

electrical vitalization

Keely

"The vibration of the polar magnetic flow represents one hundred and twenty-eight thousand four hundred oscillations per second, or one-third of the triplet of electrical induction, consequently the magnet must be in pure concordant sympathetic union with this rate of vibration, in its polar field, to become a medium of receptiveness as well as a medium of distribution of polar negative sympathy. In other words, the polar sympathetic flow is tapped at this point to allow of a letting out of the focalization that is diverted toward it by **electrical vitalization** (6) which represents positive negative concordance." [The Operation of the Vibratory Circuit]

Walter Russell

"The electric energy which motivates us is not within our bodies at all. It is a part of the universal supply which flows through us from the Universal Source with an intensity set by our desires and our will." [Walter Russell]
