

# sympathetic outflow and inflow

"This [magnetic stream](#), or [terrestrial magnetic envelope](#), is the one that has the most powerful [affinity](#) for all [neutral-centre](#) conditions; radiating continually from such centres, and [focalizing and concentrating](#) on them at the same time; thus feeding and distributing in a manner to preserve perfect [equation](#) under the most sympathetic and vital velocity, positively and negatively. This [perpetual polar activity](#) is, in its conditions, similar to the **sympathetic outflow and inflow** of the forces that constantly keep our solar activity in a perfectly balanced state. The same conditions in a physical way are found in the circulation of the [blood](#) through the [heart](#); [Inflow and distribution, inflow again and re-distribution](#) and also in the [cerebral](#) functions." [[COMMENTS OF JOHN WORRELL KEELY ON DR SCHIMMELS LECTURE](#)]
