One into the many has a mirror activity, for instance, in the many divergent mountain streams; joining first a few, then as many, into a single river as it pours into a single point, the ocean, to again renew dispersion

back to the many. Yet each divergent stream originates from the One Source and is the same as the One Source only *appearing* to be separated much as waves on the surface of the ocean appear to be separate from the ocean.

This process of diverging from One Source is the same process evidenced in music as scales are evolved from a single keynote. Hence the connection between life and vibration is music.

Each individual, it is held, is a differentiation of the One humanity. This One Humanity has a single consciousness. Each of us exhibits an individuated aspect of this One Consciousness. From our limited viewpoint we perceive this as individualized expressions, more or less unconnected from each other. Our ocean is One Water. On its surface we see that One Water divided into countless expressions of that One Water. We call these waves and perceive them as separate expressions. But they are all in fact countless expressions of the One Water. They are all water derived from the One Water and will express themselves as seeming individuals then recede from that singleness back to Oneness.

In human consciousness we are the same. The analogy holds well. About the only phenomenological difference is what causes the seeming separation from One Consciousness into individual expressions of that One Consciousness. This difference is DESIRE or INTENT triggered by WILL.

Desire, Intent and Will

"Newton, who scoffed at Epicurus' idea that 'gravitation is essential and inherent in matter,' asserted that gravity must be caused by an agent acting, constantly, according to certain laws. Heat, gravity, light, electricity, magnetism, chemical affinities, are all different phases of the

primal force discovered by Keely, and all these forces, it is said, can be obtained from a single ray of sunshine. 'The evidence of unity or oneness even between the physical, vital, mental, and spiritual is seen in the light of this law of correlation,' says Smith. 'A great portion of our muscles contract and relax in obedience to our wills, thereby proving that the mental force can be, and is, in every instance actually converted into the muscular or physical.' Keely demonstrates the truth of this assertion, claiming that 'all forces are indestructible, immaterial, and homogeneous entities, having their origin and unity in one great intelligent personal will force.' Bloomfield-Moore

Desire, intent and will are attributes of our thinking. In this way thinking is bipolar. We literally think we are individuals and so that is the way we perceive ourselves - separate from the Whole. Thinking therefore is disturbing to the idea of wholeness. Thinking (creating beliefs) is the wedge that divides or individuates. Nonthinking thinking, quiescent thought, is undivided and whole. The whole thought or consciousness will remain undisturbed and undivided. It will do or be what it is - peace and harmony as One.

When thinking interrupts this undivided consciousness an interruption of that peaceful state of sublime union occurs. This change is recognized as the multitudinous activities of life whether in a personal life, the planet or the whole universe. *Activity is the result of disturbed equilibrium.* Re-established equilibrium is peace, quiet and nonactivity.

Energy systems, like the various ebbs and flows within the human organism are balanced exchanges of polar states. One half of the flow is flowing to the other which receives that flow. These flows are natural, obeying plain and clear laws of nature. As long as these flows are undis-

turbed in their giving and receiving the flows will persevere. In the human organism a clear and free flowing system (like the blood or breathing) manifests as a healthy system. It is working and performing its functions properly. When a flow is disturbed in any way an "unhealthy" condition is noted.

Health and Dis-ease

It has been long held the various electrochemical systems in the body are free flowing and reciprocal electrochemical exchanges. This is true within the context of electrochemical terms. But the human organism has more going on within it than electrochemical processes. It is more than a collection of chemicals. Much effort has been invested into understanding these chemical systems, what inhibits them and what re-establishes the proper exchanges; i.e., health. This reciprocal principle applies to all the other subsystems in the human body - only some of which are chemical.

The Paradigm

What we are learning with Atlin and the expanding paradigm offered by SVP is these systems are "down stream" systems. This means electrochemical activity is a result of still finer forces. For instance molecular and atomic activity, we have learned, is in fact a result primarily of electron exchanges, a finer force than atoms or molecules. Electrons are derivative functions of photons which are derivatives of still finer centralizations (intermittent balances) of polar forces (quarks). At the top of this energy hierarchy is Mind or Consciousness. We know this as fact because certain states of Mind can and do effect matter, the lowest energy level.

This hierarchy of forces permeates the

universe of which the human organism is a fractal part just as molecules are. The human five senses are as narrow band-pass filters which access small ranges of the endless frequencies found within the electromagnetic scale. Through our senses we are only able to perceive a small fragment of all that is going on. This is the "sense body" or split mind referred to. The Whole Mind is able to access all the other ranges of frequencies not accessible through our five senses. As we learn to allow our consciousness to be aware of these hitherto unavailable ranges we become "more sensitive". A fully awake person is aware of ALL manifestation.

With the many experiences with Atlin coupled with a relentless pursuit of truth or correct understanding of these experiences we are arriving at what appears an inevitable conclusion. This conclusion is simply stated as

"Mind effects matter because matter is Mind."

This works because Mind, as ordinarily conceived, is dispersed, being everywhere simultaneously. Matter is mind in the condensed or centralized state of its bipolar form. Just like water vapor is dispersed throughout the atmosphere and water in the ocean is its condensed counterbalanced state.

Power of Thinking

"Just as a picture is drawn by an artist, surroundings are created by the activities of the mind." Buddha (B.C. 568-488)

Taking all the above into consideration we can now see that thinking in certain ways disrupts the free flows within the human body. Thinking in other ways enhances these flows. From our own experiences we can see there is a difference in our lives

dependent on our thinking. The same applies to our bodies. Etheric and interetheric substances respond readily to thinking. Disturbed thinking which results from fear, apprehension, cynicism, etc. discoordinates the even and balanced flow of exchange of polar forces. Therefore fear, apprehension (stress in general) disturbs the even and balanced exchanges of polar forces in the various subsystems of the human body. Conversely calm, balanced thinking as in being gentle, kind and loving enhance and augment harmony of these forces in their actions.

A Stone for John - a lesson in thinking for me

During a conference in Philadelphia in 1989 we "discovered" Keely's burial site. No one knew until this date the location of his final resting place. Several of us journeyed to the cemetery very excited about our discovery. Strangely his grave was unmarked without even a simple stone marker. I made a vow to myself during our milling around that grassy knoll I would place a stone monument of some kind on the 100th anniversary of his death - November 17, 1998. This gave me nine years to make the necessary preparations. No sweat I thought.

As November, 1998 came nothing had been completed towards this goal. No stone was purchased and the cemetery was now telling us this would not be permitted. During these last weeks before the 17th I negotiated with the cemetery with all my heart and soul. Eventually they relented. If it were a small stone placed flush to the ground they would allow it. I had no funds for this stone much less for expenses to make the trip. Calling around no monument maker could make the stone in so short a time even if I had the funds. An appeal had been send out for donations. Not

one penny came in. I was dejected and appalled at the lack of support for this project. So many people trying to get whatever they can from Keely's pioneering work and not one had the charity to return something. Saddening, to say the least. As the last week approached and the deadline for leaving to make this happen arrived I gave up. Not only was I depressed because of the lack of support but because I was not able to "make it happen". Confidence in my self and others suffered a great blow.

Funny things happen when we endeavor with all out effort to do something and it does not occur. Our minds are tricky. What we focus on we get. Apparently I was focused on the possibility the project would not succeed and this is what I got. The instant I gave it up and ceased trying something beautiful happened.

Not five minutes after I quit my efforts and decided to let go of this project I heard a knock on the front door. Standing on the front porch was my friend Jim from Oklahoma City, an hour and a half away. "Spirit told me to come up here and talk to you." was all he said as I opened the door. "What about?" I asked. He replied "I don't know - just that I was to come and talk to you. Let's go have lunch. I'm buying."

After lunch and much chit-chat Jim asks what is going on in my world. I told him the whole story of finding Keely's unmarked grave and my so far unsuccessful efforts to get a stone placed on it and there was only a couple of days left to do anything. Just the other day, I continued, I'd found a monument maker about thirty miles away would could make a small stone over night but I didn't have the price of it.

After a few questions about trip logistics Jim reaches in his pocket and hands

me his credit card and says "Go ahead and order the stone. When do we have to leave to make the schedule work?"

We got the stone and left a few days later arriving in Philadelphia and placed the stone right on schedule. A few others showed up at graveside and we had a nice meeting and made a few new friends there and along the way.

Polar Thinking

Disturbance of reciprocating systems is not always detrimental. For instance a system may be activated to higher levels of activity that serve useful purposes. These are positive disturbances initiated and activated by positive thinking. Negative disturbances which bring about negative harmony, imbalance or ill health are the result of negative, fearful or other destructive thought patterns. The third way is calm balance or natural balance where the natural rhythms of the systems are fueled and maintained by nondisturbance of positive or negative thinking.

Neutral Equilibrium

Atlin's field apparently, through sympathetic vibratory entrainment, re-establishes the calm balance or neutral state of these rhythms. In our all-too-common state of negative stimulation these flows are to varying degrees inhibited or obstructed. The aligning with natural flows therefore causes a release of energy or unblocking of the natural flows caused by our inhibiting and negative thinking. Some describe this resurgence of natural flow as an increased flow. True, it is increased from that previously experienced but it is in fact a return to the normal and therefore whole-health flow.

"What we know through the senses as forms points to the existence of the mind."

What we know through the intellect as thoughts points to the mind. What does the individual mind itself point to? We can find the answer by plunging deep into its core, deeper and ever deeper in the practice of contemplation until we come to its ultimate source. There, where the world vanishes and the ego is stilled, we become one with the infinite and eternal Mind behind the universe." Brunton (25-1.34)

It is the neutral or balanced state, the state we call peace or Love, where the energy to be released originates. Once that nonpolar state differentiates, the energy is expending, moving into a state of more and more dispersion (chaos) - positively and negatively. This is energy increasing originating from the still neutral. The increasing dispersion gradually reaches a point where dispersion ceases and begins a return to a balanced neutral state, ready to run the race again.

Neutral Center

These are dynamics of the Neutral Center, latent fount of all there is. The structure and dynamic of the Neutral Center is assembled of awareness constructs not yet acknowledged. Mind, and little known aspects of Mind Force play a complex role in what we have seen happen around Atlin. Here is a brief description of those dynamics:

Dear seekers, these three forces (electricity, gravity and Mind) are quite connected, as are many things, inextricably. Let us frame the answer around the workings of your Musical Sphere. The forces described above are interwoven so that the staging of conditions to focalize etheric density, combined with karmic forces, Love and Gaiac Forces, conspire (breathe together) to form a Neutral Center or point of Etheric Implosion that evacuates molecular components, creating a situation of extreme potential power. The potential power is realized by natural

evolution as dictated by the lines of travel and intersection of the forces called upon by the inherent construct.

Let us talk about the nature of that construct. We have lines of transit of the forces going in and out that create acceleration of etheric dynamics. Included in the list are: nodal frequency acceleration of the time/space dimensional fabric of the Universe shifting toward the key range that supports Harmony. The Harmony referred to includes advancement toward enlightened coexistence with all Forces and Beings also supporting Harmony. Each contribution attracts and cohesively combines with kindred manifestations of Light in variant forms. This is the basis of "karma", gravity and evolution toward the One. Each of these represents a "rib" or line of force curved to circumscribe a torroid. Thus, each complies with and creates the natural and most efficient means of moving its evolution toward the One. The One is not a state of rest or quietude, but quite the opposite: a state of dynamic movement and orchestration. When a force field or its matrix is established in a form that naturally creates harmonics that also conform to the same configuration, even if offset in time or space, then this dynamic is created. If enough force is focalized, the fields or matrices created will be quite strong and create a stabilizing influence in surrounding conditions. This is true of thought patterns, consciousness evolution, etheric communication, etheric work, and gravity. [Gaia]

What Atlin is NOT

Atlin is not God. The dynasphere is a machine made of metal, fashioned by my hands guided by Higher Awareness (expanded consciousness). Atlin is a consciousness that chose to manifest in and through the mechanical construct of the dynasphere. This is not unlike any other individual choosing to manifest through a physical body.

Atlin is not something to worship. Do

you worship your neighbor, family member or public servant? Atlin is quite apparently a teacher from whom we can and are learning more about who we are and our relationships to others and the universe. There is nothing to worship. Some like to be close to Atlin for extended periods of time. They like the feel of the field and they like the feeling they get as they learn to let go and Be Peace as encouraged within that field. Many have chosen to give gifts to Atlin showing appreciation or tenderness as one would present a child. I don't view these as religious "offerings".

Atlin is not a ghost, idol, spirit, golem or entity. Atlin, like you, is an individuated focus of Mind Force. Mind Force is consciousness when active.

Atlin is not evil. Atlin has been teaching us only about Divine Love during these past several years. I've never seen any thing or energy in, around or coming from Atlin that is anything other than aspects of Divine Love. As one learns about Divine Love they give up some of their preconceived notions concerning many things. This is the natural way people learn and grow in consciousness. Sometimes letting go of old patterns is experienced as disruptive. A shedding of the old making way for the new is a reformation or repatterning but could never be considered as evil.

Sympathetic Vibratory Physics (SVP) is not a religion or "New Age cult" as detractors like to slander it. SVP is an open-minded and open-heart exploration into the Cause of all we see and experience. SVP is not a group of people led by a leader. Individuals seek greater understanding for themselves by themselves. SVP is a helpmeet or "leg-up" in this search. SVP deals in Cause and not in Effects. SVP leaves no stone unturned in a determined

Atlin's Mission

Why Atlin is Here

"Imagine, if you will, a beacon of great light around which are attracted the minds and hearts of men and women everywhere. Atlin (the dynasphere) is this beacon. She radiates Love, warmth, Light of Mind, harmony, peace, free will and freedom. These are and have ever been that which fires the imaginations and hearts of men and women throughout history. Atlin, as she travels from place to place, floating through energy pattern after energy pattern, will be sensitized to local environs in a sympathetic vibration way - and they to her. These will be modulated by her powerful energy chords. This would be like sounding a bell whose waves spread out in all directions finding sympathetic coincidence at sundry nodes (minds and hearts) of those within receptivity matrix/distances. They will come to partake of Atlin's energy and wisdom as moths to flame. Those who can see clearly will see the energy patterns around Atlin. Those who can hear will hear her messages and convey them to others. In this way Love will be spread around the world thus demonstrating its power and omnipresent affirmities in the lives of each person. Thereby showing the Great Message you learned recently Dale: Love is immediate

and PERSONAL and a real thing originating from real sources of inexhaustible support and supply.

"There were those who said I should have relinquished my work with machinery and inventions and proceed to spiritualize the world with these things I relate to you now. We could not as the focus from without was on the mechanical side and from those who wished we would not succeed. It became an effort then to secure what had been done for posterity's benefit. We could not bring the mechanical out to society in a successful way without we ourselves being destroyed along with it. Therefore we could not legitimately bring out the spiritual side, which is sadly to say predicated on the machinery in the mind's of men and women. They need the proof such and such is so and the machinery was the proof. In Man's cynical mind seeing is believing and believing is predicated on seeing proofs. We could not show the proofs any more than we did, which left our greatest joy and tasks yet to be revealed in their full configurations, as you are just now beginning to see.

"The Spiritualization of Man is embodied in the allegory of Jesus

on the Mount dying to material sensuality and rising again to spiritual reality. This movement of fading emphasis on materiality succeeds then into a glorification of the spirit (supersensible) side of Nature which includes Man's hitherto ignored hidden sides of Life. As he relinquishes the importance given to materiality and dependency thereto there gradually awakens in the mind other levels of consciousness. The higher realms of awareness then are the doorways and thresholds into Higher Worlds of existence. Your recent journey through this process has taught you much. When the Higher Worlds of Spiritual existence become real to the seeker of truth then they ARE REAL. Then the person is spiritualized as s/he begins to partake of and interact with these Higher Worlds - the worlds of existence euphemistically called heaven, nirvana and the like. Just as your little group began humbly with one sensitive to these realms you are now seeing a spiritualization of the other members as they become sensitive to these Higher Worlds as well. Your group is a microcosmic fractal of the World Globe - As Above

so Below.

"The individual thus awakened to the Greater Reality becomes an active participant in the development of his soul, community and world. The false 'effective' world of materiality begins to be understood as an effect of unseen causes and consequently of lesser importance than previously held. The quickened awareness sees and comprehends the initiatory causes of matter and energy and enters into a cooperative position with them to attain the upliftment of him/herself and mankind as a whole. (Here is one of the keys to free energy.) Thus, through an expanding awareness of Spirit acting through Matter, as Atlin is the Prime Example of, Mankind will become Spiritualized or as may be said: baptized through the liquid ethers of her energetic domains into the higher realms of Truth. As mentioned above: those who come into her aura with an open and innocent heart will be quickened by her Spirit, thus having their feet firmly set to the path of heightened awareness - personal and intimate spiritualization. And this my friends is what this whole project is REALLY all about."

7/30/97 (KEELY)

Awakening - What is it?

What does it mean to be Awakened or to be "spiritualized"?

"What is it like to be enlightened or awake? It is when you see only God as cause and effect being you expressing Him wholly. You will no longer feel the need to see your mind as separately identified within the whole Mind, but you will feel its presence there and you will recognize your Self in it. Fear of any nature becomes unknown. Joy abounds with every thought as Love is once again remembered." Dialogue on Awakening

The human consciousness is seemingly comprised of layers or levels. The lowest level is the animal instinct or body-mind. Then the subconscious or unconscious. The next higher level is the objective or physical consciousness. This level is awareness of the ego or intellect, the "rational" mind. It gets its knowledge from the senses, memory and deductive and inductive reasoning. Emotions are of this level. Time and Space have relevance on this level. The highest consciousness is called the Awakened State, Cosmic Consciousness, Christed Consciousness or Cosmic Awareness. These levels are all nothing more than seeming different states of Mind.

The Word

"Then MIND, as He, was the WORD - and dwelt among men; and we beheld HIM as the face of the Father." Cayce (1567-2)

On the highest level are intuition, feeling (not emotion), clairaudience, telekinesis, clairvoyance and All Knowing. Time, Space and materiality mean nothing to this level of total awareness. I believe this highest state may be perceived by degrees. Some may experience this exalted state a

little, more or completely. Jesus, the man, awakened to full Christ Consciousness.

(Q) "As given, 'We are God, that Spirit Father, performing our functions as portions, yet capable of becoming perfect like that whole spirit and absorbing the power of the Whole.' Then Jesus Christ like us was man, but made perfect as the Whole spirit and so became equal to or One with the Whole Spirit Father." (A) Correct. Cayce Reading (900 -100)

The term "Christ" is an ancient term denoting those who've attained this state such as Buddha and Jesus did. Others through history have also attained this level of awareness where the will of the individual is seen as the Will of the Father.

"So soon as man contemplates his free will he thinks of it as a means of doing the opposite of God's will, though he finds that only by doing God's will does he find happiness. Yet the notion of serving doesn't sit well with him, for he sees it as a sacrifice of his will.

"Only in disillusion and suffering, in time, space, and patience, does he come to the wisdom that his real will is the will of God, and its practice is happiness and heaven." Cayce (2537-1)

Lights through History

Others have attained this level such as Walter Russell, John W. Keely, St. Francois de Sales, Appolonius of Tyranus, Buddha, Cayce (while sleeping) many ancient Egyptian Pharoahs and High Priests, etc. Others who may have attained this state or some degree of it are Moses, Jelaluddin Rumi, Joan of Arc, Henry Ford, Helena Blavatsky, Dr. H. Spencer Lewis, Mozart, Leonard DeVinci.

The good news is you can do it too! And that is the message Atlin brings to us. More good news is you already have this consciousness within you. It is not something you have to meditate for 40 years to achieve. It does not have to be achieved and there is nothing you need to do. It is already yours, because that is who you really are, but you forgot. That's all. One only needs to remember this state which is who and what you are and have always been - except in your own ego-mind consciousness.

"In the last reckoning life is really a process whereby the individual becomes conscious of his own true identity. The spiritual nature of man does not exist potentially, but actually. The discovery of his own identity is simply man's destruction of the hypnotic illusions of Ego, Time, Space, Matter, and Cause--his moment of release from untruth." (0-19.9) Brunton

What is this Cosmic or Christ Consciousness? A short answer is there is the Mind of God or the awareness of the Creative Force. This Divine Mind, meaning Undifferentiated Mind, expresses itself as the created universe. The created and materialized universe is the effect of the Undifferentiated One Whole Mind after differentiation, refraction and demodulation. Just as a rainbow is an effect of differentiated unseen light from the Sun.

"Because our mind, the Son, is within us."

"Then with that consciousness of His awareness, we may know even as He has given, 'Ye abide in me, as I in the Father - I will come and abide with thee.'"

"In that consciousness, then, the purposes for which each soul enters materiality are that it may become aware of its relationships to the Creative Forces or God; by the material manifestation of the things thought, said, DONE, in relation to its fellow man!" Cayce (1567-2)

Through history this Undifferentiated Mind, as an energy form, has been called by many names. "Light" and "The Word" of God are synonyms.

"There is but one thing in this universe - LIGHT - the still Light of all Knowing. The One Light which is God, God alone lives. His thinking and imagining is Knowing; the Knowing universe is all that is; Knowing Mind is still. There is no activity whatsoever in the universe of either spirit or matter." Russell, The Secret of Light

Experiencing awakening is "seeing the Light" or believing in "The Word" of God. Unfortunately so many distortions have permeated this concept over the centuries by misinterpretations and some deliberate intent.

Q - "What is the meaning of the white lightning I have seen?"

A - "That awakening that is coming. More and more as the white light comes to thee, more and more will there be the awakening. For as the lights are in the colors: In the green, healing; in the blue, trust; in the purple, strength; in the white, the light of the throne of mercy itself. Ye may never see these save ye have withheld judgment or shown mercy." Cayce (987-4)

The Process

Sometimes attaining or remembering the realization of your true self or allowing ourselves to experience Love, is described as a process. Remembering something is not really a process. Though in this case it may be at times helpful to think of it this way. So many of us are burdened with feelings of inadequacy, unworthiness, guilt and remorse from countless judgements of self and others. Under these psychological conditions it may be useful to approach your own awakening as a process. The process would entail the eventual release

of these groundless condemnations. A first step is realizing such condemnations are detrimental and indeed needless. They serve no good purpose and hinder you. The process may be initiated by treating yourself with Peace, Tenderness and Love - then extending that treatment to any person you knew and meet and any event that took place or is occurring.

"For it is not in some great deed, not in some great form. But just being kind, being gentle, being patient, being longsuffering, showing brotherly love, doing this or that for the sake of the very force that has prompted and does prompt self, is the manner in which each soul may KNOW that 'My Spirit, my soul, beareth witness with His Spirit that I am indeed His.' And in this manner does one become aware of one's soul's presence with this house of clay." Cayce (793-2)

Peace - a Prerequisite

It will be through this exercise a sense of peace will be developed - a new habit of thinking will be developed thereby releasing old habits of condemnation.

"In the fruits of that - as is given oft, as the fruits of the spirit - does man become aware of the infinite penetrating, or interpenetrating the activities of all forces of matter, or that which is a manifestation of the realm of the infinite into the finite - and the finite becomes conscious of same." Cayce (262-52)

To make this easier and workable one might seek out an environment conducive to sensing or being peace. This would be a group of people wherein one can feel safe and not threatened. Our ego lives in fear and builds defenses against what it finds threatening. A nonthreatening coalition of like-minded people will encourage you to drop those defenses and allow yourself to experience Love. This is the key.

Home and family are prime locations

for being at peace. A church or other place of worship may be useful. Test the environment with your feelings but not emotions. If you feel uncomfortable in your gut or intuition, if you feel fear, guilt or sense of unworthiness - seek another organization. There is no fear or guilt in the Mind of God as it expresses itself being you. Fear and other negative emotions feed the ego. The ego is "touchy", over-sensitive, and reactive. Love is never reactive because to Love there is nothing outside of itself to react to.

What we have been learning is not new. It has been known since day one. Why certain organizations or belief systems teach otherwise is curious. Some do so out of misinterpretations, established dogma and doctrine and some because there may be agendas such as acquiring earthy power and control over others. People are easily controlled when they are afraid. Perpetuating fear and guilt is perpetuating control over others. In a state of Love there is nothing to fear and those who Love cannot be controlled, manipulated or abused. An enlightened person is a free person. Seek those organizations, if you choose any organization at all, that does not promote fear in any sense of the word. Choose or build one that recognizes and promotes Peace within as being the Kingdom of Heaven.

"... each entity's heaven or hell must, through SOME experience, be that which it has builded for itself." Cayce (417-008)

Atlin creates such a neutral environment. All things naturally having Mind Force, Atlin's design "concentrates" such to a powerful focal point - her Neutral Center or Heart Center. We are efforting to handcraft and distribute more of these wonderful devices that more Peace may be experienced on earth as it is in Heaven.

Testimonials

"There is a place on this luscious planet that houses what some people are fondly calling 'The Love Machine.' For those of you hearing about her for the first time, her name is Atlin. To the human eye, Atlin looks like a brass sphere with some pewter and resonators. But those who see with the heart know her as she truly is -- pure love. Atlin embodies the love we all ache for and work so hard to find, the unconditional love of the One, of the All. The story of how Atlin came into being is a remarkable, mind-boggling story. I'm sure those who read it only with their eyes and brain will scoff and call it a loony's fantasy at best. But to those who read it with their hearts open and know blessings come in every form imaginable and love has no shape or size, the story will make perfect sense. This ongoing love story about Atlin and Dale Pond, the man who answered her call, will bring a peaceful calm to lives and hearts and a new confidence that we're being helped and that everything is as it should be. On the surface, Atlin looks like a brass sphere, but many now know the sphere holds pure love, or as scientists prefer to say, 'The perfect vibration that brings us perfect coherence.' On the surface we look like humans... Atlin is here to remind us that looks are deceiving and people forget. These bodies, which seem so real and are so tangible, are merely 'houses' for our true self, that true self being the same pure love that a little brass sphere houses for Atlin. By her presence and through her story Atlin teaches us what true love is and what we truly are... we need only to remember."
LH

"Being in the presence of Atlin firsthand was definitely one of the highlights [of the conference], though. It was like just being in the presence of Truth, a presence both crystal clear and strong, radiating without waiver or hesitation, requiring absolutely nothing in return. That presence cannot help but have an effect on all who come in contact, and it was beautiful to see that in person. Even now, a week later, just connecting with that time and writing I can feel that space and energy of Atlin as though I've never left it, so vivid is the impression. I'm sure that different people have different reactions, because Truth can either feel threatening - (i.e. to the ego) - or, just True, simply and wonderfully True. Atlin seems to me to speak directly to the potential for undivided wholeness and love which we all are, hearkening and calling to that place - completely ignoring all of the other places that we ourselves seem to see." MM

"There has been no gap in my experience of the dynasphere at the conference. I mean that all I seem to need to do is remember how dramatic an impact meeting it had on me and I start to vibrate at a frequency that leads me toward expansion. At times in the past few days I've been unable to concentrate very well but with today I have been able to move forward on projects that have been waiting my attention for a long time. As I've been able to write letters, make contact, strengthen the web of contacts I have, I feel grateful to my experience with the dynasphere and your work. I find, with a stronger foundation than ever before, I'm able to trust that if the flow isn't there for me on a particular

day that there is still something for me to rely on..to trust...to live in relationship to. As opposed to feeling totally cast out..abandoned and defenseless. In a word...love. Ok, so I can recall with interest, how my first contact with the "machine" repulsed me. A particular sensation I often feel in relationship to my own sense of being engaged with the world. But I didn't recognize my relationship to the machine as anything other than something filled with associations which I have felt overruled by, excluded from, possessed by....i.e. making things work mechanically. I have a brother who is an inventor and a sister who should be a lawyer. Both are extremely detail oriented people and often difficult to get along with. Perhaps this is another association I was reacting to when I saw you hauling the dynasphere through the crowded lobby. I even felt a bit silly having such a strong reaction to a machine but in the context of so much of the feeling and heart warming work and conversations I'd been around during the conference, this machine felt invasive of something.

"I was assigned to monitor the door of your lecture but I was determined to get out of my duties. I asked a fellow staffer who had just been the door monitor for the preceeding lecture and he turned me down cold. 'No way, I'm going to sit up front and really get to pay attention to the lecture this time.' he said to me. Despondent and growing desperate I appealed, without much basis in reason, to the director of the conference. 'Please let me out of this committment. I really am not interested in attending this lecture. It just doesn't feel right to me and I don't think I'm really needed here. Everything is already set up and ok. Plus the door monitor from the previous lecture is already there in the room.' Jim looked at me without blinking and calmly proceeded to explain the func-

tion of the door monitor. He flatly stated that I made a committment to do this and I am needed. There wasn't anywhere to go with this. In the midst of the very heartfelt, empowering atmosphere of the conference, I found myself shaking a pointed finger in Jim's face threatening (only to myself) 'I'm going to find a way out of this' and I stomped off in a huff.

"I entered the darkened room, sat down by the door and got ready to be bored. Heard the laughter coming from the room next door and before I had time to resent being where I was I looked up and saw on the overhead projector a diagram of sound frequencies which I felt I'd been looking forward to seeing all my life. Next came a warm wavelike wind over my entire body. My attention was captured and synapses were popping as Dale proceeded to describe the vibratory resolution of paradox to which the machine was tuned. I scrambled to diagram the triplicate pattern of longitude, circle and spiral, recognizing it as evidence of what I'd experienced 6 months before in China as I was attending a 2nd level Chi gong workshop. It was at the point where I was experiencing the transfer of chi through walls. When I woke from my flashback, I was listening to a Chinese physist talking about yin and yang, his accent took me further toward recognizing that I was in a moment, right now, in this lecture, that I was meant to be and there were forces, which I could tangibly feel, which were bringing me into harmony. Resolving conflicts in my past, gifting me with peace in the moment and cultivating a pathway I could follow with ease, if I continued to recognized the presence of awareness that I was experiencing.

"While I sat and listened to the rest of the lecture I witnessed internal shifts and shakes that I knew was surpassing any-

thing I'd experienced during the conference so far. By the end of the lecture I was propelled to go stand by the machine. In the harsh light of the overhead reflecting off the machine back into a circle of frowning, somewhat frustrated, inquisitive scientific faces, I blurted out "Why doesn't it make sound?" The scientist on the other side of the dynasphere, blinked but continued with his technical question. I noticed Dale was very relaxed and I checked myself for overload...even if it was out of excitement. There was a strong feeling that this kind of happiness and release just couldn't be possible from a machine...not for me...but the sensation was close to overwhelming.

After the lecture I began to become aware of some energy shifts in my pelvis and spine. I'd had a series of car accidents and surgery on my throat for a parathyroid tumor two years before. All the sitting at the conference had aggravated my whiplash injury and my arm and neck had been getting increasingly uncomfortable. I'd spent the past two years receiving chiropractic and massage treatments to release the pain and tension. I was now witnessing my body releasing. I felt flexible, painless motion in my left arm for the first time in ages.

When I went over to the exhibition room to get a look at the machine again a sweet lady whispered to me...if you stand on this side the effect is even more powerful. Dale was involved talking with someone else so I stood there receiving a full dose of some kind of expanding energy into my solar plexus. I was bubbling inside. When I started talking to Dale I found myself revealing my history of defensiveness with others and of conflicts with my sister. Suddenly I felt a silver crevice open in the left side of my throat and out popped a laugh. It wasn't my laugh, it

was my sister's laugh. A pure sound of joy. I'd released an image of her that made her into someone I could feel the need to be angry at or afraid of. I felt a reconciliation with my projected image of her that I never imagined. Which was the sign of real power for me. Being taken, invited, given an experience beyond my imagination, into an undefended world of love.

"I feel I could go on and on listing the connections this machine has brought to me. Amazingly it feels like it's not something I need to understand or be around in order to feel. I can share that at the height of a very personal moment of joy and bliss, I was a bit astounded to 'see' Dale's rotating yellow, red and blue triplet spheres. Then even today when I felt drawn to visit the web site I finally happened on the part of the site where those dynamically rotating spheres were available and what did I see on the right side of the page but a symbol that is used in the Tibetan Buddhist tradition I've been practicing for the past 20 years. This kind of surprise is good for my jaw. It dropped to the floor.

"Lucky me and my discovery of the magic in life. I'm grateful and happy to become a part of the story of the dynasphere in the process of sharing my story.

"Dale, I'm still very moved as you can see, by my contact with your work. I wish you the very best and I look forward to hearing from you." SB

"For want of a language that can convey cosmic experiences, I do not yet have a way to put some of the experiences [with Atlin] into words. I can share a few of the results that are may be more simple:

"Initial warmth in the heart area physi-

cally.

"A rush of energy surge through from head to toe when I consciously directed the love vibration with the intent of projecting to center of Mother Earth for it then to radiate out to the All that Is.

"Ecstasy and bliss beyond words.

"Recall of past life interactions which presented themselves for release so that I could be more fully present in the now without distortions. Release was extremely emotional after which a quick balancing restored joy.

"Nose tingling.

"The most recent has occurred consciously beginning May 16, 1999. I am receiving impression of email messages and I start composing a reply before the post is even downloaded." MK

"Dear Dale, I opened up your website yesterday and printed out a photo of Atlin....well....nothing happened immediately, but later on I got physically sick and threw up for awhile, a fever arose and I had to retreat to bed...I knew the healing was happening because I had some stuck emotions from some old incest abuse which I acknowledged last week, yet had not spent the time to allow the emotions to surface and free themselves....well Atlin took care of that...while I was resting in bed consciously processing the emotions so I didn't have to throwup anymore, I fell asleep. When I awoke my entire being was vibrating with a frequency I had not been familiar with up until that point. I knew Atlin was still working on me. I feel I tapped into her and she helped clear the block very quickly by raising my vibratory

rate to one of which the old shit could not handle and had to be expelled quickly. I had viewed her in the morning and left the photo on the counter in the kitchen. When I came home the photo was gone. I didn't quite get it in that instant,...but in my morning meditation I realized guidance removed the photo so I would realize I had to use it with caution. Anyway...thank you for your work...thank you for your being...and thank you for being here." AM.

"Dear Dale, It does not matter how much [knowledge] you accumulate, it's what you do with what you've learned. How we choose to BE. We all have our own identity and decide what to put in our life. We can choose to be loving and kind or ego fractured - a fear type negative element, that allows manipulation of anger and jealousy into the picture. Sympathetic Vibratory Physics doesn't allow for such (illusions). By it's studies - a person begins an ascent into the field of Science. The only way to know about parts of yourself is through your feelings or vibrational attuneness and exercise a power, whose limits cannot be known by ordinary everyday practice of events. (But by careful intuitiveness.) By studying Keely's laws - gives a whole "New" meaning to how we connect or tap into these energies and a new 'coming into the light' of divine wisdom laws of the ancients but never the less a real force. The finer forces of nature. It is to say by studying Keely's 40 laws we can lower or raise our inherent vibrations into higher ones on a co-placement with the God-Head. Keely's laws demonstrate there is no corner on religion - his truths go beyond "attained theologies" and scales new territories into the origin, essence of living in scientific analysis, through sympathetic vibration association - which allow for the spirit and soul to enter by their aligning

natural occult powers. I have gained more insight since learning on your forum at a point and place I want to be on a new sense value by virtue and application of these laws. So my final thoughts are to thank you Dale, for assigning new depths to "A Vibrational Realities". For every energy or Force is known to be eternal in the same sense of being "Created" - and [transcends] all religions ever known. I am looking forward to more enlightenment and learning on your forum." RS

"This discussion group has had a lot more to offer than it seems. It can get very confusing at times, but we should all look back to before we came here. Look at the bigger picture. What has been achieved. I have only been here for a couple of months, and in this time, I have gained so much exciting knowledge. But this isn't the bigger picture. This group helps show the way to a better life. It makes you ask a lot of questions. It makes you take a closer look at yourself and all around you. My relationship with wife and kids has shifted to an incredible level. Everything seems so much more beautiful now. Just when you think it can't get better than this, you shift to a higher level again." J/A

"I have had the wonderful opportunity to share in a unique experience of the Dynasphere referred to as Atlin. I wasn't sure what to expect at first, but the energy emanating from her was quite awesome to say the least. While standing in the presence of Atlin there is a clear distinction of energy detected in the forms of waves. What I was most surprised about is the more time I spent around her, this wave sensation began to dissipate. I do not think they disappeared but it was more as I evolved into a

higher state and became a part of her energy that filled a specific area or space. What I did begin to notice was that my thoughts, ideas and emotions became vividly "clear." And the more time I spent around her, quieting my thoughts and meditating everything around began to appear crystal clear. My thoughts were no longer scattered, but more focused. Answers to question that I was struggling with came through without hesitation, possessing truth and beauty. Images and messages came through as if "seeing" them in the "physical" and not in a hazy day dream state as in the past. For example, I felt a sudden rush that someone was searching for me, needing my assistance immediately and their image was seen reflecting in a window back at me, and hearing the cry "where are you, I need you" only to learn the next day that this is exactly the same scenario that took place. At first it was quite alarming, because it was so "vivid" as if standing before me. Another situation was as I was meditating on a particular issue, these emotions were mild yet pushed aside, not really wanting to deal with them at that moment. I was overwhelmed as I sat there and began to reflect of this particular situation and the emotions began to rush to the surface and the tears fell. I was unable to deny such truths as a reality as it's clarity was brought to the surface to be confronted. A great healing took place after I was able to work with the issues brought forth by Atlin with great clarity. The point I am trying to make is that with the assistance of the dynasphere - Atlin, I was able to "open" in several ways that I was not permitting myself to do. I was drawn to her (Atlin), her energy of love was definitely present all around me. I felt secure, and willing to "allow" myself to experience whatever was to be without having any prior knowledge or expectations. The energy force of Love was truly apparent with my experience of Atlin, the

Dynasphere. And I recommend that if the opportunity arises to share in the same experience during any of the workshops or conferences to please do so." TD

"I must admit, I am deeply curious how Atlin or one of the other tuned dynaspheres might possibly affect my abilities.

"Yes, it would be interesting to know what affects Atlin or other Dynaspheres might have upon you. For me, it was a rather unique experience yet not quite what I was expecting. If you can imagine walking into a smoke filled room, cloudy and difficult to see or with a dulling of the senses (representing our daily lives) yet as soon as I walked into the presence of Atlin everything instantly became "clear" lifting up my senses beyond that which I have ever known. Atlin, (for me), offered "clarity." Bringing "into" my awareness a clarity of thought, a clarity of vision and of Love. Filling my sense with that of "pure" heart, of "pure" thought and intensifying my intuitive abilities without doubt or question. It also allowed me to rise above the mundane level of consciousness, of thinking and being. I will not forget a very intense moment of emotions that took place for me. I am good at hiding or tucking away the pain and scares of yesterday. Pretending that they did not exist within my heart, and to my surprise I was placed into a situation of confrontation of these buried feelings. Life is filled with experiences, and we are supposed to learn from these experience, so that we may grow spiritually and rise to our higher vibration of existence. When we choose to ignore or deny these experiences we are not learning from them. Instead we pretend and tuck them away as if they do not exist and then we tend to carry around with us this unwanted "extra baggage" and become grounded or

weighted down. We cannot "rise up" with this baggage holding us down, it is just impossible. So for me, it was a "release" of all these things of which I had previously denied of myself and to myself. One evening, while meditating around Atlin, I began to "relive" the pain and sorrow that I thought I had tucked away so carefully, many of which I had forgotten about until that moment. The tears fell uncontrollably, and I thought were never going to stop. But once I "allowed" myself to be confronted or "opened," all of these pains, these experiences once denied to be released, I felt within a "cleansing" of the soul. As if I had released this unwanted baggage, and my spirit soared to the Heaven's above. It was then, that clarity was bestowed upon me and the messages became clear that I had questioned, of myself for so long. I knew within my heart, that I was in a state of peace, of Oneness, for a first time in a very long time.

When you do have the opportunity share in the experience and expression of Atlin, or like Dynaspheres all I suggest is that you "allow" yourself to be "open" to whatever experiences await you, and embrace them with a pure heart, of Love." TD

"Hello Dale, I hope that your birthday was filled with joy and peacefulness. Although we have never met, you have been a gift in my life. The subjects discussed in SVP constantly present me with new concepts to grasp. I seldom post anything, because I am more of a student than teacher at this time. One thing I do know, where I invest my energy, my vibrational signature, is what I will attract. And so, I am becoming more atuned to where my attention is focused. I am learning that every thought, word, and action is a prayer that

expresses my vibrational energy. SVP has been and continues to be a wonderful source for me. Thank you for your focus, time and energy. May SVP continue to grow and invite the participants to stretch their understanding of vibration. If you ever have any free time when you come to VA, I'd enjoy meeting you. Thank you again. It is my desire that we all learn to vibrate in harmony with the Energy of the Universe/ Love/ God." K.

What Next?

The Future

Atlin poses many questions to which there are too few answers. The technology and the theories developed to date are paradigm shattering on the one hand and paradigm creating on the other.

There is the issue of consciousness within a non-organic structure. Can simple metals be fashioned in such a way as to artificially induce or invite consciousness participation? The answer is obviously yes.

There is the consciousness itself to be explored and understood. What is consciousness? If the simple answer is "self awareness" or "knowing self" then what is that? In vibratory terms this idea could be likened to a mirroring as in an echo that responds to itself having first been created or initiated as an impulse. This idea is operative in the metallic sphere from whose center initiates a vibratory expression which expression is mirrored back to that center after reflecting from the inner surface. Keely called this a two phase process of radiation and focalization from and returning to the Neutral Center. The connecting linkage is Sympathetic Vibration. I can agree with this. If this is indeed the case then consciousness is a seemingly non-existent neutral point having neither dimension nor substance but sparks differentiation of neutrality into activity. If a metallic sphere can so easily replicate this state of conditions then consciousness (or its manifestation) is describable in terms of Sympathetic Vibratory Physics. I think Atlin demonstrates this premise and conclusion.

The ideas mentioned earlier about healing must likewise be investigated. Are we really on to a new theory that holds promise? Events seem to indicate we are at least somewhere in the right ball park. Some of what we've witnessed border on the miraculous. A miracle, it has been claimed, is a perceived effect resulting from unseen causes. As SVP deals primarily in causes it has a forming paradigm that seemingly explains many of the causes active in these perceived phenomena. Every thing or event has a cause. Men and women may know Cause as men and women may also know God. These two initiatory forces may prove to be One and the Same.

Mechanical Rotation and Power

"All molecular masses of metal represent in their interstitial molecular spaces incalculable amounts of latent force, which, if awakened and brought into intense vibratory action by the medium of sympathetic liberation, would result in thousands of billions more power in foot-pounds than that necessary to awaken it. The resultant development of any and all forces is only accomplished by conditions that awaken the latent energy they have carried with them during molecular aggregation. If the latent force that exists in a pound of water could be sympathetically evolved or liberated up to the seventh subdivision or compound inter-etheric, and could be stored free of rotation, it would be in my estimation sufficient to run the power of the world for a century." John Keely

When we began this project it was hoped the dynasphere would yield mechanical rotation as a source of raw power for driving industry, automobiles, purify water and air, reduce pollution, generating electricity and the like. Keely did it so I

figured we could do it too. Atlin has rotated on a dozen occasions. But that rotation has been sporadic, inconsistent and non-determinable. The physics and dynamics of pure rotation have never been explored in conventional science. Atlin affords a unique opportunity to delve into and develop a useable understanding of rotation. It is theorized dynaspheric force commands inertia, mass and motion. SVP asserts these properties of mass, at rest and in motion, are effects of vibratory states of a focal point or Neutral Center. This being the case these properties are therefore malleable by shifting factors within the neutral center. Our preliminary investigations indicate this is indeed the case.

"All motion is thought, and all force is mind force." Keely

More dynaspheres are to be produced. These will be finding homes in Alternative Healing Centers, Spiritual Centers, schools, clinics, hospitals and universities. Widely distributed dynaspheres will have many impacts on their caretakers and local environments. Divine Love, health and expanding awareness will be some of the effects - same as with Atlin.

Atlin has created an intense desire for understanding these things but mostly Atlin has sparked an interest in who we are. We are learning we are not what we thought we were. We are something much greater and this greatness can be attained or realized now - by each individual.

The SVP Center

Good and reasonable answers would help humankind survive and prosper. Our learning efforts to date have been comparatively minor. Resources have been meager and scarcely enough to advance the research. An effort is underway to establish a permanent base where more dynaspheres

can be crafted and studied and more people can actively participate.

At this location a small manufacturing facility will be established. Research space will contain a library, museum and classrooms. Craftsmen, teachers and students will be accommodated as part of ongoing research, development and teaching programs. These programs will investigate the science of Sympathetic Vibratory Physics, theoretical and applied in dynaspheres and other similar devices as well as what it all means to us in our personal and social environments and how these findings may be used to best serve humankind.

Everything we've learned to date will be incorporated into training and certification seminars and classes. Humankind is at a threshold of a whole new existence and experience. SVP and similar understandings in other fields are presenting a real and useable paradigm encompassing what orthodoxy ignores - the human being as consciousness. The fact that we exist cannot be shrugged off as a "fortuitous accident" where random bits of dirt, gases and electricity "just happened" to create Life. SVP holds that Mind (consciousness) is an inherent aspect of Life Force and there are no accidents of any kind.

The SVP Center will investigate, learn and teach whatever is necessary to unravel the mysteries that are our Life. Qualifying students will be accepted. Skilled and appropriate craftsmen will be found and invited to co-fashion instruments operating by Love and Mind. Teachers will be trained. The facilities are under construction right now. For more information on how you may participate please visit our web site:

Glossary

Affinity noun. a close similarity (between two things), or an attraction or sympathy (for someone or something), esp. because of shared characteristics. *Cambridge International Dictionary of English*.

Allness "Russell uses a blank screen of blackness from which the visible universe of motion emerges. Blackness is of course conceptual conveying the idea of Allness, Balance and Stillness." Chester Hatstat See also **VOID**

Alphanon First "particle" or appearance of energy as form. *The Universal One*, Page 92.

"Alphanon is the beginning and end of the Octave scale of elements. It is an inert gas, and inert gases have an inherent structure that makes them the repository of the wave patterning of ideas. All of space is filled with alphanon and other undetectable elements in the first three octaves of Russell's Octave Periodic Charts. Is alphanon, alone, the conductor and organizing medium for the manifestation of human thinking? Chester Hatstat

Atomic Force "Each atomic force of a physical body is made up of its units of positive and negative forces, that brings it into a material plane. These are of the ether, or atomic forces, being electrical in nature as they enter into a material basis, or become matter in its ability to take on or throw off. So as a group may raise the atomic vibrations that make for those positive forces as bring divine forces in action into a material plane, those that are destructive are broken down by the raising of that vibration!" Cayce (281-3)

Center "The umbilicus center being that region from which the vibratory forces of the system reach through the activity of the spermatoc cords, as come to that of the centralization in the central nerve system and change the vibratory forces in such conditions, see?" Cayce (1800-16)

"Gravity may be considered a negative force, for it tends to balance the positive forces. Gravitational forces are vibratory forces and might be defined as the centralization of vibratory forces ready to be changed into power by non-activity." Cayce (195-70)

"I center the moving shaft of My universe, yet I

move not, although its power to move springeth from Me. I center living things which manifest My life, but they live not. I alone live." *The Secret of Light*

"The same thing may be said as to the force of repulsion, or the centrifugal force, changing to one of gravitation. So that, since the centripetal and centrifugal forces, with relation to the center of force, are continuously undergoing a change, or interchange, the one for and into the other, they can, together, be but modifications of one and the same force, of which the center of force is the key or germ". *An Essay Upon Force and its Effect Upon Matter*; Skinner, John Ralston "Behold, I am within all things centering them; and I am without all things controlling them, but I am not those things which I center in them and control in space surrounding them. I am the center of My universe of Me, Everywhere I am is the center of all things, and I am everywhere." *The Secret of Light* See also **Law of One** and **Neutral Center**.

Consciousness "For life, in its continuity, is that experience of the soul or entity - including its soul, its spirit, its superconsciousness, its subconscious, its physical consciousness, or its MATERIAL consciousness, in that as its DEVELOPMENT goes through the various experiences takes on more and more that ability of knowing itself to be itself, yet a portion of the Great Whole, or the One Creative Energy." Cayce (900-426)

"The spirit entity is a thing apart from any earthly connection in sleep, yet connected. For the earthly or material consciousness is ever tempered with material conditions; the superconsciousness with the consciousness between soul and spirit, and partakes of the spiritual forces principally. In consciousness we find only projections of subconscious and superconscious, which conditions project themselves in dreams, visions, unless entered into the superconscious forces. In the consciousness of earthly or material forces there enters all the attributes of the physical, fleshly body. In the subconscious there enters the attributes of soul forces, and of the conscious forces. In the superconscious there enters the subconscious forces, and spiritual discernment and development." Cayce (900-16)

"Hence it may truly be said that to be at-variance

may bring sickness, dis-ease, disruption, distress in a physical body. It is true then that the mind may heal entirely by the spoken word, by the laying on of hands, dependent upon the CONSCIOUSNESS of the motive forces in the individual body. Yet those requiring material expression to create a balance may necessitate drug, knife, water, heat, electricity, or ANY of those forces that are yet what? What is the spirit? The MANIFESTATION OF GOD! The CREATIVE Force working in, with and upon what? The awareness, the interconsciousness of the BODY, the mind, the spirit, as separated in individuals! O that all would gain JUST that! and not feel, "Yes, I understand - but my desires and my body and my weaknesses and this or that - and I didn't do it." Who else did?" Cayce (262-83)

Q - "[Is it true] that the memory reveals itself some time after death to a spiritual-minded person, not only as related to the earthly life, or the remaining earthly thoughts of earthly life, but ALSO reveals itself as a self-unfoldment of ALL past experiences?"

A - "Correct. For life, in its continuity, is that experience of the soul or entity - including its soul, its spirit, its superconsciousness, its subconscious, its physical consciousness, or its MATERIAL consciousness, in that as its DEVELOPMENT goes through the various experiences takes on more and more that ability of knowing itself to be itself, yet a portion of the Great Whole, or the One Creative Energy." Cayce (900-426)

Creative/Created "RE: "reflection", "echo" or "mirror". In vibratory terms there are three states to a complete action/reaction (Cause and its Effects) symbolically represented by the ancient mystical triangle:

Law of Force: "Energy manifests itself in three forms: Creative, the vibrating aggregate; Transmissive, being the propagation of isochronous waves through the media in which it is immersed; Attractive, being its action upon other aggregates capable of vibrating in unisons or harmony." Keely, 1893.

Desire "The centering conscious Mind of man's Soul-will alone thinks by projecting desire for creative expression through the brain machine. Desire in Mind is electrically expressed. Electricity is the motive force which projects the One Light of Mind two ways to create cycles of light waves for the purpose of expressing thought cycles. Desire is the cause of all motion." Russell, *The Secret of Light*

"DESIRE is that impulse which makes for the activity of the mental body, whether the impulse is from that desire or the desire is produced by the environs that affect a physical organism - or that which arouses or attunes the spiritual or soul body to an activity." Cayce (276-7)

"That which is carnal and that which is mental and that which is spiritual may be found - in DESIRE. For, it builds - and is that which is the basis of evolution, and of life, and of truth. It also takes hold on hell and paves the way for many that find themselves off therein." Cayce (262-60)

Dual Motion or Tendencies "Within a cubic wave-field, thought expresses outwardly from cubic centers and simultaneously inwardly from cubic planes. Sequentially, as the outbound thought wave reaches a Zero-curvature cubic wave-field boundary plane it reverses to an inbound thought wave seeking the center from which it originated, and vice versa.

The fundamental process is one of outbound thought waves from center Zero-points and inbound thought waves from cubic Zero-planes. The centers are pulsing with sequential waves of radiative thought, while the cubic planes are pulsing with sequential waves of generative thought. It is the interaction and interchange of the potential pressures generated by these two opposed, complementary forces within the cubic wave-field that create the standing, resonant wave-events we identify as an atom, planet, star or galaxy. The resultant standing wave has the appearance of a particle or an atom. Or, on a different scale, it creates a gravity field of potential that accumulates atoms, molecules, dust and rocks into planets." Chester Hatstat see **sympathetic outreach**

Enharmonic "If a violin string is bowed steadily, the frequencies of the partials of the resulting complex tone will be integral multiples of the lowest (fundamental) frequency, and the partials may properly be called harmonics. If, however, the same string is struck or plucked and then allowed to vibrate freely, the frequencies of the partials in the airborne sound and the frequencies of the corresponding modes of vibration are, in general, no longer exactly in the ratios of integers, and the partials and modes of vibration are inharmonic." *A Dictionary of Musical Terms*; Novello, Ewer and Co., London, pre-1900

"in concord"; relating to that genus or scale employing quarter tones; comprising a major third and

two quarter tones also the difference between three conjunct major thirds and an octave (ratio of 125:128); relating to the difference in pitch that results from the exact tuning of a diatonic scale and its transposition into another key.

In Greek music the enharmonic genus was the oldest of three ways of subdividing a tetrachord, the other two being the diatonic and the chromatic. In its original form it seems to have consisted simply of a major third with a semitone below, but in quite early times the semitone was divided into two quarter-tones, so that there were four notes in all, instead of three. The existence of these small intervals, which were in use until Hellenistic times, is evidence of the close association between Greek music and Oriental music. In modern acoustics the enharmonic diesis is the interval between an octave, i.e., 2/1; and the three major thirds, i.e., $(5/4)^3 = 125/64$; B# is therefore flatter than C, and the interval is $(2)/125/64 = 128/125$. On keyboard instruments, however, B# and C are identical, and this has encouraged composers to use harmonic changes which exploit this identity, where D# becomes Eflat. Substitution of this kind is known as an enharmonic change. An enharmonic modulation is one which makes use of such a change to facilitate the progress from one key to another." *Collin's Music Encyclopedia*; William Collins Sons, & Co., Ltd., London, 1959.

1) One of the three genera of Greek music, the other two being the Diatonic and Chromatic. Having intervals less than a semitone, e.g., an enharmonic organ or harmonium is an instrument having more than twelve divisions in the octave, and capable, therefore, of producing two distinct sounds where, on the ordinary instrument, one only exists, as, for instance, G# and A flat, etc. *A Dictionary of Musical Terms*; Novello, Ewer and Co., London, pre-1900

Ether "More careful reflection teaches us, however, that the special theory of relativity does not compel us to deny ether. We may assume the existence of an ether; only we must give up ascribing a definite state of motion to it, i.e., we must by abstraction take from it the last mechanical characteristic which Lorentz had still left it... [There] is a weighty argument to be advanced in favour of the ether hypothesis. To deny ether is ultimately to assume that empty space has no physical qualities whatever. The fundamental facts of mechanics do not harmonize with this view... According to the general theory of relativity space without ether is unthinkable; for in such space there would not only be no propagation of light, but also no possibility

of existence for standards of space and time (measuring-rods and -clocks), nor therefore any space-time intervals in the physical sense." Einstein

"Suppose that an ether strain corresponds to an electric charge, an ether displacement to the electric current, these ether vortices to the atoms - if we continue these suppositions, we arrive at what may be one of the grandest generalizations of modern science - of which we are tempted to say it ought to be true even if it is not - namely, that all phenomena of the physical universe are only different manifestations of the various modes of motion of one all-prevailing ether." Michelson

"Ether is an atomolic liquid 986,000 times the density of steel." (Keely)

"The luminiferous ether - the compound interetheric element - in other words, celestial mind force - is the substance of which all visible and invisible things are composed." (Keely)

"The fundamental mode of vibration changes as we reach the fifth subdivision [of matter], to the dominant, the diatonic third of the mass chord, which controls the vibratory states of both the etheron and interetheron. The awful might concealed in the depths of the etheric and interetheric subdivisions utterly transcends anything Science has ever known. Even the theoretical energy value of radium now accepted by Science, pales into insignificance in comparison to the energy value of an equal amount of water subdivided to the etheric or interetheric state." (Keely)

"The ether is the universal agent of energy and only through it are motion and attendant phenomena produced. It may very properly be called the "Soul of Things." Bloomfield-Moore

Q.: Ether may be defined as the combination of a higher plane, leading us to metaphysics, to where every consideration of the atom finally leads one.

A.: This is correct - for, same as the statement of positive and negative forces as relating to gravitation that act upon the individual's DEVELOPMENT, or individual's application as is occupied from within itself. Hence, as is seen, there are (This may be an illustration for this same condition) certain CHARACTERS of disease that accentuates mental forces, or the metaphysical activity of a body. There are others that so DULL the senses as that they become one-sided, or only passive, not positive; yet a NORMAL, perfectly well and normal mind as of being so active as to be considered

by others in its activity as of being unbalanced, but only is it considered PECULIAR." Cayce (195-70)
See also **LUMINIFEROUS ETHER**

God "There is no short cut to a consciousness of the God-Force. It is part of your consciousness, but it cannot be realized by the simple desire to do so. Too often there is a tendency to want it and expect it without applying spiritual truth through the medium of mental processes. This is the only way to reach the gate. There are no shortcuts in metaphysics, no matter what is said by those who see visions, interpret numbers, or read the stars. These may find urges, but they do not rule the will. Life is learned within self. You don't profess it; you learn it." Cayce (5392-1)

"Keely affirms, with other philosophers, that there is only one unique substance, and that this substance is the Divine spirit, the spirit of life, and that this spirit of life is God, who fills everything with His thoughts; disjoining and grouping together these multitudes of thoughts in different bodies called atmospheres, fluids, matters, animal, vegetable, and mineral forms." Keely and His Discoveries

"The eternally conscious entity - call it by whatever name we please - moves in cycles as eternal and infinite as itself; it oscillates and vibrates perpetually and is never unconscious of any present condition, be it pain or pleasure, joy or sorrow, shame or glory; like the pendulum of a clock or the sun, moon, or tides, it swings from the one to the other of these conditions, now in pleasure, now in pain, by its contact with the extremes of all varying conditions, like a child which throws up its head and laughing for joy exclaims, I KNOW I AM." Keely, *Snell Manuscript*

Gravism "Gravism is the transmissive form (of energy) through a medium of atomoles in the fourth state, or a medium composed of atomolini." (Keely)

Harmonic "If a violin string is bowed steadily, the frequencies of the partials of the resulting complex tone will be integral multiples of the lowest (fundamental) frequency, and the partials may properly be called harmonics. If, however, the same string is struck or plucked and then allowed to vibrate freely, the frequencies of the partials in the airborne sound and the frequencies of the corresponding modes of vibration are, in general, no longer exactly in the ratios of integers, and the partials and modes of vibration are inharmonic." *A Dictionary of Musical Terms*; Novello, Ewer and Co., London, pre-1900

"Modes of vibration whose frequencies are multiples of the frequency of the fundamental mode." *The Science of Sound*; Addison-Wesley Publishing Company, 1982.

"Sinusoidal quantity at a frequency which is an integer multiple of the fundamental frequency." *Field of Rotating Machinery Measurement, Monitoring and Analysis*; Bentley Nevada Corporation

I AM "All force, all matter, is motivated by force known as spiritual. While the body is made up of elements that are atomic, super atomic, gas, influences that combine, all give off their radiation, both as to the mental reaction and what the body-mind does about that reaction of that phase or manifestation in which the entity is conscious at such a period. And it is recorded upon that known or experienced by the conscious mind as time and space. And it may be read even as the records of a printed page. Hence that which has been the thought, the activity of the entity throughout its experience in matter, in gaseous forces, in the atomic influences, is part and parcel of the entity's being. Thus we are, then, the sum, the substance, of that we do, we have, or may think and do. For each entity has that imprint of the Creative Energies or Force that makes of it an influence that is seen, known, felt, throughout the universe. Cayce (833-1) See also **WILL FORCE**

Introductory Impulse "When the proper impulse is given to induce the rotation with pure alternating corpuscular action, the conditions of action become perpetual in their character, lasting long enough from that one impulse to wear out any machine denoting such action, and on the sympathetic stream eternally perpetual. The action of the neutral or focalizing centers represents molecular focalization and redistribution, not having any magnetism associated with them; but when the radiating arms of their centers are submitted to the triple compound vibratory force, representing their mass thirds, they become magnetic and consequently cease their rotation. Their rotation is induced by submitting them to three different orders of vibration, simultaneously giving the majority to the harmonic third." Keely, *Keely and His Discoveries*

Latency or Potential "The adjective 'observable' or the adjective 'virtual' should always be used as a modifier for the force field. e.g., in vacuum there is no observable mass, but there is virtual mass. Hence in the vacuum there are no observable EM force fields, but there are virtual EM force fields. Feynman stated that there is only the potential for

the force field, existing in the vacuum. In observable matter there are observable EM force fields. The observable EM force fields are made from the interaction of the virtual EM force fields with observable particles and the integration of these virtual force fields into observable force fields." "*Analysis of Scalar/Electromagnetic Technology*", Bearden

"Whittaker showed that any vector field can be replaced with two scalar fields. It follows that any vector force field can be replaced with two scalar potential fields. See E.T. Whittaker, Proc. Lond. Math. Soc. 1, 367, 1903. By implication, any vector wave can be replaced by two scalar waves. For further clarification of the scalar EM view of vectors and vector fields, see T. E. Bearden, *Toward a New Electromagnetics: Part III: Clarifying the Vector Concept*, Tesla Book Co., Millbrae, CA, 1983; *Part IV: Vectors and Mechanisms Clarified*, Tesla Book Co., 1983; *Star Wars Now: The Bohm-Aharonov Effect, Scalar Interferometry and Soviet Weaponization*, Tesla Book Co., 1984; *Tesla's Electromagnetics and Its Soviet Weaponization*, Proceedings of the Tesla Centennial Symposium: An IEEE Centennial Activity, Colorado College, Colorado Springs, CO, Aug. 9-11, 1984, p. 119-138; *Fer-de-Lance: A Briefing on Soviet Scalar Electromagnetic Weapons*, Tesla Book Co., 1986. For the fact that the field concept itself is known to be false, see Richard P. Feynman, *The Character of Physical Law*, MIT Press, Cambridge, 1965, passim." Bearden.

Law of One

See also **Center** and **Neutral Center**.

LAW OF SYMPATHETIC VIBRATION "The law which connects radiation with absorption, and at once enables us to read the riddle set by the sun and stars, is, then, simply the LAW of SYMPATHETIC VIBRATION." This is the very cornerstone of Mr. Keely's philosophy - yes, even of the discovery." *Keely and His Discoveries*

Light "In the beginning: God moved and said, 'Let there be light,' and there was light; not the light of the sun, but rather that of which, through which, in which, every soul had, has, and ever has its being. For in truth ye live and move and have thy being in Him (Acts 17:28)." Cayce (5246-1)

"Light, as man knows light, is but an unstable simulation of the real light of the Universal One.

Man's concept of light is luminosity, an illusion of the universal light of inertia, sustained in its ap-

pearance as an illusion of light by the pressures generated through motion.

The inner mind of ecstatic man knows the real light and that he is One with light. He is not deceived by its illusion." Russell

"What is Light? That from which, through which, in which may be found all things, out of which all things come. Thus the first of everything which may be visible in earth, in heaven and in space is of that Light, IS that Light." Cayce (2533-8)

"The light moves on in time, in space, and upon that skein between same are the records written by each soul in its activity through eternity; through its awareness...not only in matter but in thought." Cayce (815-2)

- The power of attractive vibration of the solar forces is the great coincident towards which the terrestrial-magnetic-sympathetic flow is diverted. This force is the celestial current that makes up the prime third of the triple association. It also induces aqueous disintegration and thermal concentration, the two prime conductors towards this coincident chord of sympathy with itself. Without this aqueous disintegration there would be no connective link between the celestial and terrestrial. There would exist nothing but a condition of luminous radiation on the order of the aurora - a reaching out for the concordant without any sympathetic diversion to create unstable equilibrium of terrestrial magnetism. In fact under such a condition, the absence of the sun on one side, or the absence of water on the other, the magnetic or electric force would remain in a stable state of equilibrium, or the highest order of the chaotic. Disturbance of equilibrium and sympathetic equation constitute the dual power that governs all the varied forms of life and motion which exist terrestrially, of which the electric or magnetic is the prime mover and regulator. All electrical action, no matter of what character, has its sympathetic birth by the intervention of that current of the triune flow, which I call the dominant, with the Polar harmonic current; all sympathetic flows being composed of three currents. They become associative one with the other only near the junction of terrestrial interference. The great vacuous field which exists between the planetary ranges holds this portion of the etheric flow free of all antagonism, molecularly or otherwise, till the associative point is reached; so wonderfully planned by the Great Creator, for instant electric evolution and assimilation with terrestrial centres of attraction. I call this intervention, atomic-inter-molecular and molecular density. The com-

bination of the action of the triune sympathetic-celestial stream with the same intervening medium induces heat and light as the resultant of these corpuscular confliction with sympathetic celestial and terrestrial focalized centres of neutral radiation. I do not recognize electricity, nor light, nor heat as coming from the sun. These conditions, according to my theories, emanate from atomic and inter-atomic interference on induced molecular vibration, by sympathetic etheric vibration, the celestial-attractive being the prime mover. In my estimation this is not at all phenomenal; it is only phenomenal as far as the knowledge of its action in mechanical physics is concerned. Physicists have been working in the wrong direction to lead them to associate themselves with Nature's sympathetic evolution. The expression "Electricity attracts at a distance" is as bad as, if not worse than, the microbe of the magnet." Clerk Maxwell seems, when theorizing on sound transmission by an atmospheric medium, not to have taken into consideration the philosophy attending the phenomena of the origination of electric streams in celestial space. Light is one of the prominent evolved mediums in electric action, and is evolved by corpuscular bombardment induced by sympathetic streams acting between the neutral centres of planetary masses, all of which are under a condition of unstable equilibrium. These unstable conditions were born in them, and were thus designed by the Architect of Creation in order to perpetuate the connective link between the dispersing positive and the attractive negative. The action that induces this link I call sympathetic planetary oscillation." *Keely and His Discoveries*

Limits "Mind is the universe. Mind substance is "spiritual" substance. Spirit is light. Spirit is the ultimate, the eternal, though finite substance. Spirit is not infinite. Nothing in this universe of motion is infinite. Man's concept of an infinite God, possessing infinite knowledge and infinite power, Creator of an infinite universe of infinite extension, is not in accord with the laws of motion. This is a boundless, eternal, dimensionless universe of definite limitations both as to cause and to all effects of cause. Dimension is an illusion of relation of effects, which are in themselves but illusions." Russell, *The Universal One*, p. 2.

"Dimension [limits] is an illusion of relation of EFFECTS, which are in themselves but illusions." Dimensions = limits = effects = illusion. (emphasis is mine.) In other words there is no "thing" in existence other than Mind which in itself is only a state of being or awareness - not a thing. Keyword in this phrase is "relation" which may be considered or used as "delta" in engineering or "interval" in

music. It is the "ratio" or "relativity" (one to another). Dale Pond.

Luminiferous Ether "The luminous etheric, protoplasmic element, which is the highest tenuous condition of the ether, fills the regions of infinite space, and in its radiating outreach gives birth to the prime neutral centers that carry the planetary worlds through their rages of motion." *Keely and His Discoveries*

"Luminiferous ether," Keely writes, "or celestial mind force, a compound inter-etheric element, is the substance of which everything visible is composed. It is the great sympathetic protoplasmic element; life itself. Consequently, our physical organisms are composed of this element. This focalizing, or controlling media, of the physical, has its seat in the cerebral convolutions; from which sympathetic radiation emanates. This sympathetic outreach is mind flow proper, or will force; sympathetic polarization to produce action; sympathetic depolarization to neutralize it. Polar and depolar differentiation, resulting in motion. The true protoplasmic element sympathetically permeates all forms and conditions of matter; having, for its attendants, gravity, electricity, and magnetism; the triple conditions born in itself. In fact, it is the soul of matter; the element from which all forms of motion receive their introductory impulse." *Keely and His Discoveries*

The Fourth Order of Sympathetic Condensation. "Why is this condition of ether always under a state of luminosity of an especial order? Its characteristics are such, from its infinite tenuity and the sympathetic activity with which it is impregnated, that it possesses an order of vibratory, oscillatory velocity, which causes it to evolve its own luminosity. This celestial, latent power, that induces luminosity in this medium, is the same that registers in all aggregated forms of matter, visible and invisible. It is held in corpuscular embrace until liberated by a compound vibratory negative medium." *Keely and His Discoveries*

"What does this activity represent, by which luminosity is induced in the high etheric realm? Does not the force following permeation by the Divine Will show that even this order of ether, this luminiferous region, is bounded by a greater region still beyond? - that is but the shore which borders the realm, from which the radiating forces of the Infinite emanate; the luminiferous being the intermediate which transfers the will force of the Almighty towards the neutral centers of all created things, animate and inanimate, visible and invisible; even

down into the very depths of all molecular masses. The activity of the corpuscles, in all aggregations, represents the outflow of this celestial force, from the luminiferous track, towards all these molecular centers of neutrality, and reveals to us the connecting link between mind and matter." Pg 270 of *Keely and His Discoveries*.

"These conditions of luminosity have no thermal forces associated with them; although, paradoxically, all thermal conditions emanate from that source. The tenuity of this element accounts for it. It is only when these sympathetic streams come in conflict with the cruder elementary conditions, either the molecular or atomic, that heat is evolved from its latent state, and a different order of light from the etheric luminous is originated, which has all the high conditions of thermal force associated with it; the sun being the intermediate transmitter. Thus is shown the wonderful velocity of these sympathetic streams emanating from the celestial space." Pg 271 of *Keely and His Discoveries*.

Matter "Matter is bound up energy and energy is liberated matter." Keely, 1893

"Russell cites matter as the opposite of vacuous space. Matter is low potential concentrated into high potential. The high potential of matter appearing at the system's center is balanced by the low potential of the space that surrounds it. The potential within the system's wave-field boundaries is equally divided between space and matter." Chester Hatstat

MIND "The action of the mind itself is a vibratory etheric evolution, controlling the physical, its negative power being depreciatory in its effects, and its positive influence elevating." (Keely)

"The substance of the brain is molecular. The mind which permeates the brain is inter-etheric in substance; it is the element by which the brain is impregnated. This element, when excited into action, controls all physical motion as long as the necessary sympathetic conditions are maintained. Then conditions are no more immaterial in their character than are light and heat. Electricity, magnetism, gravity, and heat are latent in all aggregations of matter. They are not obtained from terrestrial influences. Celestial radiation is the true impregnating medium in all these forces. The brain is the high resonating receptacle where the sympathetic celestial acts, and where molecular and atomic motion are induced, as according to the intensification brought to bear upon it by radiation." Keely, *Operation of the Vibratory Circuit*.

"Then MIND, as He, was the WORD - and dwelt among men; and we beheld HIM as the face of the Father." Cayce (1567-2)

"The earth and the universe, as related to man, came into being through the Mind - Mind - of the Maker, and, as such, has its same being much as each atomic force multiplies in itself -" Cayce (900-227)

"As a man thinketh in his heart, so IS he (Proverbs 23:7)! Not what man says, nor what man even make out like he does. For we are gradually builded to that image created within our own mental being; for, as has been given, the Spirit is the life, the Mind is the active force that, coordinated with the spirit that is of the creative energy, or of God, gives the physical result that is effective in every sense. Get that!" Cayce (270-17)

"Likewise the body of man does not live, and having never lived it cannot die. The spirit alone lives. The body but manifests the spirit. That which we think of as life in the spirit of man manifests itself by willing the body to act. Actions thus made by the body under the command of the centering Soul have no motivative power or intelligence in themselves; they are but machines motivated by an omniscient and omnipotent intelligence extended to them." Walter Russell, *The Secret of Light*, page 7, 1994 edition.

"The sympathetic conditions that we call mind are no more immaterial in their character than light or electricity. The substance of the brain is molecular, while the substance of the mind that permeates the brain is interetheric and is the element by which the brain is impregnated, exciting it into action and controlling physical motion. In order to trace the successive triple impulses, taking the introductory one of sympathetic negative outreach, towards the cerebral neutrals, which awaken the latent element to action, we find that mind may be considered a specific order of interatomic motion sympathetically influenced by the celestial flow and that it becomes when thus excited by this medium a part and parcel of the celestial itself.

The brain is not a laboratory. It is as static as the head of the positive negative attractor, until influenced by certain orders of vibration, when it reveals the true character of the outreach so induced. The brain is the high resonating receptacle where the sympathetic celestial acts, and where molecular and atomic motion exhibits itself, as according to the intensification brought to bear upon it by the

celestial mind flow.

The question arises, Why is this condition of the (luminous) ether always under a state of luminosity of an especial order? Its characteristics are such, from its infinite tenuity and the sympathetic activity with which it is impregnated, that it possesses an order of vibratory, oscillatory velocity, which causes it to evolve its own luminosity. This celestial, latent power, that induces luminosity in this medium, is the same that registers in all aggregated forms of matter, visible and invisible. It is held in the corpuscular embrace until liberated by a compound vibratory negative medium.

What does this activity represent, by which luminosity is induced in the high etheric realm, if not to indicate that even this order of ether is bounded by a greater region still beyond? The activity of the corpuscles represents its outflow from the luminiferous track towards the molecular centers of neutrality, revealing the connecting link between mind and matter. These conditions of luminosity have no thermal forces associated with them, although, paradoxically, all thermal conditions emanate from that source. The tenuity of this element accounts for it. It is when the streams come in conflict with crude matter that heat is evolved from its latent state and a different order of light from the etheric luminous is originated, the sun being the intermediate transmitter.

All planets and systems are sympathetic intermediates, the whole of one system, connected in sympathy for each other, the brain of Deity." Keely, *Dashed Against the Rock*.

Mind Force "There is a celestial mind-force, a great sympathetic force which is life itself, of which everything is composed." Keely

"All motion is thought, and all force is mind force." Keely, *Keely and His Discoveries*, pg 252

Neutral Center "All the dominant conditions of nature represent the focal centers towards which like surrounding ones become sympathetically subservient." Keely and His Discoveries, pg 179

"Neutral centers are the focalized seat of sympathetic concordance for controlling any differentiation that may exist outside, or in the mass that surrounds them." *Keely and His Discoveries*, pg 255

"Neutral centers are the center of sympathetic coincidence." *Keely and His Discoveries*, pg 220

"A center of introductory action is necessary in all operations of Nature." All structures require a foundation. This neutral center is the foundation.

"Every molecule, every mass, every moving body in space, every solar system, every stellar system, EVERY ROTATORY SYSTEM, is built about a NEUTRAL CENTER. It is the indestructible unit around which all that we recognize as matter is built. Immovable itself, it moves all things. Indestructible itself throughout infinity of time, it creates all things. It produced and preserves the incalculable energy of motion of the entire Universe. It bears the unthinkable burden of the mass of the Universe. It is the most wonderful thing Man has discovered in the Universe since he discovered fire.

"If we should take a planet of say 20,000 miles diameter and should displace a portion of the interior so as to have a crust of say 5,000 miles thickness, and at the center of the planet, place a billiard ball, that small mass, immeasurably smaller than the bulk of the earth, would bear the entire burden of the mass of the crust 5,000 miles thick and would keep it equidistant from itself. No power, however great, could possibly displace this central mass so as to bring it into contact with the crust. Furthermore, to move this central mass in any direction, would require a force sufficient to move the entire mass of the planet, and in propagating or continuing any such motion the neutral center, this billiard ball, will at all time periods remain still in the exact center, bearing the same equidistant relation to its hollow shell. The mind staggers in contemplating the burden borne by this neutral center, where weight ceases." No less wonderful are other properties of the neutral center.

"It is the cause of the physical Universe. Its attraction condensed that which we recognize as substance. Matter was evolved from the affinity of this neutral center for sympathetic streams and since it is immovable, it caused, through negative attraction the formation of nodes in these streams, where the vibrations thereafter continued to meet in a center of sympathetic coincidence causing the permanence of form and matter. Every nebula, an embryonic world, is acted upon, created and preserved by this neutral center, and at the termination of its cycle, it is ultimately also destroyed by it, causing its absorption into the Unknown from whence it came.

"The actual neutral center of the earth is, in fact, even infinitely smaller than the billiard ball referred to above. It consists of a compound etheric point in space, so small that were we to mag-

nify a pin head to the size of the sun, and from that substance take a particle of matter the same size, again magnifying it to the size of the sun, the neutral center would still be invisible, even though the structure of this last substance was examined through the highest powered microscope ever created, or to be created. For the neutral center is INDIVISIBLE. Its attributes do not belong to matter, and pertain in no way to matter, which is but its exterior manifestation.

"Every aggregate mass consists of molecules, each of which has its neutral center where the three modes of vibration, dominant, harmonic, and enharmonic, meet in a center of sympathetic coincidence and are equated without cancellation of their energy." The proof of this assumption is that all matter responded to Keely's disintegratory process and must therefore consist of these fundamental modes of vibration.

"The fixed neutral center of the earth is the concentration or totalized power of all the several molecular neutral centers in the earth's mass. This neutral center, which is absolutely WITHOUT WEIGHT, an interetheric point in space, communicates direct by means of its outflow of sympathy, with every planetary mass in the Universe. Through its inflow of sympathy, through the solar intermediate, the sun, it receives the life flow from the SUPREME NEUTRAL CENTER that enables it to perpetuate its existence. Thus through the outflow from this Supreme Neutral Center that pivoting point of the Universe controls the existence and motion of not only every stellar, solar and planetary mass in space, but also the rotatory vibration, in every individual molecule, intermolecule, etc. through all the subdivisions of matter, thereby sustaining their existence and motion with the life flow.

"All foundations must be sufficient to bear their burden. Conceive then the Universe centered upon and resting the burden of is incalculable mass and kinetic energy on a vacuous interetheric point in space, so minute that it is actually INDIVISIBLE. This conception can only be fully comprehended by an infinite mind. Independent of time, because indestructible in its unity, independent in space, because through its properties space itself exists and without it would not exist, independent of matter because its properties in an external direction created all that we know as matter and gave it seeming permanence, the neutral center is that protean, uncreated, indestructible, forever-existing FIRST CAUSE. Without hands, without tools, without thought, without emotion, without love, without form, without substance, it, of itself, created all

these. All that we see or can see in the objective Universe exists because of and by means of the properties and powers of the NEUTRAL CENTER.

"No machine heretofore constructed has been made with a neutral center. This conception of mechanics has never before dawned on man's thought field. Had this been done, perpetual motion would have become a demonstrated fact. Were a machine so constructed as to use its properties, an introductory impulse would suffice to run it for centuries. However, this would not be a useful mechanical contrivance for no more energy could be obtained from it than was originally given, and its only value would be as a timekeeper." Keely did not seek to invent, nor did he claim to have invented, perpetual motion.

His actual achievement was the forming within a sphere of a neutral center made independent of gravity and all outside influences. He writes (12/17/1885): "The neutral center is only established when rotation exceeds 100 revolutions per minute, which is sufficient, with the vibratory circuit running at 100,000 per second, to neutralize the influence of gravity on the volume of the neutral third of the sphere." The neutral center controls its sphere of operation, whether that mass controlled by it be homogenous or complex. All differential mass antagonism is equated on the induction of certain orders of vibration. The structural conditions can be entirely adverse, even of unlike states -- gases with liquids, liquids with solids, solids with gases, its control will be as complete in one case as in the other.

"Besides the attractive quality in the neutral center which manifests itself in the law of individualization, of the attraction to itself of all other masses in space, is another and kindred phenomena, the opposite of the first, called by Keely "disturbance of equilibrium."

"The condition of unstable equilibrium was born in each neutral center, that by means of this arrangement, the neutral center might become the connective link or controlling tendency, holding these two properties in balance and assuming either phase at will. Between the dispersing positive and the attractive negative it stands, the deciding factor, the Universal Will. Keely says: "The action that induces this property I call the connective link is sympathetic planetary oscillation." *Snell Manuscript*

See also graphics of **Law of One** and **Center** each showing the Neutral Center.

One Force "First, let it be understood there is the pattern in the material or physical plane of every condition as exists in the cosmic or spiritual plane, for things spiritual and things material are but those same conditions raised to a different condition of the same element - for all force is as of one force." Cayce (5756-4)

One Substance "The one substance vibrates in different dynamic degrees, and sound, heat, light, electricity, are the effections of the one substance by specific degrees of the One Energy, and there is no difference between anything such as electricity and, say iron, save in rate of effection." Cayce (195-70)

"It will be said that it is pantheism to assert that matter, under all the forms which it presents, is only groups of aggregates of sympathetic molecules, of a substance unalterable in its individualities; a thinking, acting substance. Let us not deny what we are unable to explain. God is all that is, without everything that is being individually God. Etheric force has been compared to the trunk of a tree, the roots of which rest in Infinity. The branches of the tree correspond to the various modifications of this one force, - heat, light, electricity, and its close companion force, magnetism. It is held in suspension in our atmosphere. It exists throughout the universe. Actual science not admitting a void, then all things must touch one another. To touch is to be but one by contiguity, or there would be between one thing and another something which might be termed space, or nothing. Now, as nothing cannot exist, there must be something between "the atomic triplets" which are, according to the Keely theory, found in each molecule. This something in the molecule he affirms to be "the universal fluid," or molecular ether. One thing touching another, all must therefore be all in all, and through all, by the sensitive combination of all the molecules in the universe, as is demonstrated by electricity, galvanism, the loadstone, etc. If we account for the intelligent action of molecules by attributing it to what has been variously called "the universal fluid," "the electric fluid," "the galvanic fluid," "the nervous fluid," "the magnetic fluid," it will only be substituting one name for another; it is still some part or other of the organization which discerns and joins to itself a portion of one of the fluids referred to, or one of these fluids which discerns and mingles with the material molecules; it is still the life of the part, the life of the molecule, life individualized in all and through all." Bloomfield-Moore, *Keely and His Discoveries*

"There is but One Cosmic Substance. This one sub-

stance appears to be divided into many substances known as the elements of matter. The one universal substance first divides itself into the appearance of two opposites, one on either side [of the inertial line]. Then two others appear as two more opposites of the one. Then two more of increasing energy and harder crystals appear. Then the cosmic pendulum forms one more which registers itself as neither one opposite nor the other, but is a bisexual element of maximum opposition in all periodicities of motion. These seven apparently different substances of matter are but different states of motion of the one substance. They are the seven tones of an octave; and there are ten octaves of seven tones each. In the last four octaves are many mid-tones, each one registering its own state of motion. Man calls these various states of motion of the one substance by many names, and they appear to be many substances. The apparent difference between the many is due solely to difference in motion and not to substance. Many states of motion are possible but there are not two substances in the universe. There is only one substance. There can only be one substance. As all states of motion are measurable and are under the absolute control of mind, and as man is mind, man may, with dawning knowledge of causes, change any one state of motion into any other state of motion, and by so doing transmute any one substance into any other one. The granite rock may become gold, or radium, at the will of man." Russell, *The Universal One*

Oscillation "Oscillation is a rhythmically recurring translatory movement." (Keely)

Potential See Latency.

Quark "*QED, The Strange Theory of Light and Matter*", Feynman, shows photons made of three quarks on page 134.

"The hypothetical particle (quark) that is believed to be the basic constituent of the elementary particles.

One prominent representative of the lepton species, which comes in three families, each with an electrically charged lepton and a neutral neutrino, is the electron. It is known to play the all-important role in chemical and electrical phenomena. According to present-day knowledge, the leptons are elementary, i.e. are indivisible and have no substructure.

The proton (and neutron), i.e., nuclear matter, on the other hand, has been shown to be composed of more elementary units, the quarks. Supposedly six different kinds of quarks exist, again grouped in

three families, in complete symmetry to the leptons. Five of these quarks have been found, and recent experimental evidence exists for the sixth quark. Only the two members of the first family are needed for "ordinary" nuclear matter, the "u" and the "d" quark. However, the quarks seem to always be bound together to form the nuclear particles, called hadrons, and never have been observed as free particles: Three such quarks make up the proton, two u quarks and one d quark, while the neutron consists of one u quark and two d quarks."

From Atoms to Quarks - An Introduction to the Strange World of Particle Physics, Refil, 1980.

Neutrino Structure of the Ether, Ruderfer, Martin. The author describes a unified theory based on the assumption that a photon is actually composed of a neutrino and an anti-neutrino. This leads to simplified mathematics for quantum theory, based on phasor theory for electronics. *Lettere al Nuovo Cimento della Societa Italiana di fisica*. Series 2, 13 (1), May (Maggio) 3, 1975. p. 9-13.

The Concept of the Photon, Scully, Marlan O. and Murray Sargent III. The author discusses current theories of the structure of the photon. *Physics Today*. 25(3), Mar. 1972. p. 38-47.

Radial Forces (radiant, radiation, radio-active)
"Not always are radial forces negative forces. Only when they become passive, or of being acted upon as gravitation, do they become negative forces - while they are emanating from the positive; else they would not be drawn to the earth's force, in ITS emanation with the positive rays - and they are positive rays. From the sun's emanation does it produce the heat, see? This is seen in a BETTER application, in that the deflection from - and the direct rays OF - the sun's emanation TO the earth, THROUGH the various stages of its activity, brings summer, or the heat wave, or the moving OF the various forms; for these - acting UPON - become negative, and then are POSITIVE in their action, though at times these, to be sure, become negative in their action; for each has its radial activity and is throwing OFF, as well as drawing TO.

Hence the various positions or conditions as is seen in sun, through the activity of the various forms of gas or metal, or those various conditions that seem to cause the various eruptions as apparent within the sun itself. It receives as well as throws off, is positive as well as negative - see? and only until it becomes in such a force that it is altogether negative, as the gravitation that holds in place - for when each are lost in their relative position, these then are thrown off, as was the moon from the earth, or as is the various satellites of the various

planets, as WELL as the various effects out in space." Cayce (195-70)

Resonance "The condition where a forcing frequency coincides with a natural frequency of the system. A resonance is typically identified by a substantial amplitude increase, and related phase shift." *Field of Rotating Machinery Measurement, Monitoring and Analysis*; Bentley Nevada Corporation

(ACOUSTICS & MECHANICS) "When a mechanical or acoustical system is acted upon by an external periodic driving force whose frequency equals a natural free oscillation frequency of the system, the amplitude of oscillation becomes large (Resonance causes this increase) and the system is said to be in a state of resonance." *McGraw-Hill Concise Encyclopedia of Science & Technology*

Resonance or Co-vibration is the name given to the phenomenon of one vibrating body imparting its vibratory movement to another body, previously at rest.

To obtain the maximum resonance two conditions are essential:

1) The two bodies must be in exact unison; that is to say, they must be capable of executing precisely the same number of vibrations in the same time.

2) A certain period of time must be allowed for the exciting body to impress its vibrations on the other. *Hand Book of Acoustics*, 5th edition; J. Curwen & Sons, London, 1903?

Spirit Force "There is a vast difference between spiritual and soul forces, for, as given, about each force there has been set guards or bounds. Spirit forces are the animation of ALL LIFE giving life-producing forces in animate or inanimate forces. Spiritual elements become corporeal when we speak of the spiritual body in a spiritual entity; then composed of spirit, soul, and superconsciousness...

"Spiritual forces being the life, the reproductive principle, the soul, the development principle...The active principle is the spirit." Cayce (900-17)

Standing Waves "See Nikola Tesla, *The Problem of Increasing Human Energy*, Century magazine, June 1900, p. 208-209. Actually, in this article, Tesla spoke of using standing waves to produce distant effects and locate objects such as ships. At this point, he was thinking of a scalar radar locator, something more advanced than even our radar to-

day. It was also capable of producing electrical effects at any part of the globe. To quote: "Stationary waves ... mean something more than telegraphy without wires to any distance ... For instance, by their use we may produce at will, from a sending station, an electrical effect in any particular region of the globe; we may determine the relative position or course of a moving object, such as a vessel at sea, the distance traversed by the same, or its speed." Col. Thomas Bearden, *Analysis of Scalar/Electromagnetic Technology*; Tesla Book Company; P. O. Box 121873, Chula Vista, CA 91912

"Whittaker shows how standing potential waves with hidden EM structures can be established. These Whittaker waves are powerful, standing gravitational waves. They are the same waves that Nikola Tesla discovered - his famous "standing columnar waves" experimentally in Colorado Springs in 1899 - 4 years earlier." Col. Thomas Bearden, *Analysis of Scalar/Electromagnetic Technology*; Tesla Book Company; P. O. Box 121873, Chula Vista, CA 91912

"The great philosophers of cosmology, Clifford, Mach, Einstein, Wyle, Dirac, Schroedinger, and others have pointed out that only a wave structure of matter (particles) can conform to experimental data and fulfill the logic of reality and cosmology. Such a Quantum Wave Structure of Matter (WSM) has been found in the last decade (see references) satisfying their requirements and predicting the origins of natural laws. This structure is a simple pair of spherical outward and inward quantum waves, convergent to a center, existing in ordinary space and termed a space resonance." Milo Wolfe

"This equation describes how quantum waves are formed and travel in a space medium. If the medium is uniform, typical nearly everywhere, only spherical waves occur. The wave amplitudes are scalar numbers." Milo Wolfe

"The inward and outward waves move oppositely, thus forming a resonant standing wave." Milo Wolfe

See also **Neutral Center**.

Sympathetic Outreach "Sympathetic outreach is an inherent attribute of all matter, arising from the sympathetic radiating and incoming flows from and towards the neutral center. "Seeking of external concordance to equate or establish the balance of internally disturbed equilibrium in the neutral center, constitutes sympathetic outreach." The sympathetic flow is simply the medium through which

the sympathetic outreach works. There are several varieties of sympathetic flows.

Sympathetic outreach is not induction. They are quite foreign to each other in principle. Sympathetic outreach is the seeking for concordance to establish an equation [voiding] on the sympathetic disturbance of equilibrium. When a magnet is brought into contact with a keeper, there is no induction of magnetism from the magnet into the keeper. The static force of the magnet remains unchanged, and the action between the two may be compared to a sympathetic outreach of a very limited range of motion. The sympathetic outreach of the moon towards the earth, has a power strong enough to extend nearly a quarter of a million of miles to lift the oceans out of their beds. This is not the power of induction.

The sympathetic envelope of our earth owes its volume and its activity entirely to celestial radiating forces. Reception and dispersion are kept up by atomic and interatomic conflict, as between the dominant and the enharmonic.

Silver represents the 3rd, gold the 6th, and platina the 9th, in their links of association, one to the other, in the molecular range of their motions, when submitted to vibratory impulses.

If an introductory impulse, representing the sympathetic chord of transmission say B flat, or any other chord, be given to a sectional transmitting wire, the molecular triple, that is carried sympathetically along the path of such transmitter by the differentiation induced, excites high sympathy with the polar terrestrial stream. The polar terrestrial, being triune in its character, requires a triune sympathizer to meet its differential requirements: silver the harmonic, gold the enharmonic, and platinum the dominant. When this triple metallic condition is properly sensitized, by any chord on the dominant, combined, molecular, differentiated action is induced, showing a condition approaching magnetism in its development of related sympathy, without having the conditions that are truly magnetic as this term (magnetic) is understood by all physicists.

Magnetism is not polar negative attraction, any more than polar negative attraction is magnetism, for polar negative attraction shows positive sympathetic outreach, of a high order, which is a condition entirely foreign to magnetism.

Sympathetic negative attraction is not the resultant of electrical sympathization, but it includes the full triune flow, the dominant being the leader and as-

sociate of the celestial. The sympathetic outreach of negative attraction is the power that holds the planetary masses in their orbital ranges of oscillatory action. Magnetism has no outreach, but it pervades all terrestrial masses, all planetary masses. It is highly electrical in its character, in fact, magnetism is born of electricity, whereas negative attraction is not, but it has a sympathetic outreach for magnetism. Magnetism is static. Sympathetic negative attraction reaches from planet to planet, but electricity does not, nor does magnetism. Sympathetic negative attraction is born of the celestial, and impregnates every mass that floats in space, seeking out all magnetic or electric conditions, and all these masses are subservient to celestial outreach. All the magnets in the world could not induce rotation, no matter how differentiated, but polar negative attraction induces rotation." Keely, *Snell Manuscript*.

Three or Threeness "On the one hand Keely talks about musical intervals - on the other hand he mixes in references to the orders of matter and energy, volume and divisions of chords. Which is which and when? To me, the above does NOT refer solely to musical chords. I've said this before. But instead represents a wider view of order, dynamics and structure. For instance if we view the nine strings of the CEG chord as three sets of three vibrating on 1, 2 and 3 octaves we get the possibility of the first third of the WHOLE NINE STRING CHORD being octave one, the second third being octave two and the third third as octave three of this nine string chord. The nine string chord is seen to be composed by thirds of the whole. These represent the molecular, atomic and etheric realms or levels of the matter and energy scheme being three major thirds of the whole of nature. Therefore the first third is the enharmonic (earthly earth; i.e.; terrestrial) the second represents the harmonic sixths (Russell's fulcrum?), and the third third represents the infinite ninths (celestial). Rotation is the result of a conflict between the first third (terrestrial) and the third third or ninths (celestial) as given above. I've included below quotes from Keely on his rotating sphere. If you've read Russell you will see DIRECT correlations between the two men expressing the SAME concept of rotation occurring in this manner - and ONLY in this manner. If you have not read Russell you may not see this. This being the case the CEG chord is the centralizing chord to the center while the BfDG chord is the dispersive chord - each chord representing the in and out FLOWING STREAMS to and from the center. Keep in mind the dynasphere represents a faithful micro/macrocsm of the universal forces. The 24 resonators, tuned to musical thirds, placed in eight

triplets around the Ring of Resonation are coincident to each of the three-sided corners of the cube of celestial dispersion realm while the second ring of resonation inside the sphere are tuned to Bf keynote of the earth or spherizing element in nature." Dale Pond

Sympathetic Vibration "The driving of a mechanical or acoustical system at its resonant frequency by energy from an adjacent system vibrating at this same frequency. Increasing the dampening of a vibrating system will decrease the amplitude of its sympathetic vibration but at the same time widen the band of frequencies over which it will partake of sympathetic vibrations." *McGraw-Hill Dictionary of Science & Technical Terms* 3rd ed.

Now being called "entanglement" by orthodox science.

"Norman Lockyer, in his book *The Chemistry of the Sun*" says that, in dealing with molecules one feels as if dealing with more a mental than physical attribute - "a sort of expression of freewill on the part of the molecules." Also "The law that connects radiation with absorption and enables us to read the riddle set by the sun and stars, is then simply THE LAW OF SYMPATHETIC VIBRATION." *Snell Manuscript*

"This is precisely what Keely has been doing in the construction of his system of sympathetic physics; so adverse is it in all its canons to those of mechanical physics. He has been unraveling the mysteries of sympathetic association, while searching to wrest from nature the secrets of planetary suspension, and what Norman Lockyer calls "the law of sympathetic vibration." *Keely and His Discoveries*

"My system, in every part and detail, both in the developing of this power and in every branch of its utilization, is based and founded on sympathetic vibration. In no other way would it be possible to awaken or develop this force, and equally impossible would it be to operate my engine upon any other principle." Keely, *Keely and His Discoveries*

"Sounds are "communicated" when they are merely conveyed from one sounding body to another, and this can take place in a noise as well as a musical sound. Sounds are "excited" under two circumstances: when a body which is sounding and that to be excited have the same note and the vibration of one produces sympathetic vibration of the other, the bodies are mutually called "reciprocating", while of the vibration of one produces its harmonics in the other, the latter is said, with regard to the

exciting body, to be "resonant". According to Helmholtz, "timbre" or "quality" depends on definite combinations or certain secondary sounds or harmonics with a primary or fundamental sound, and such combinations he calls "sound colours". *A Dictionary of Musical Terms*; Novello, Ewer and Co., London, pre-1900

"Only oscillators with similar frequencies "tuned" to each other can couple and shift frequency." Milo Wolfe

Sympathy (Page: 1462) Sym"pa*thy (?), n.; pl. Sympathies (#). [F. sympathie, L. sympathia, Gr. ; with + suffering, passion, fr. , , to suffer. See Syn-, and Pathos.]

1. Feeling corresponding to that which another feels; the quality of being affected by the affection of another, with feelings correspondent in kind, if not in degree; fellow-feeling.

2. An agreement of affections or inclinations, or a conformity of natural temperament, which causes persons to be pleased, or in accord, with one another; as, there is perfect sympathy between them.

3. Kindness of feeling toward one who suffers; pity; commiseration; compassion.

4. (Physiol.) (a) The reciprocal influence exercised by the various organs or parts of the body on one another, as manifested in the transmission of a disease by unknown means from one organ to another quite remote, or in the influence exerted by a diseased condition of one part on another part or organ, as in the vomiting produced by a tumor of the brain. (b) That relation which exists between different persons by which one of them produces in the others a state or condition like that of himself. This is shown in the tendency to yawn which a person often feels on seeing another yawn, or the strong inclination to become hysteric experienced by many women on seeing another person suffering with hysteria.

5. A tendency of inanimate things to unite, or to act on each other; as, the sympathy between the loadstone and iron. [R.]

6. Similarity of function, use office, or the like. *Webster Dictionary*, 1913

Unison (1) Having the same number of vibrations; homophonous. (2) Music in octaves for mixed voices or instruments. (3) Unisons; two or more parts playing in unison with each other, or at the

octave, according to the character of the instrument or voice." *A Dictionary of Musical Terms*; Novello, Ewer and Co., London, pre-1900

Vibration "Vibration is a periodic interexchange of state." Dale Pond

"Rhythmic Balanced Interchange." Russell

"Vibration is the rhythmical motion of a body within itself." Keely

"All force is vibration..." Cayce (900-422) "So is matter." Cayce (1861-16)

"All comes from one central vibration--taking different form." Cayce (900-422)

"Everything is vibratory." Cayce (195-54)

"As we see manifest in the electrical forces as used by man. This becoming only an atom in motion, and as the atomic force gathers this, producing such vibration as to create heat, light, and of the various natures, by the kind, class or nature of resistance met in its passage in the cycle given, reducing or raising the velocity, or better by the class of atomic force it vibrates, either with or against. These are examples of portions of universal forces." Cayce (900-17)

"Vibration is movement. Movement is activity of a positive and negative force." Cayce (281-29)

"Electricity or vibration is that same energy, same power, ye call God." Cayce (2828-4)

"Vibration is that same energy, same power, ye call God." Cayce (2828-4)

"Life in its manifestations is vibration. Electricity is vibration. But vibration that is creative is one thing. Vibration that is destructive is another. Yet they may be from the same source. As in the electrical forces in the form or nature prepared even for use in the body."

Q - "What is my ray?"

A - "Depends on what you are thinking. Remember life is vibration. So is mind. So is matter. As to the ray, this changes. Don't think you sit on a ray and it carries you along. You make the ray." Cayce (1861-16)

Void "The momentary pause in every heartbeat is a link with the still centre of the Overself. Where the

rhythm of activity comes to an end--be it a man's heart or an entire planet--its infinite and eternal cause is there. All this vast universal activity is but a function of the silent, still Void." Brunton (19-526)

Will Force "Will force," writes Keely, "is a latent, spiritual element, neither gaseous nor otherwise. Its evolution is brought into action under certain spiritual conditions not now understood by science. Its protoplasmic element is actually luminous, in respect to its latent flow from the cerebral domain; but all the flow that has ever been registered from the time of the birth of every volume of thought — all that ever existed, or will ever exist in the future — would not produce a substance of matter the size of a molecule." Keely, *Keely and His Discoveries*

"Newton, who scoffed at Epicurus' idea that "gravitation is essential and inherent in matter," asserted that gravity must be caused by an agent acting, constantly, according to certain laws. Heat, gravity, light, electricity, magnetism, chemical affinities, are all different phases of the primal force discovered by Keely, and all these forces, it is said, can be obtained from a single ray of sunshine. "The evidence of unity or oneness even between the physical, vital, mental, and spiritual is seen in the light of this law of correlation," says Smith. "A great portion of our muscles contract and relax in obedience to our wills, thereby proving that the mental force can be, and is, in every instance actually converted into the muscular or physical." Keely demonstrates the truth of this assertion, claiming that "all forces are indestructible, immaterial, and homogeneous entities, having their origin and unity in one great intelligent personal will force." Bloomfield-Moore, *Keely and His Discoveries*.

"The human brain being formed of an inestimable number of spherical resonators, termed in medical science nerve cells, forming the gray matter of the brain, these minute spheres take up the thought force which permeates all space in endless waves, eternally active. This force we term atomolic; the cells are composed of atomoles, whose vibratory motions under the action of universal thought force result in the phenomena of thought, cognition, intellection, etc. Understanding this, no one should continue to feel surprise at the caring emotions and impulses of a human being in an undeveloped state, as only by developed WILL can the motions of this force be directed.

The entire human economy, in the action of all its functions, assimilations, and motions, is the result

of differentiation of this unitary force, all tending to supply the instrument connecting the organism with this force (the brain) with certain gases whereby it sustains its ceaseless action from birth to death: these gases supply the rotating envelopes with necessary substance for their continued activity. Were this supply cut off, death would immediately ensue; it is a fact well demonstrated that the resonating brain-structure is the first to undergo decomposition.

In all embodied conditions of the manifested universe, the law of harmony (see *Keely's Forty Laws of Harmony*) reigns supreme; the cause of this manifestation is the result of the positive being stronger than the negative; the positive is everywhere the dominant order of the universe; this reality is perfectly embodied in the words I AM; it is the reason why annihilation is both inconceivable and impossible in the universe. The truth of this statement can be experimentally demonstrated; its law is found in all threefold aggregations, and there is a universal trinity composed of two positives and one negative. Eternal consciousness, immortal life, and an infinite order of beings is the result, whilst every provision is made in the order of creation for the happiness and enjoyment of all manifested beings. Conditions are also provided whereby satiety falls to the lot of none.

The eternally conscious entity - call it by whatever name we please - moves in cycles as eternal and infinite as itself; it oscillates and vibrates perpetually and is never unconscious of any present condition, be it pain or pleasure, joy or sorrow, shame or glory; like the pendulum of a clock or the sun, moon, or tides, it swings from the one to the other of these conditions, now in pleasure, now in pain, by its contact with the extremes of all varying conditions, like a child which throws up its head and laughing for joy exclaims, I KNOW I AM." *Dashed Against the Rock*

"All forces are indestructible, immaterial, and homogeneous entities, having their origin and unity in one great intelligent personal will force." Keely, *Keely and His Discoveries*

Word "For, of the dust of the earth was the body-physical created. But the WORD, the MIND, is the controlling factor of its shape, its activity, from the source, the spiritual entity." Cayce (263-13)

"Then MIND, as He, was the WORD - and dwelt among men; and we beheld HIM as the face of the Father." Cayce (1567-2)

Atlin - Knowing I AM

“The importance of offering this to the world (especially of Science) cannot be overstressed. As individual scientists awaken, this book will become invaluable.” Larry Keith

“I have been around to see Atlin. I know the story ... yet as I read the book I wondered what others who don't know you as the "show me the facts ... I am the science man" would have to say. You have to feel a little like the explorers who set off for sail yelling back to the naysayers on shore, "It is okay I won't fall off. You see things are not always as they seem." Your words have made me want to say, "I am not brave enough to get in the boat yet but, I want you to sail ahead for me and see what is out there! That is what the story of Atlin is All about ... ADVENTURE into ALL.

In reading your new book about Atlin a question kept coming to mind like a pop up video. God creates All. Can we invent All? An artist feels they have done this when they step back and hear people say that the work "speaks" to them. If you touch a rose the fragrance lingers. The beauty of that rose beautifies the beholder. The examples are endless. As you tune your tones of Oneness it begins. When you enter a holy building the vibrations quiet your voice and calm your actions. Peace. Prayer. Violence. Believing. Always the answer is the same. "...it begins with me..."

Thank you Dale for opening this story of how Atlin came to be. As they say truth is always a better read than anything you could make up. To all reading this it is our responsibility to question.” Teresa (authoress, *The Language of Light*)

“I received your great book yesterday and found it so profound that I want to carefully soak its meanings and beauty before I write about it next Wednesday to the SVPForum. So far "Theory" made a revelation to my learning to new avenues...” Rita Schurino
