

LATENT FORCE IN INTERSTITIAL SPACES - Snell

"*Latent force* is accumulated and held in interstitial space by *corpuscular aggregation*, otherwise the progressive *disintegration* of water could not induce increased *volume* and *pressure*.

"The *latent force* liberated from liquids and gases differs from that liberated from metals in that it is *elastic*, giving an infinite variety of *pressure*, whereas in the metals, *vibration* simply extends the range of *neutral sympathetic attraction* without *corpuscular* rupture as it reaches out for *concordance* in the *sympathizer*.

"This *sympathetic latent* power is held by the incalculable velocity of the *molecular etheric capsule* and the *atomic etheric capsule*, which rotate at billions of times per second, in interstitial *corpuscular aggregation*.

"Imagine a magnified *molecule* twelve inches in diameter, having an atmospheric *envelope* 1/16th in. thick, rotating at the same relative velocity as the *etheric envelope* of the actual *molecule*. The very lowest estimate of its velocity is 600,000 miles per second which would be impenetrable to a steel pointed projectile moving with the greatest velocity we can give to it. A rotating *envelope* such as this would hermetically enclose an internal pressure of several thousands of pounds per square inch, especially when we consider that the *ether*, unlike the atmospheric film which has *inertia* and consequently *centrifugal* force, has *centripetal* force or *neutral attraction* in direct *proportion* to its velocity. This is the explanation of the wonderful pressures evolved by *aqueous disintegration*, which have been *measured on a lever specially built for this purpose*, strong enough to stand three times the explosive power of gunpowder. The *evolution* of power from the *latent* condition in interstitial space by the proper *exciters* in all its multiplicity of forms proves the "*connecting link*" between the *celestial* and *terrestrial*, the *infinite* and the *finite*. The absence of *latent* energy in *matter* would make life an impossibility.

PRESSURES PRODUCED BY VIBRATION

"The mighty forces *latent* in corpuscular *matter* and all *matter* are held in oscillating *vortex* action, this *latent*, registered definite power interchanging sympathetically with the *celestial radiating stream* (renewing loss in *radiation* through *absorption* by *receptiveness*) whereby *light*, *heat*, *electricity* and *magnetism* are propagated in their different orders, vitalizing Nature with their *life* giving principles."
